Let the laboring man take heart. Things are coming his way. There was a steady increase in the scale of wages paid to labor in this country in the past six years, and this was accomplished in the face of a steady reduction in the working hours of labor. Statistics published by the department of labor indicate that labor is now receiving more remuneration for fewer hours of toil than ever before. The figures are based on comparisons of union wage scale agreements, trade union reports and working compacts in central cities throughout the United States from 1907 to 1912.

Andrew Christensen, cheese make at the Tillamook Creamery, left on Monday morning for Chicago, where he will attend the National Dairymen's Convention which will be held from Oct. 23 to Nov. 1. Mr. Christensen, Mr. Barber of the Mohler factory, and Mr. Schmelzer of the Red Clover factory will have cheese entered for scoring at the Chicago show. The entering of Tillamook cheese in the national contests has been a means of advertising Tillamook County extensively, and the men who are going to the trouble of placing their cheese up for scoring should have credit for their enterprise. While gone Mr. Christensen will put forth a special effort to bring his patented agitator before the cheese makers of the country. Mr. Christensen's patent has given satisfaction in every way to those who have tried it, and it is hoped that he can now get it before the cheese makers of the country in such a manner as to make it a financial success.
