The drought of the last six weeks seriously affected the pear crop in the Rogue river valley. Picking probably will begin next week. Experts who have looked over the valley feel there will not be more than 40 per cent of the 1912 harvest. The crop is estimated at 400 cars.

Forest rangers on the Umatilla forest are engaged in erecting a 40-foot "fire tower" on the top of Lookout mountain, one of the highest peaks in the forest. Owing to the fact that only the raw material to be found in the forest was available for building the tower, its construction was a difficult task. It is nearing completion, however, and will be equipped with a powerful glass and "fire finder." A man will be on duty constantly and with the aid of the equipment at his command will be able to locate every fire within a radius of 75 miles, alerting as soon as it is started.

Firearms and Ammunition

THE remarkable favor shown by the shooting public to Remington-UMC rifles and shotguns, shot shells and metallics means just one thing—

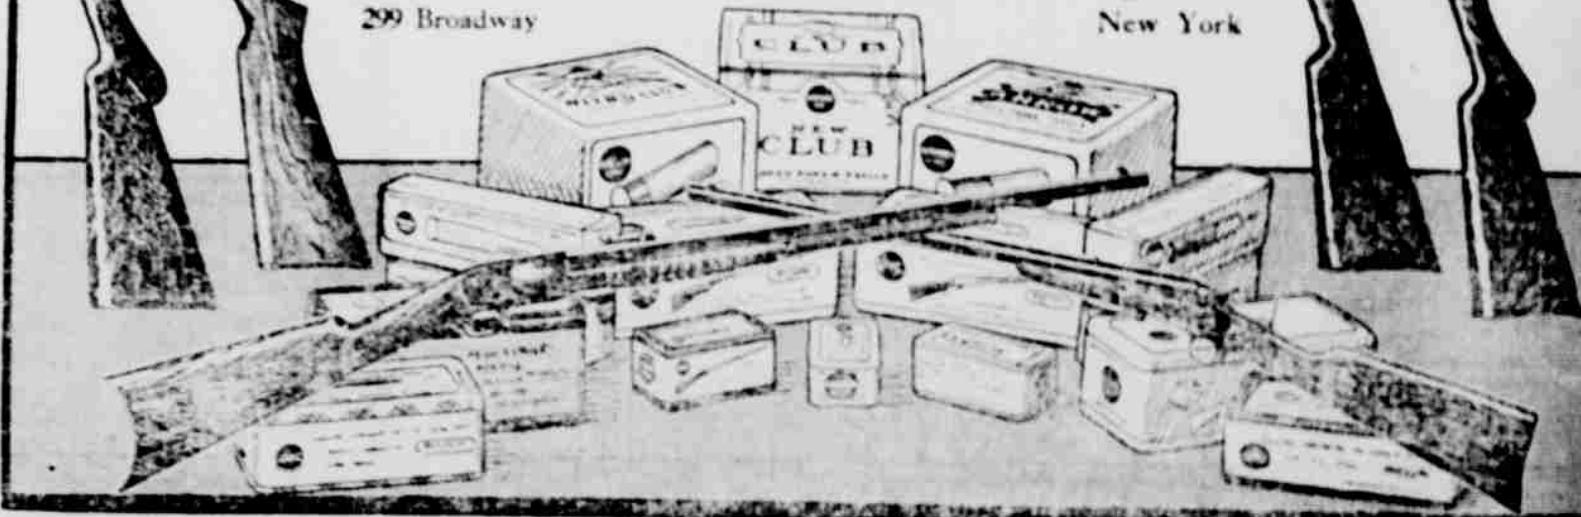

That sportsmen everywhere are becoming more conscious of their desire for the dependability that they find only in Remington-UMC arms and ammunition.

So you see the keen sportsman, when buying a new rifle or shotgun, go to the dealer who displays the Red Ball Mark of Remington-UMC. Or if he is already fitted with a rifle or shotgun, his tendency is more and more to shoot Remington-UMC shot shells and metallics—the ammunition that flatters any make of gun.

The Red Ball Mark of Remington-UMC—find the dealer who displays it. Look for it on every box of ammunition you buy.

To keep your gun cleaned and lubricated right, use Rem Oil, the new powder solvent, rust preventative, and gun lubricant.
