TUESDAY APRIL 28, 1914.

There are those who are criticizing President Wilson because he does not order our troops on to Mexico City. If President Wilson can honorably evade war with Mexico he will be so, and if he succeeds in keeping us out of trouble with the nation south of us he will deserve much credit and commendation. The fathers and mothers of this country who have spent the best years of their lives in raising boys who will be called upon to go to the front and not more anxious for war. They will not flinch at the sacrifice if war is necessary, but they will feel very grateful indeed if President Wilson avoids a crisis in Mexico.

President Wilson acted wisely in accepting Ararat, Brazil and other good offers in an endeavor to settle the question by arbitration. This action on President Wilson's part shows to the Latin American countries that we mean what we say when we assert that we are not seeking additional territory, but that what we do want is stable governments for the people south of us.

A war with Mexico will retard for a period of years the many reforms now in making in this country and to many people. It is not to be hoped by those who have the interest of our country truly at heart, that war may be honorably averted.

SPARKS FROM UNCLE RUBE'S ANVIL

Any fool ought to know a "prize fight" is a fight for a prize.

The boys can try the Mexican bull fight now and feel fairly safe from it.

If all officers are as good after election as before, we have a chance for a fine set for the next two years.

Is it a fact that when lawyers are selected as law makers, that they make laws which can be interpreted in more than one way to suit them? It looks like it from some laws we have.

The Tillamook Headlight throws down the gauntlet to the Herald and who would dare to be the little David, and pitch it up, when such a Goliath as Editor Baker stands breathing out threatenings to the one who would dare meet him on the political arena.

The Headlight seems to think when a man registers as a Democrat it makes him an enemy to our country and that he lines up with a party that opposes every thing good and that is for the good of our country, when in fact, he shows himself a man that is for the interest of the people as a whole, and opposed to graft, monopoly and special interest. But not so with the Headlight, its editor stands for the special interest such as the rich timber owners, Warren Construction Co. etc., to the detriment of the common people. Does he do it for the want of sense or filthy lucre?

The Prohibitionists have a chance to vote for some good men in the old parties this year, who declare for Prohibition. That is the way it should be, men should declare the principles and the voters vote for the man with true American principle regardless of party, for you will find dead beats in all parties.

What do we want a protective tariff on wool, cheese and timber for? We have the best cheese and timber country in the world, and people want our products which demand the best prices in the markets is it right, is it honest to want the government to protect (with a tariff) the cheese and timber of our country, which would enable them to charge more than it is worth, thereby robbing the consumers? Such a system is like "stealing the butter off of a blind negro's bread." Those who foster this system never give an honest and reasonable argument for it. They always appeal to selfish motives. That spirit of building up self by the destruction of others is destructive to true government.

Uncle Rube.
