ATTENTION DAIRYMEN!

The time has now come when the successful business man has found that his business has to be conducted on an efficiency basis and the dairymen are successful under the efficiency plan.

Farming has become a problem when efficiency means but cost of production thereby more money in the farmers and dairymen's pocket.

No dairyman needs to be shown that his cows should have plenty of water. Everyone knows that the more water a cow drinks the more milk she will yield. Her milk is 87 per cent water. It is as reasonable to expect her to go without water as to go without food. But many dairymen don't know how much more milk a cow will yield when she can drink all the water she wants exactly when she wants it.

Let Gerge Burckard demonstrate the modern sanitary water bowls to you and quote prices on installing the system.—Adv.

To the public: Beginning Monday December 15th the parcel post window will be open evenings for receiving and delivering parcels. Owing to the fact that the train arrives about an hour earlier than at this time last year the windows will be closed during the middle of the afternoon. It will very much facilitate matters for the Post Office force and the public if this be kept in mind. It is impossible for a small force, such as we have in the Tillamook office, to work the incoming mail and wait on the windows at the same time.

There will be no mail handled, except dispatching first class, after 11 a. m. on Christmas day by order of the Post Master General.

There will be no rural delivery on Christmas Day.
