STATE OFFICIALS INVESTIGATE BLUE BACK SALMON

R. E. Clanton and Geo. Kelly of the state fisheries department accompanied by Russel Hawkins and Game Warden Leach investigated conditions here last week in an endeavor to see whether there are any Blue Back salmon in Tillamook Bay. They learned enough to satisfy them that the Blue Backs are here but could not make a catch because they did not have the right kind of a net. One hundred fathoms of gill net will be sent here for further investigations. The investigations are being made for the purpose of finding out whether the fish come here to spawn or not. If the investigations prove favorable 10,000,000 Blue Back salmon eggs will be shipped here from Alaska. The Blue Back is a fine fish and compares favorably with our Chinook.

FINANCIAL CONDITION OF OREGON COUNTIES.

Salem, Or., May 30.—(Special.)—State Insurance Commissioner Ferguson, who has charge of the accounting department of state, will issue Monday the first quarterly report of the year of the financial conditions of the various counties. A bill passed at the last session of the Legislature provided that the Insurance Commissioner established a uniform system of accounting in the counties and this report is based on statements made to him under that law by county officials at the close of business March 31.

The money received, which consisted of county and state, general road, road districts, special roads, county schools, special school districts, high schools, library, register and indemnity, trust, cities and towns and miscellaneous funds, was as follows:

Baker	\$206,311.99
Benton	96,256.45
Clackamas	227,879.81
Clatsop	246,402.43

Farmers' Meetings This Week

Agriculturists from Our State College Will Be Present. Dairying and Loganberry Raising Will Be Discussed.

Every farmer in the county should plan to attend the big farmers meetings which are scheduled as follows: Thursday, June 11, 1 P. M. Nehalem at Union Hall.

Friday, June 12, at 1 P. M., Tillamook at Court House.

Friday, June 12, at 8 P. M. Tillamook at Commercial Club.

Saturday, June 13, at 1 P. M., Cloverdale.

Saturday, June 13, at 8 P. M. Beaver.

Improvement of our dairy herds will be the main topic of the day. Some of us are apt to think our stock needs no improvement but on closer examination we find that we have not yet reached the maximum nor even a high average production. According to the census report for 1913 there were 36,886,290 pounds of milk delivered at the cheese factories of the county.

This milk represents a product of about 9000 cows and has year contained an average of 3.97 per cent of butter fat which sold for 38.32 cents per pound. In round numbers, this means a production of 4000 lbs. of milk, 160 lbs. fat and \$64 gross income from the average cow in Tillamook County. Many farmers are realizing much more than this and there is no reason why the average of the county cannot be 200 lbs. or better of fat. Practical methods for increasing this production will be the main theme for discussion.

Loganberry culture and marketing will also have an important place on the program. Our soils and climate are especially well adapted to the growing of this plant and we are all vitally interested in the best methods of propagating and handling this crop. Prof. W. S. Brown of the Extension Division of the State Agricultural College will tell us how to handle loganberries.

The other speakers will be M. J. E. Norman of the U. S. Dairy Division, Prof. W. A. Barr of the State College and E. C. Jones, County Agriculturist of this county.

Meetings are entirely free and everyone is invited to come and bring his family.

Jackson county had a bonded indebtedness of \$400,000 and a foot note tells that Clatsop County had authorized an issue of \$400,000 and Columbia of \$300,000 for building roads. The other counties have no bonded indebtedness.

Eagle Feeding Young Filmed.

Klamath Falls.—Perhaps the first motion picture of a bald eagle nesting and feeding her young has just been secured by a company engaged in filming bird and animal life in Klamath county. The film was taken from a pine tree 150 feet from the ground looking down into the nest in another tree.

WHAT'S THE USE

Of running foolish risks with your money? Why be like that London man who lost \$100 while

FEEDING THE ELEPHANT?

The money was in an envelope in the side pocket of his coat. Thoughtless of results he put biscuit in his pockets for the elephant to delicately extract with his trunk. When the huge beast reached this side pocket he neatly and expeditiously appropriated both biscuit and money, seemingly relishing his

\$100 MEAL.

It is a safe wager that the man is now a convert to the checking system. Had he banked his money and let the elephant eat his check book he could have laughed at the incident, for the bank would have immediately given him another book. Get
