Morgantown—(Signior Russell)

Quotations from the President of the Virginia State Penitentiary on the Mutilation of the Face are Wider

The President of the Virginia State Penitentiary told his hearers yesterday that it was not only a question of the mutilation of a man's face by using a razor, but that it was a question of the mutilation of the face by using a bottle.

"Mr. President," said Mr. Russell, "I believe that it is not only a question of the mutilation of a man's face by using a razor, but that it is a question of the mutilation of the face by using a bottle.

"You see, Mr. President, that there is a difference between the use of a razor and the use of a bottle. The use of a razor is a question of the mutilation of the face by using a razor, but the use of a bottle is a question of the mutilation of the face by using a bottle.

"In the case of the use of a razor, the face is actually mutilated, but in the case of the use of a bottle, the face is only mutilated by the use of the bottle."
