

Maxwell

The "Wonder Car"

The Powerful Motor of the Maxwell

This is one of the most marvelous pieces of machinery ever invented. Very powerful with four cylinders cast en bloc it has made the Maxwell famous as "The Car that Laughs at Hills."

Best of all this motor is breaking all low cost records for:

- 1st—Miles per gallon of gasoline.
- 2nd—Miles per quart of lubricating oil.
- 3rd—Lowest year-in-and-year-out repair bills.

We are waiting to take you for a test ride in the car that has broken all low "First-Cost" records, and is breaking all low "After-Cost" records.

SCIENCE AND PROGRESS.

Japan felt fourteen hundred earthquakes last year.

Paper flywheels, of more tensile strength than iron, are coming into use.

A cargo of five million cans of salmon was recently shipped from Vancouver.

A postal tube nine feet in diameter and over six miles long is to be built in London.

The spice islands of Zanzibar produce ninety per cent of the world's supply of cloves.

The narrowest street in the world is the Via Sol, Havana, which is forty-two inches wide.

From 20 to 25 cents a day is paid the women employed in the rubber industry in British Guiana.

At the last count the United States national bank notes in circulation amounted to \$718,085,637.

Six months ago Anchorage, Alaska, was a wilderness; today it is a

town of 5,000 inhabitants. This is the terminus of the new government railroad. A recent sale of six hundred lots brought \$145,000.

The department of commerce announces that there are more ships engaged in foreign trade today than at any time since 1863. On June 30 there were 2,748 ships so engaged, an increase of 363 ships for the year.

Dr. Lyman A. Noble, a Cleveland electrotherapist, declares he has discovered a formula from which a substitute, combining all the qualities of natural rubber, can be produced. The chief ingredient of the product, Dr. Noble says, is coal tar. As to the others he is maintaining secrecy.

ENDLESS CHAIN FINANCE.

Without touching its gold reserves or drawing money from other countries the German government has just floated another loan of ten billion marks which has been oversubscribed by the people, and has not imposed onerous taxes on them because enemy countries are to be forced to pay

indemnities that will retire these bonds without cost to Germany. Of course, redemption of bonds by collecting indemnities depends on the fortunes of war, and Germany is counting chickens before they are hatched. Many readers of this paper ask how Germany can borrow such vast sums so easily and bear so lightly the enormous cost of war. This is the supreme test of the endless chain system of financing war loans.

The German government is in the position of a farmer dealing exclusively with the keeper of a general store, and the German people are the storekeeper. If, instead of asking credit for what he buys, the farmer should borrow money from the storekeeper, give a note for it and then pay it back over the counter for supplies, the storekeeper would have the actual cash back in his till very soon. He would have as much actual money as ever to lend to the farmer and he could keep on lending it over and over again indefinitely. In addition the storekeeper produces all he sells to the farmer; this endless chain of borrowing and paying back could go on for years, but that would not alter the fact that the farmer's indebtedness was growing larger and larger.

Everything that the German government now buys for military purposes is produced by the people within the continental borders of the empire. The government began to borrow money from the people which it paid back in paper currency for supplies. Then it borrowed again, making another bond issue, as the farmer gave his note. This can go on for years, but the national debt grows all the time.

Unless the farmer strikes oil or some other windfall he will be bankrupt and the storekeeper will lose a few cents. Unless the Teutonic allies win an overwhelming victory and collect indemnities the German government will be unable to meet its obligations to its people and their savings will have been made in vain.

Great Britain and France are using up reserves of wealth already in hand while Germany is mortgaging the future. The British income tax is levied chiefly on those who buy government bonds with wealth already accumulated and the taxation will bear heaviest on them for a generation to come.

The endless chain system of finance makes borrowing easy at the start, but makes paying desperately hard at the end if no windfall comes—EX.

Kinsale.

Kinsale keeps a modest place in the history of Ireland. It was here that Don Juan's fleet landed 3,000 men to join hands with O'Neill, out of which landing grew the story that the cottages at World's End are still inhabited by the descendants of Spaniards. It was from Kinsale that James II, on March 2, 1689, landed and from Kinsale he sailed after his defeat at the battle of the Boyne. Thirty years ago the house in which he spent the night before his departure was still in existence. Kinsale was greater in the past than now, for we read that "of all the Irish ports it was the best situated for intercourse with France and that in the town Marlborough found a thousand barrels of wheat and eighty pipes of claret."—London Spectator.

A Woman's Way.

"Sir, we are starting a new railroad and want your daughter to drive the first spike."

"I have no doubt she will consider it an honor to officiate."

"Thank you. We have provided a small gold spike, also a silver hammer."

"One minute. I don't think she could drive a spike with a hammer. Better provide a hairbrush."—Louisville Courier-Journal.

Imagination.

"Robert," said the teacher to a small pupil, "can you tell me what influenza is?"

"Yes, ma'am," replied the little fellow. "Imagination is what makes a fellow think a boy's stinger is three feet long after he gets stung."—Pittsburgh Press.

One Way.

Customer—But your competitors, the Skinnem Mining company, have offices twice as large as yours. Promoter—That only shows our superior business organization. We have concentrated our business twice as much as they have.—Boston Journal.

Deeply Hurt.

"Am I the first girl you ever kissed?" "Well," said he, "I knew I bungled it, but I didn't think I made that poor a job of it."—Louisville Courier-Journal.

Deduction.

Lotts—Dobson's peculiar; owns a car and owes me \$51. Potts—Only \$5? How little he drives it!—New York Globe.

FOR SALE.

River bottom land 4 miles from Tillamook. 12 cows, team horses, harness and wagon, 4 hogs, 30 chickens, good orchard. On R. F. D. mail route. Part cash, balance terms. Enquire at Herald office.

Notice of Completed Contract.
Notice is hereby given, that the County Road Master for Tillamook County, Oregon, has filed in this office his certificate for the completion of the contract of M. J. and John Jenck, on the E. E. Cross County Road, from Station 448 plus 90 to Station 456 plus 90 and from Station 458 plus 38.1 to Station 496 plus 92.8 in accordance with the plans and specifications, and any person firm or corporation, having objections to file to the completion of said work, may do so within two weeks from the date of the first publication. Dated this 28th day of Sept., 1915. J. C. HARRIS, County Clerk. First publication, Sept. 20, 1915. Last publication, Oct. 14, 1915.

FARM BOYS IN BASEBALL.

Managers Think They Outclass the City Bred Youngsters.

"The other day I inquired of a major league manager what class of young men he wanted for his team," writes Hugh S. Fullerton in Farm and Fire side.

"Give me the farmer," he replied in a staid tone. "The chances for his falling victim to the temptations of baseball are fewer. He may not be as well posted as to city ways, but in one season you cannot tell the difference. They come larger, stronger, live cleaner and think more clearly than city boys do. Besides, the majority of them have the right idea in view. They want to get money to buy a farm."

Twenty, yes, ten years ago the major league baseball teams were recruited almost entirely from the larger cities. Cincinnati led in production for years, then Boston, then St. Louis. A dozen years ago 50 per cent of the major league players hailed from New England and from the Atlantic states. Now more than 60 per cent of all major league players come from farms— from small villages, and the farms produce a greater number of good players than come from any other place.

"Babe" Waddell, Ruben Marquand, Duke Kahanamoku, Duke Benton—a score of names have shone in major league baseball, and their nicknames once were one of ridicule. Not now. Managers of major league baseball teams are looking for rules, and when they say "Rule" they mean not the mouth of the awkward recruit, but the clean cut, clean living boy from the farm."

WHERE THE MAIDS WOO.

Capturing a Husband in India Is an Ordeal at Times.

It would be a great mistake to imagine that there are no countries where the bashful bachelor does not have to wait and be wooed.

In the Torres Straits islands, for instance, it is the height of bad form for a young man to make the first advances in wooing. Even after the preliminary steps, which consist of the exchange of bracelets, everything is not plain sailing. A girl sends a message to a young man to meet her, and if all goes well she urges him to name the day. When matters have gone so far as this it is no longer necessary for him to play the part of the modest suitor, and he replies, "Tomorrow, if you wish." Then they go home and tell their relatives, who promptly celebrate the occasion by a general merrymaking.

Among some of the rude tribes of India the woman's courtship is a disagreeable experience. If the man of her choice does not respond she takes a jar of rice beer and sits down in his house. The women of the family know what the rice beer means, and if they do not want the marriage to "come off" they are allowed to use any means short of personal violence to eject the fair wooer from their doors. They may put pepper in the fire, drench her with water, or load her with opprobrious epithets, but to gain the man of her choice the lady has only to hold out for some two or three hours and the bridegroom is hers.—Detroit Free Press.

Power of Lyddite.

Lyddite is a very stable compound. It can be hammered or burned in the open without danger, and it requires a fulminate or more powerful explosive to set it off. Lead peroxide is the usual agent employed. But here is an odd point about lyddite—it must not be left in contact with iron or steel. If this is done the peroxide combines with iron rust to form a very dangerous compound. Consequently all shells used to contain lyddite are first carefully lined on the inside. Lyddite is six times more powerful in its action than nitroglycerin, and nitroglycerin in its turn is eight times more powerful than the same weight of the old-fashioned black gunpowder.—London Answers.

In Futures.

The Studio Club of New York is a home for young women—naturally single young women chiefly. Not long ago the girls were assembled in the hall to hear a lecture. A young matron, a member of the board, rose to make some announcements.

"Next Tuesday," she said, "Mrs. Blank will talk to you here on the subject of 'Marriage.' Those of you who heard her last year will remember how helpful her talk was."—New York Post.

Genius as They See It.

"I have known several poets who realized that genius really means hard work," says the hard times philosopher, "but you can't get the big majority to test it by plowing their way over a twenty acre field. They would sooner see an empire knocked out with a baseball bat than bruise the innocent breast of a field flower with a cold, unfeeling plowshare."—Atlanta Constitution.

The Witch's Trick.

At Peel, in the Isle of Man, it is related that a witch said once the herding dog would not return. Every sheep was lost, and she was rolled down the hill in a barrel set with spikes. The grass has never grown since in the barrel's track.

The Mist Gentle.

She—I wonder what makes the baby so wakaful? He—Herodity. That's what comes of you staying up at night waiting for me to get home.—Philadelphia Ledger.

Electricity has converted more smokers than any other force of learning.—W. W. Fowler.

Remington-UMC
.22's Have the Call!

WITH the rise of .22 rifle shooting to the level of a sport, Remington-UMC became the fastest selling .22 ammunition in the world.

Whatever make of .22 rifle you shoot, Remington-UMC Cartridges will give you better, surer results than any other in the world.

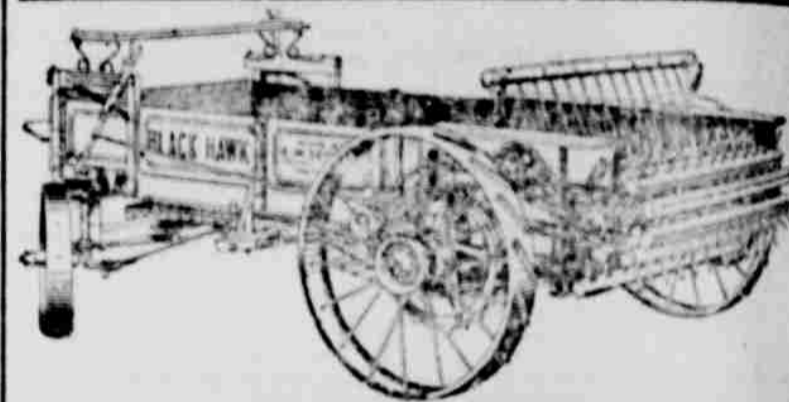

Go to the leading dealer—the one who displays the Red Ball Mark of Remington-UMC.

He'll tell you what sportsman think about these famous cartridges—and he'll show you the Remington-UMC .22 Rifle, Single Shot, Slide-action and Autoloading in a class by themselves for "feel," easy operation and consistent performance.

Sold by your home dealer and 645 other leading merchants in Oregon
Remington Arms-Union Metallic Cartridge Co.
Worldworth Building 233 Broadway, New York City

SPREAD IT RIGHT

THE BLACK HAWK LOW SPREADER WILL DO IT

The front and rear wheels are under the box this admits a shorter hitch to the horses and means lighter work on the team. The Black Hawk has no gears thereby doing away with all friction. If at all interested in manure spreaders, we invite you to come and examine the Black Hawk Spreader on exhibition at our store.

PLASKER BROS.
TILLAMOOK, OREGON

The Greater Oregon

With new buildings, better equipment, enlarged grounds, and many additions to its faculty, the University of Oregon will begin its thirty-ninth year Tuesday, September 15.

Special training for Business, Journalism, Law, Medicine, Teaching, Library Work, Music, Architecture, Physical Training and Fine Arts. Largest and strongest departments of liberal education.

Library of more than 85,000 volumes, two splendid gymnasiums, eleven buildings fully equipped. In a new Hudson Administration Building in course of construction.

Tuition Free. Examinations for men and for women. Expenses lowest.

Write for catalog and illustrated booklet. Addressing Registrar.

NEW FAMILY PACKAGE

Fresh, crisp delicious Snowflake Sodas, packed in a sanitary and useful tin box. Only 50 cents.

Every dealer has them or can get them quickly—fresh from our ovens

PACIFIC COAST BISCUIT CO.
PORTLAND, OREGON

Notice.

Notice is hereby given that the State Land Board of the State of Oregon will receive sealed bids at its office in the Capitol Building at Salem, Oregon, up to 10 o'clock A.M. on November 9, 1915, for all the State's interest in the tide or overflow lands hereinafter described, giving, however, to the owner or owners of any lands abutting or fronting thereon, the preference right to purchase said tide or overflow lands at the highest price offered, provided such offer is made in good faith, and also provided that the lands will not be sold for, nor any offer therefor accepted of less than \$7.50 per acre, and that the Board reserves the right to reject any and all bids.

Said lands are situated in Tillamook County, Oregon, and described as follows, to-wit:

Beginning at a point 660 feet north of Sec. corner common to 14, 15, 22 and 23, T. 1 S., R. 10 W. W. M., this point being the meander corner between sections 14 and 15; thence, East 306.00 feet along U. S. Meander line.

N. 32 degrees, 45 minutes E. 660.00 feet along U. S. Meander line.
N. 78 degrees, 45 minutes E. 770.00 feet along U. S. Meander line.
N. 24 degrees, 16 minutes E. 450.00 feet along low water line.
N. 3 degrees, 20 minutes W. 1135.00 feet along low water line.
N. 5 degrees, 33 minutes E. 410.00 feet along low water line.
N. 15 degrees, 18 minutes W. 800.00 feet along low water line.
N. 0 degrees, 40 minutes E. 2000.00 feet along low water line.
N. 3 degrees, 37 minutes W. 1200.00 feet along low water line.
N. 87 degrees, 54 minutes W. 1300.00 feet to point on line between Secs. 14 and 15.
South, 730.21 feet to a point of beginning, containing 241.42 acres in Secs. 14 and 15, T. 1 S., R. 10 W. W. M.
Applications and bids should be addressed to "G. G. Brown, Clerk, State Land Board, Salem, Oregon," and marked "Application and bid to purchase tide lands."
Dated August 27, 1915.
G. G. Brown,
Clerk State Land Board.
First publication, Sept. 2nd, 1915.
