### PORTLAND LETTER.

Portland, Ore., Nov. 4, 1913. (Special.)—Oregon leads the world in dry farming products. One man, Tillman, of Madras, with an exhibit the value of which cost but \$750, went to the Dry Farming Congress at Tulsa, Oklahoma, and absolutely on the qual-

ity of the grains, grasses, vegetables and fruits produced by dry farming methods in Oregon, he won the grand sweepstakes prize over Canada's \$50,000 exhibit, over South America, Australia and every other state in the Union. The Great Northern and North Pacific railways each contributed \$250 towards the expenses of the

exhibit.

At the Chicago National Dairy Show a yearling Jersey heifer, exhibited by Darrow Stump, 12 year old son of J. B. Stump, of Monmouth, Oregon, carried off the sweepstakes prize over cattle from all parts of the United States. Oregon is going into the great Land Show to be held in Chicago the latter part of this month and it is fully expected that her exhibit, which is probably the best ever assembled by the state, will land the third prize of the series.

Experts declare that Oregon has the best climate in the world for the production of flax and they confidently predict that flax and flax mills will be to Oregon what cotton and cotton mills have been to the South. A co-operative manufacturing firm is being promoted at Salem and it is expected to begin operations within the near future. Coarse crashes and twines for sewing wheat bags and for making nets will be the first articles turned out, but as soon as a market can be developed the finer grades will be produced, such as linen, damask, tablecloths and towels. About 1500 acres of flax will be needed to supply the first year's output of the factory. The theory that flax impoverishes the soil is an exploded theory, it is declared. On the contrary, it prepares the soil for a heavy succeeding crop.

The heaviest movement of Oregon sheep and lambs ever known has been going on recently from Central Oregon Points. Within a period of ten days 22,000 sheep were shipped from Bend to points in Montana where they will be fed for a time on their way to the Chicago market. On October 21 twenty eight double-deck cars were loaded with lambs at Condon, the shipment amounting to 8,000 head, the lar-

gest trainload ever handled on that branch. The lambs were all purchased within a radius of 40 miles of Condon and were consigned to Billings, Mont.

That the Dalles-Celilo Canal will be completed and ready for the passage of boats in about another year is the opinion of F. C. Schubert, of the United States Engineers, who has had charge of the work. With nearly all of the Government appropriation available, labor plentiful and weather conditions favorable, the work is being pushed forward faster than ever before, and unless the June rise of the Columbia is unusually great, it is believed that next Fall will see boats passing freely from Portland to points on the Upper Columbia and Snake rivers.

One acre of celery, grown a short distance west of the city of Hood River, is being gathered and marketed, mostly in Portland, and the truck grower expects to receive not less than \$2,000 from the crop. In addition to celery, he is raising tomatoes and peppers, both of which are extremely profitable.

### City Council Considers Franchises

Two Light and Power Franchises Asked for. Much Difference of Opinion. Matter may be Put up to voters

On Monday evening the city council met in regular session with the following members present: Chairman Harrison; Councilmen Leach, Keldson, Bales and Dick; Recorder Todd. Motion was made and carried assessing property on the north end of 2nd Ave. East for street improvements. The improvement is a stretch of plank which has been laid at a cost of \$141.50, and is assessed to Garret Ward on the east side of the street and to the Mount Vernon Creamery Co. on the west side of the street.

On motion a walk is ordered in on the south side of 12th street from Stillwell Ave. to 2nd Ave. West.

Motion made and carried that assessment be levied for graveling west of 3rd St., also planking alleys in Block 1 and 2 between Stillwell Ave. and 2nd Ave. East.

The time set for levying assessments is Nov. 17.

After the regular routine business was transacted and bills were allowed, The ordinance relative to an electric light and power franchise which Messrs. Small and Urie are desirous of securing was taken up for discussion.

The site has been secured up the Trask River and the county has granted the company a 30 year franchise, and now a franchise from the city of Tillamook is desired.

The council expressed a desire to have some explanations in regard to the matter whereupon Attorney E. J. Claussen introduced Mr. Sieben of San Francisco, who has charge of the promotion of the proposition and represents moneyed men of that city. Mr. Sieben stated that the prospects for a water power plant to furnish light and power for Tillamook City and its future needs, looked very good and was sure to come, but that it would come easier if the people of the city were in sympathy with the proposition. He dwelt to some extent upon the future prospects of our city and spoke of the prospects of a pulp mill for our town. He contended that water power would be much cheaper than steam power and would give us a strong leverage in securing manufacturing plants.

After Mr. Sieben had completed his talk Councilman Keldson gave his views in regard to the matter which were to the effect that while he did not want to stand in the way of progress at the same time he felt that our present lighting company was giving us very good service, and as it had had many obstacles to overcome in the past, he felt that now when conditions were improving they ought to be allowed a free field at least for a time longer.

Councilman Leach stated that he had as much sympathy for the present company as anyone had, but that he thought that if the new company wanted to come in here and develop our resources and build up the country and give us a cheaper light and power, that it was up to us to take advantage of this endeavor. He said that you can't build up a town unless you allow capital.

### Tillamook Boy Writes From Orient.

Jos. Atkinson Writes Letter to Mother Gives Interesting Account, And Some Inside History About Chinese Troubles.

U. S. S. Cincinnati, Nanking, China. September 1, 1913.

Dear Mother:— Just got two letters from you one wrote July 28, and the other August 7. It was the first mail we have gotten for some time.

The Chinks are still fighting here but think it will soon be over. They have been at it for about three weeks now but haven't done very much shooting, one side would fire a few shots then quit, but last night they started in earnest and are still at it.

Several small bullets have been falling on the ship this morning and one fellow was sleeping on the deck and a bullet went through his leg, just above the knee. A large shell passed over our quarterdeck this morning and struck the water close by but didn't hurt anything.

Nearly everyone had lost interest in the fight until last night, and this morning everyone is looking for a place where he can see the excitement. No one is allowed on the main decks today unless he has work to do.

One of the sailors on a large German cruiser here was killed this morning, and they moved farther up the river. We have moved three times since the fight started and are just above the firing line now and can see the guns when they fire and see the shells burst. It is like a 4th of July celebration. Though not much of a celebration for the rebels.

The Japs are helping the rebels all they can secretly and they came near getting themselves into trouble with the Germans. The Jap officers told the rebels that the Germans were furnishing guns and ammunition for the Northern army so the rebels told the Germans to move or they would fire on them, but the Dutchmen wouldn't go but began to investigate and found what the trouble was. Then the Japs wanted to apologize but the Dutchman told them to get off his ship and make his apologies to the German government.

We have been having quite a bit of trouble getting fresh supplies. They all come from Shanghai and most of the meat is spoiled when it gets up here. For over a week we had nothing but beans and canned meat and it sure got tiresome. The Germans got a lot of tomatoes and sent some of them over here last night and they sure were fine.

We sent a visiting party to the German ships every night for a while, until some of them came back drunk and that quered the whole thing. All German ships carry beer for their sailors and it tastes pretty good to American sailors also but they try to drink too much of it at a time.

This is one place where money is no good, a person can't spend a cent up here. Everything they had in the canteen is sold except a little stationery.

I have been taking in washing and have made about thirty dollars in the last ten days but it is a whole lot of work to do it everything is so unhandy.

(Continued On Page 4)

### On Your Own Account

have you any money in the bank? A part of your earnings ought to be placed there, anyway. Everybody can afford to save something, however little. Have a bank account of your own and you will feel happier, better, more independent. Make your little money earn more, and so grow bigger. Better than hoarding it where fire or thieves can reach it. Your bank-book is a receipt and an evidence of your wise economy.
