THE PRESIDENT'S MESSAGE IN BRIEF

Peace

There is only one possible standard by which to determine controversies between the United States and other nations; and that is compounded of these two elements: Our own honor and our obligations to the peace of the world.

Mexico

There can be no certain prospect of peace in America until General Huerta has surrendered his usurped authority in Mexico; until it is understood on all hands, indeed, that such pretended governments will not be countenanced or dealt with by the government of the United States.

By a little every day his power and prestige are crumbling and the collapse is not far away. We shall not, I believe, be obliged to alter our policy of watchful waiting.

Currency

I take leave to beg that the whole energy and attention of the senate be concentrated on it (the currency bill) till the matter is finally disposed of.

Rural Credits

What they (the farmers) need and should obtain is legislation which will make their own abundant and substantial credit resources available as a foundation for joint, concerted local action in their own behalf in getting the capital they must use.

We must add the means by which the farmer may make his credit constantly and easily available and command when he will the capital by which to support and expand his business.

The Trusts

I think it will be easily agreed we should let the Sherman anti-trust law stand, unaltered, as it is, with its debatable ground about it, but that we should as much as possible reduce the area of that debatable ground by further and more explicit legislation; but should also supplement that great act by legislation which will not only clarify it but also facilitate its administration and make it fairer to all concerned. I shall take the liberty of addressing you on it in a special message at a later than this.

Direct Nominations

I urge the prompt enactment of legislation which will provide for primary elections throughout the country at which the voters for several parties may choose their nominees for the presidency without the intervention of nominating conventions.

The Philippines

At last, I hope and believe, we are beginning to gain the confidence of the Filipino peoples. By their counsel and experience, rather than by our own, we shall learn how best to serve them and how soon it will be possible and wise to withdraw our supervision.

Alaska

The people of Alaska should be given the full territorial form of government and Alaska, as a storehouse should be

unlocked. One key to it is a system of railways. These the government should itself build and administer.

Other Subjects

An enlarged bureau of mines. Employers' liability act for railroads. Abolition of conditions restricting employment of women.

"FAGGED-OUT" WOMEN

Will Find Help in This Letter.

Overworked, run down, "fagged out" women who feel as though they could hardly drag about, should profit by Mrs. Brill's experience.

She says: "I was in a very weak, run-down condition. Life was not worth living. I could not sleep, was very nervous, stomach bad, and was not able to work."

"I consulted with one or two physicians, without benefit. I read of Vinol helping some one in a similar condition so I began to take it, and it simply did wonders for me. I gained in weight and I am now in better health and stronger than ever. I can not find words enough to praise Vinol."—Mrs. W. H. Brill, Racine, Wis.

Thousands of women and men who were formerly weak and sickly owe their present rugged health to the wonderful strength-creating effects of Vinol. We guarantee Vinol to build you up and make you strong. If it does not we give back your money. P. S.—For rough, scaly skin, try our Saxe Salve. We guarantee it.
