

OREGON NEWS NOTES OF GENERAL INTEREST

Events Occurring Throughout
the State During the Past
Week.

Water to Be Lowered.
Klamath Falls.—According to a letter received by President Mason of the Lower Klamath Marsh Land Owners' association, from Representative Elliott, officials of the reclamation service are studying a form of bond, upon the signing of which instrument the government will close the gates at the railroad track, shutting the water of Klamath straits out of Lower Klamath lake which will allow the reclamation of much marsh land around the lake by lowering the water level. The plan is to insure the government against any damage to the water right of the Van Brimmer ditch.

"Wets" and "Drys" Wage Campaign.
Salem.—The most strenuous wet and dry campaign ever carried on in Salem is now being waged. Both sides are well organized and until 10 days ago it was expected even by the ardent wets that the city would be voted dry on November 4, but within the last week the wets have perfected their organization and now declare they will win the election. It is generally conceded that the result of the election will largely be the result of the campaign on the wets. The last time the issue was presented in Salem, with only the two votes, the city remained wet by a very small majority.

Eight-Hour Law to Be Tested.
Salem.—The state board of control has requested Labor Commissioner O. P. Hoff to bring suit against the board to test the question of whether the eight-hour law applies to the employees of state institutions. If the courts should hold that it does apply to the institutions it is stated that no one of the institutions would have sufficient appropriations to carry it through next year without a dollar decrease. The governor has said that it would be necessary to call a special session of the legislature to provide for the emergency.

GIRL HAS GOOD ROAD PLAN.
Fair Supervisor of Schools to Let the Public Road Highway.

Ensign—Bessie Ensign, a college of study for the rural schools of western Lane county, is to be introduced with in a few days by Miss Goldie Van Riber, school supervisor in the Ensign district. Ensign has been notified. This is the first experiment of its kind ever tried in Oregon. Actual road-building is the laboratory work which will accompany this course. The children of each district will build and maintain during the approaching rainy season a strip of county road near the school building. The school where road stands the winter and is found in the best condition will be the winner of a unique contest in which school children on the Ensign eagerly are waiting to participate.

County Judge Edmund W. Thompson, Lane county, most active good roads enthusiast, was so pleased with this woman's plan to teach the fundamentals of road building in the rural schools that he immediately offered two large silver cups as prizes for this good roads contest.

One Dead, One Hurt in Wreck.
Baker.—One man was killed outright, another was slightly injured and two valuable race horses were hurt in a wreck six miles north of Prairie City on the Sumpter Valley railroad. Robert E. Richardson, of Baker, was killed when he jumped from an overturning car which fell on him, and William Hall of John Day was injured.

Has Vision of Railroad.
Klamath Falls.—There is every indication that the railroad from this city to Merrill and from there to Fernley, Nev., will be built next summer. There is also evidence that the road to the north will be built to connect with the Hill line coming south and that both Harrison and Hill interests will use the same line for the heavy exposition travel.

Recall Nominees in Fight to Stay.
Hood River.—All the candidates nominated by the recall petitioners have signified their intentions of qualifying and making the race against the members of the present county court at the November election.

Equalization Board Meets.
Salem.—The state board of equalization began holding hearings Friday, when representatives of the large railroad companies appeared before the board.

NEWS FROM OUR NATIONAL CAPITAL

Official Washington Takes Keen
Interest in Mexican Presidential Election.

Washington.—Official Washington awaited with keen interest the outcome of elections in Mexico under supervision of the Huerta provisional government, recognition of which has already been denied by the American government.

Three European nations—Great Britain, Germany and France—have agreed to adopt no new policy toward Mexico until the government of the United States can submit for their consideration a definite plan for the future treatment of the revolution-torn republic.

That a request of the powers to submit a proposal regarding Mexico from this government had been made, and that the three great European nations had yielded to the request was announced by Secretary Bryan.

When the note to the powers is to be presented has not been determined, but the belief prevails that reasonable time will be given for the announcement from the Huerta government in relation to the result of last Sunday's election for a new government.

President Opposes Single-Bank Plan.

The president made it known in emphatic terms that he was opposed to the central bank plan as suggested by Frank A. Vanderlip of the National City Bank of New York, and as endorsed informally by many members of the senate committee. He reiterated through Secretary Tamm that the Glass-Steagall bill, with its system of 12 federal reserve banks related only through the functions of one federal reserve board sitting at Washington, was "absolutely suited" to the needs of the country.

The president made it clear to the senate leaders that he did not believe the senate committee should try to disturb the foundation of the bill that passed the house to the extent that it would have to be remodeled to provide for a single bank.

Seamen Get Relief.

The La Follette substitute for the "seamen's certificate" bill, as amended, as not to affect the treaty relations of the United States until the president has had an opportunity to readjust them, passed the senate.

The La Follette substitute differed in many respects from the original bill which passed both houses of congress, but which did not meet with the approval of President Taft. Its chief provisions would require improved working quarters and working conditions on ships; increase the requirements for safety appliances and efficiency of sailors; release sailors from some of the stringent regulations that compel them to remain with ships when in foreign ports and direct the abrogation of any treaties that prohibit the enforcement of the provisions against foreign ships coming into American ports.

National Capital Brevities.

Whether there shall be one federal reserve bank with branches throughout the United States or several banks as provided for in the administration bill promises to be the chief issue of the final currency reform fight in the senate committee.

Republicans, Democrats and Progressives of the house will join in presenting Miss Jessie Wilson, daughter of the president, with a wedding gift. Speaker Clark will name a committee to carry out the plan.

Senator Chamberlain has been designated, commander of the battleship Oregon when she made her famous trip around Cape Horn at the opening of the Spanish war, today accepted the invitation of Secretary Daniels to be on the bridge of his old ship to lead the international fleet through the Panama canal early in 1915.

Including the practical completion of the Panama canal among the marks of "beneficent providence," which the nation, he says, has engaged in the past year, President Wilson issued his first Thanksgiving proclamation, naming Thursday, November 27, Thanksgiving day.

The big express companies have advised the interstate commerce commission that they have decided to abandon their opposition to the commission's recent order radically reducing express rates. It also was announced that the commission's block system of rates would be established immediately.

BRIEF NEWS OF OREGON

Madison is planning to entertain the Chicago White Sox and New York Giants teams and officials on their visit to that city, November 17.

Grant county is out of debt and has a balance of \$10,000. Crop yield was big and first class and large sales of cattle at top prices were made.

The first shipment of foreign meats to the Portland market has been received. A carload of Australian beef has been brought into that market by the Union Meat company of Portland.

Grants Pass, by vote of the people, authorized issue of \$200,000 railroad bonds for building first 10-mile unit of the Grants Pass-Crescent City line to the coast.

If county leaders of weights and measures carry into effect the new law, every weight and measure used in commercial pursuits will have to undergo a test.

The voting power in the Umatilla drainage district will be based on the amount of land owned, one vote being allowed to each dollar or major fraction thereof.

Dairy products were discussed this week at Tillamook, when the Oregon Butter and Cheese makers and the Oregon Dairywomen's associations met in joint annual convention.

The Unimproved port organization has requested Secretary Lane to arrange to have a preliminary survey made of the Unimproved bar and river with a view to obtaining appropriations for its improvement and navigation.

Farmers living near Ashland are making money selling coal most at \$10.00 to \$12.00 a ton. The coal mines near the high cost of living have been closed. The money received from the mines is being used to pay the farmers' debts.

Anybody who has a horse that is not a good one, but that is a good one, should be sold to the state of Oregon.

The effect of this was wonderful. Soon the "Certain Fresh" and the Freshie Girls were locked safely in Room 30. They speedily became so alarmed that after dressing the much sought youth in feminine garb they sallied forth. The ruse, however, was discovered before its mission was fully complete and the Freshmen took refuge in a nearby house.

The house was closely besieged for some time. Interest ran high and certain members of the Faculty told certain members of the Faculty that the product of an over wrought imagination. To these we will say: "Oh what a tangled web we weave, when first we practice to deceive." Well the web was soon unrolled, for the cop was summoned and the battle raged here of the Milk Bottle Brigade, marched out with the honors of war between two lines of besiegers whistling the renowned dirge: "The World's Turned Upside Down." O tempora, O mores!

This one night's proceeding, just a class rush, a friendly squabble over a stolen pennant has been of great value to the school and to the Freshmen Class. There is now a thriving competition class spirit that adds much to the inner school life, that takes some of the dullness out of study and that welds the school in a more friendly and compact body. As to the Freshmen, they are wiser now, they have responsibilities and have taken the first step, that first step is always the hardest to take. If more Freshmen classes had been given starts like this we would have a different school today.

Richards since the intense interest once found in the now forgotten Literary Societies has grown dull and died away, a real live day in the school calendar is seldom witnessed. Now a new interest has arisen, one phase of it has been tried, has been proved a success and let us hope passed away. But let the spirit remain. We are capable of rising to this emergency and creating new things to take the place of the old just past. "Tis not an ill-deed this vision of a live school, they have them other places, this has been, but let it be a "live one" no more, it can and must be a live one, now.

The contract for a football game has been secured from Forest Grove for November eighth.

There was a meeting of the Webster Club last Tuesday. The business of the evening was disposed of and another meeting was fixed for the next Tuesday at which there will be a real debate. The Webster Club is worthy of mention and attention not only for its name, which is "the" anything in a name ought to do wonders for it, but also for the work it is doing. The work is outlined by the Faculty in Debate and Parliamentary Law etc. so that it will count one half credit towards graduation.

The Freshmen bought a nice new and yellow pennant. But the pennant was stolen and they became quite wrought up over it. O unhappy Freshmen! They thought the Juniors did it (the Juniors say they never did) so two of them disguised their baby faces, passed themselves as Juniors and procured the third year pennant. O angry Juniors! How wrought up they grew! Hence the excitement before mentioned.

TILLAMOOK BOY WRITES FROM ORIENT.

(Continued from First Page.)

We wash clothes different here than what one washes them on the outside. We take a brush and plenty of soap and scrub the dirt out and rinse them and hang up to dry.

They are turning the ship into a chicken ranch, they got a lot of live chickens and ducks for the officers. It sounded rather out of place to be woke up by a rooster on a man of war. The grasshoppers fly on the ship all the time from the shore and are all over the ship even in the fire rooms.

Well I will have to knock off now I have several other letters to write today.

Joe.

COUNCIL CONSIDERS FRANCHISES.

(Continued from First Page.)

tal to come in and help you.

Mr. Spalding, manager of the Tillamook Electric Light and Power Co., addressed the council and stated that it was purely an economic question steam vs. water. He stated that he had given the matter thorough investigation and had come to the conclusion that by the use of refuse from the mills as fuel, that steam would be as cheap as water; that he had looked into the water proposition and had found that on account of the low water in the summer that it would be very costly to keep the supply up to where we could get proper service at all times and that in consequence it would not be possible to get any cheaper rates. He further stated that if the people had any grievances they could call on the Public Service Commission of the state for relief.

Councilman Bates said he was in sympathy with both the old and new companies and that he thought the

Steel Lined SHOT SHELLS
Cut down your lead—Get your bird with the center of the lead

In the making of shotshells, the greatest forward step since the invention of smokeless powder is the steel lining to grip the powder and concentrate all the drive of the explosion back of the shot.

It's a Remington special invention—that steel lining. You find it in Remington-UMC Arms and Navy Clubs. These steel lined shells get their shot to the target truer than any other shells known to the shooting fraternity. They cut down the guess-work about lead and angles. They put the center of the lead right on your mark.

The steel lining is moisture-proof—no dampness can get through. Its powder can get out. Waste powder—no energy is lost.

STATE OF OREGON, ss.

I, Irwin Harrison, Cashier of the above-named bank, do hereby certify that the above statement is true to the best of my knowledge and belief.

Irwin Harrison, Cashier.

Subscribed and sworn to before me this 4th day of Nov., 1913.

C. A. McGHEE, Notary Public.

M. W. HARRISON, CARL HARRISON, Directors.

council should go slow and see that no injustice was done, at the same time we should not stand in the way of progress.

Councilman Harrison stated that he was inclined to welcome capital or anything that meant for the future development of the county, but that it was his opinion that the council should go slow and not give away something that would be very valuable to the people in the near future. He counselled a thorough investigation of the matter.

Councilman Dick seemed to be very much in favor of sticking to the old company, and not granting a franchise to another company until the town has grown.

Attorney Gersoni, who has been advising the county in regard to the matter, spoke very much in favor of the proposition and said that by all means we should not put a Chinese wall around our town and exclude outside capital.

The new company desires a 30 year franchise from the city. It closed the deal today for a power site six miles up the Trask river.

The present company desires a 25 year franchise and will agree to return the city 1 per cent of the gross earnings of the company. The present company's franchise will expire in 9 years. However, it is seeking for a new franchise to begin at once.

Both franchises were laid over for further consideration.

It is possible the matter will be put up to the people at the next city election.

It is possible the matter will be put up to the people at the next city election.

It is possible the matter will be put up to the people at the next city election.

CANCER IN WOMAN'S BREAST
ALWAYS BEGINS A SMALL LUMP IN THE ARMPIT AND KILLS QUICKLY
