## GOVERNMENT TRIES TO STOP RISE IN PRICES

President Orders Inquiry Into Possible Illegal Combinations in Background.

Washington.—With the department of justice, under instructions from President Wilson, seeking to determine whether any illegal combinations are back of the recent sudden rise in foodstuffs prices and the departments of agriculture and commerce compiling figures showing the amounts of food supplies in the United States and the recent increases in exports, the government began vigorous efforts to cope with the food price situation.

In addition, legislation giving the president power to stop the exportation of foodstuffs whenever necessary and other bills designed to lower the prices were discussed informally at the capital, but there were no indications that anything along this line will be done during the present session of congress.

### Supply Bills May Fail This Season.

Fears that no general legislation, including the government ship purchase bill, can be passed in the senate before adjournment of congress by March 4 are now being supplemented by apprehension on the part of administration leaders that some of the general supply bills also will fail unless a plan can be devised to expedite legislative business that has been dragging at a snail-like pace for several weeks.

Fifteen appropriation bills including the District of Columbia measure, with its prohibition rider, now before the senate, are to be disposed of within six weeks, if the necessity of adopting joint resolutions to continue existing appropriations is to be averted.

### Naval Bill Reported.

The naval appropriation bill, carrying the \$148,000,000, was formally reported to the house by the committee on naval affairs. It does not alter the two-battleship program. The submarine is declared to have proved its great value, but it is pointed out that battleships have been shown to be necessary for control of the sea in war. The bill increases the building program of the navy department by \$8,492,000.

### Rivers and Harbors Bill Passed.

The rivers and harbors appropriation bill, carrying more than \$24,000,000, passed the house by a vote of 164 to 81. The bill now goes to the senate, where a protracted fight is expected.

All efforts to block or substantially amend the bill failed.

The bill authorizes no new projects, the \$24,000,000 being apportioned to continue improvements already underway, with provision for examination and surveys in various places, including the Colorado river and the harbors at San Diego and Long Beach.

The larger allotments of the money appropriated include \$7,387,000 for the Mississippi river, \$3,184,000 for the Ohio, \$1,250,000 for the Missouri and \$1,385,000 for the Columbia (in addition to \$600,000 for the Columbia and lower Willamette).

### Former G. A. R. Chief Dies.

Newburg, Ore.—Major Thaddeus Clarkson, formerly commander-in-chief of the Grand Army of the Republic and ex-postmaster of Omaha, Neb., died here aged 74. He had lived here with a daughter for several years past.

## NEW PRESIDENT IN MEXICO

Colonel Garza Named When Gutierrez Flees From Mexico City.

Washington.—Colonel Roque Gonzales Garza, one of General Villa's principal officers, is the executive head of that portion of Mexican territory controlled by the Villa-Zapata forces.

Advices to this effect reached the state department from American Consul Silliman. Details of the term of office which Garza will serve were lacking, but the general belief in Mexican circles here was that he had been appointed temporarily to meet an emergency created by the sudden departure of General Gutierrez and members of his cabinet from Mexico City.

The reasons for the departure of Gutierrez are unknown here, but the belief prevails that he declined to be continued in office under the restrictions suggested by the Zapatistas.

## OREGON ON WAY TO CANAL

Battleship Leaves Puget Sound Navy Yard on First Leg of Trip.

Seattle.—The battleship Oregon, refitted and repaired until, her officers say, she is in even better trim than when she made her cruise around the Horn to participate in the destruction of the Spanish fleet at Santiago, sailed from the Puget Sound Navy Yard on the first leg of her voyage to the Panama canal. The Oregon will call at San Francisco on her way south to take aboard stores and coal.

From San Francisco the Oregon will proceed to San Diego, to honor the Panama-California Exposition and receive more explicit orders concerning the part she is to play in the naval celebration at the canal. Besides Commander Reeves, Captain Frederick Ramsey, of the Marine Corps, and several enlisted men who were aboard the Oregon in 1898, sailed with her.

### Carranza Lifts Embargo on Oil.

Washington.—The British embassy announced that word had been received from General Carranza through the British legation in Mexico lifting the embargo on the exportation of oil at Tampico, which had threatened the fuel supply of the British fleet.

### Dry Alabama Bill Passes.

Montgomery, Ala.—A bill to make Alabama a prohibition state after June 30, 1915, was passed by both houses of the legislature.

### Chicago to Build \$5,000,000 Subway.

Chicago, Ill.—An appropriation of \$5,000,000 for the construction of a Copley subway was voted by the city council here.

## GAIN AT SOISSONS PLEASES GERMANS

Berlin, by wireless to Sayville, N. Y.—The fighting in the region of Soissons is regarded by German military experts as the greatest success for the German troops in France for three months, and it is held to confirm their convictions that the offensive of General Joffre, the French commander-in-chief, has broken down.

Major Morant, writing in the Tageblatt, says the total French losses in the three days' fighting in the Soissons district must have reached 30,000. His conclusion is that this victory must expedite the German operations in the Argonne forest and around the French fortress of Verdun.

"The enemy's attacks on our positions northeast of Arras were repulsed. In a counter attack our troops captured two trenches and made prisoners of the occupants."

"The hamlet of La Boisselle, northeast of Albert, which has been mentioned frequently of late, was completely destroyed and cleared of all Frenchmen."

### THE MARKETS.

#### Portland.

## RAID ON ENGLAND BY GERMAN AIRCRAFT

Saundersham and Other Towns Attacked and Much Damage Reported Done.

London.—German aircraft made long-threatened raids on England Tuesday night and attempted to blow up with bombs the king's royal residence in Saundersham, County Norfolk.

It is not definitely known whether the raiders were Zeppelins or aeroplanes, but Zeppelins were reported as passing over the North Sea in a westerly direction and there is an impression to believe these were the raiders.

Bombs were dropped in Yarmouth, King's Lynn, Saundersham, Cromer, Saundersham and Beoston and everywhere, except at Beoston, casualties and damage to property resulted.

The first place visited was the wide-spread resort and fishing town of Yarmouth. A man and woman were killed, other persons were wounded and much damage to property was done by the raiders in their visit, which lasted less than 10 minutes. Four or five bombs were dropped in Yarmouth.

### Machinery Concern in Receivers' Hands.

Indianapolis.—Finley P. Moore, a Indianapolis attorney, was appointed receiver for the Rumely company, a \$70,000,000 agricultural machinery manufacturing concern, by Judge Anderson in the United States district court here over the recommendation of all the creditors.

## ALLIES GAIN IN FLANDERS

Paris and Berlin Agree Artillery Operations Are Chief Activities.

London.—Official German and French reports agree in saying that late activities of the armies on the western front have been confined chiefly to artillery engagements. The German account tells of the blowing up of a foundry at Biangy, east of Arras, and the French version admits losing this position, but asserts that it was promptly regained and is still held.

A feature of the German report is the estimate it makes of the losses of the allies since the general advance was reputed to have been decided in December. These are given by Berlin as 20,000 killed and 17,850 prisoners, and it is added that the grand total, including wounded, sick and missing, must have been 150,000 men.

## EARTH SHOCKS KEEP ITALIANS IN TERROR

Rome.—A renewal of seismic disturbances has served to add to the terror of the people in parts of the district that was visited by the heavy earthquake last week.

Although the shocks were light, buildings which had been cracked and were tottering from the effects of the first disturbance, were completely raised. In Avezzano and Sora, the towns which suffered most from the disaster, the people left their temporary shelters and took refuge in open places.

Detailed reports received in the capital regarding Italy's stupendous earthquake disaster increase rather than diminish the appalling list of the dead and the enormous property loss.

The Messaggero, after making a careful compilation of all the figures it has been able to gather from the districts and villages hitherto isolated, announces that the number of dead and injured in the Avezzano district alone is 9,999, without including the Sora district.

Twenty thousand bodies, it is semi-officially estimated, are buried under the ruins of the earthquake-ravaged city of Avezzano.

### Jobs Promised on Dominican Job.

New York.—Thomas M. Sullivan, Dominican minister to the Dominican republic, was pictured at the factory conducted by Senator-elect Phelan in his fitness to hold the post, as having been associated with interests who for money consideration would guarantee to obtain profitable contracts from the Dominican government.

### Gutierrez is in Flight.

El Paso, Tex.—General Eulalio Gutierrez, deposed as provisional president of Mexico by the convention, which named General Roque Gonzales Garza as his successor, fled from the capital with several members of his cabinet to escape assassination at the hands of Zapatistas, according to reports received here.

"Our total losses for the same period," says the Berlin account, "do not amount to one-quarter of that number."

### Lister Blocked in Appointee Plan.

Olympia, Wash.—Reviving the fight of two years ago between the republican legislature and a democratic governor, the Washington senate refused to confirm two of Governor Lister's appointments, C. A. Reynolds, Seattle, chairman of the public service commission, and Leslie H. Darwin, Bellingham, state fish commissioner.

He should take some of our Medicine for his Cold

A little boy took cold. His parents neglected to give him medicine in time or send for the doctor. The little boy had a long, serious expensive spell of sickness.

When you catch cold "catch" it in time and overtake it. When we supply the medicines they will be fresh, pure and effective.

We VERIFY every prescription we fill.

## VIEW GRANGE HOLDS SPECIAL MEETING

The special meeting of the Fair-Grange on Thursday morning, devoted to the first and second degrees. The team which had work in charge did its work very well and deserves much credit for its high preparation.

At the noon hour a splendid dinner served as usual by the ladies. After dinner an open meeting was held and subjects of interest discussed.

S. Johnson spoke to some extent regarding to a water power bill which was prepared by the Hydro Electric Commission which provides for the controlling water right privileges, creating utility districts, enabling communities to combine and utilize the water power at their doors, or to have a rural community and city to combine or two cities to combine and use water power from the government or state prevailing opinion seemed to be to affect that the farmers ought to do every moral effort possible in support of this bill.

Regarding to Tillamook County's water bill, a motion was made and carried, instructing the secretary to ad-

vised Representative Handley that Fairview Grange considered a bounty of 10c for gophers sufficient, and that the law be changed reducing the bounty from 25c to 10c.

The subject in regard to the altering of school districts was also considered. Those present seemed to be satisfied with present conditions in regard to school matters, and a motion was made and carried instructing the secretary to notify Mr. Handley that the Grange was not in favor of any new school laws relating to the redistricting or reorganization of the school districts.

L. D. Krake who has an option on a lime stone quarry south of town brought up the matter of co-operation in regard to the development of this quarry. It is thought that by the farmers going in together and working the quarry on a co-operative basis much can be saved in securing lime for their lands. C. E. Donaldson displayed some samples of grain growing in soil with and without lime, the difference being very great and in favor of the lime.
