SPEED—SPEED—and again, SPEED

YOUR object in shooting is to get your bird with the center of your load. Of course! Then shoot these Steel Lined *Speed Shells*.

They are the fastest shells in the market. Their speed is demonstrated beyond question by the one sure test in all ballistic matters—the Electric Chronograph.

Then, too, there is the experience of thousands of seasoned gunners who have been shooting the Remington-UMC Steel Lined Shells ever since they came out.

The steel lining is the thing. It grips the powder—holds it in *concussion*—puts all the drive of the explosion behind the shot.

Your load travels quicker—you shorten up your lead. You cut down the guess work on lead and angles—*you get more birds.*

Your dealer carries these speed shells. Get them. Use them. Find the Red Ball mark on every box of shells and metallics you buy.
