### Every Woman Should Know

There are three entirely different kinds of baking powder, namely:

> (1) Cream of tartar, derived from grapes;

Alum, a mineral acid; and (3) Phosphate of Lime.

(1) Baking Powders made of Cream of Tartar add to the food the same healthful qualities that exist in the ripe grapes from which Cream of Tartar is derived.

(2) Baking Powders made of Alum add to the food some form of Alum or Aluminum, a heavy metal, wholly foreign to any natural article of food.

(3) Phosphate of Lime is made from rock or by burning bones which by chemical action are changed into a white, powdered acid. It is used in baking powder only because it is a cheaper substitute.

A Cream of Tartar powder never contains
Alum or Phosphate.

Every housekeeper should read the names of the ingredients printed on the label and know what she is using.

County Judge A. M. Hare and County Commissioners McKimens and Owens went out to Salem Wednesday and met with the State Highway Commission. Our County Court and the Yambill County Court have been endeavoring to secure an appropriation from the state for the Sour Grass road. Late news from Salem States that among other appropriations the State Highway Commission has appropriated \$9000 for the Sour Grass Road. This amount is about half of what we were expecting. The counties will probably each appropriate \$5,000 for the completion of the road which will no doubt be given a macadam surface.
