The Town Cow And Her Owner

Every family that can afford to do so should keep a cow. It's mighty fine to have an abundance of milk and cream and home-made butter.

By packing surplus butter to be used during the time the cow is dry and by feeding skim milk to chickens or calves, any family can easily use all the milk given by one cow.

Hundreds of calves will be knocked in the head at birth during the next few weeks in this vicinity unless saved from such fate by those able to care for and feed them. The farmer cannot keep all of them.

Try raising one or two calves for veal this year

BOYS' AND GIRLS' CLUB ACTIVITIES

David H. Kennedy has been appointed county club agent of Tillamook County and assumed his duties on February 24. He succeeds Miss Elizabeth Burr who resigned last fall. Mr. Kennedy, who was a farm raised boy, has been for the past 13 years directly or indirectly engaged in farm work. Prior to his appointment he was engaged as an official tester for the Oregon Agricultural College.

The Barnside Club of Clatsop is the first club in the county to complete its work and make final reports. Miss Jennie M. Crawford is the local leader. The members of the club are: Winifred Barber, Roy Miner, Helen Wilkes, Charley Burke and Olin Barber.

The Wheeler Camp Cookery Club was organized with a membership of nine boys. The local leader is Mr. J. P. Taylor. Members are as follows: President, Leonard Jensen; vice-president, James Hamilton; secretary, M. Hansen; Arthur Carlstrom, Eugene Hansen, Franklin Shumiger, Jennie Gentry, Frank Carterbury, George Chartier.

The first meeting of the Neatness Valley Calf Club was held Saturday March 11, with the following members in attendance: Local leader, M. M. Bays; president, Floyd Thun; vice-president, Paul Thun; secretary, Lloyd McKillop; Norman Paris, Jack Shurtledge, Wayne McDonald, Everett Hartschuch, Lawrence Davis.

The Yellow Fir Camp Cookery Club was organized with Mrs. Shumaker as local leader. The members are: local leader, Jack Shumaker; vice-president, Ellen Mitchell; secretary, Rose Wierhoff; Eva Bigelow, Carl Day, Arthur Miller.

Calf club members planning to take in donations 31 or 31 1/2 should get started at once, because these donations call for a six months record of the animals.

Boys and girls club work in Oregon showed better results last year than ever before according to H. F. Seymour, State Club Leader. In an article in the Red Book on Club Work as prepared by the State Department of Education, Mr. Seymour says: "I know that every club boy and girl in the state will be interested in knowing something of the results accomplished by the vast army of club members throughout the state during this last year."

In 1920, states Mr. Seymour, there were 2089 boys and girls who completed all their work, and filed their final reports in our office, while in 1921 there were 4,299 that completed all work and filed final reports. The value of the products produced by the members of the state in 1921 was \$111,281.96 with a profit to club members of \$25,942.90, while in 1922 their value was \$117,359.68, with a profit of \$27,778.75.

The percentage of those completing in the state in 1922 was 37 per cent. last year it was 54 1/2 per cent. The results of exhibits in local, county and state fairs, and the Pacific International Exposition was a much higher standard in all projects than in the past, thus showing that you people are profiting by the club work you are doing and are raising the standard of your work."

FITTS MAKES REPEAT ON COW TESTING

According to E. B. Fitts, dairy extension specialist, nineteen hundred seventy-four cows were tested during December in Oregon cow-testing associations. The average yield of milk was 445 pounds of butter-fat 22.01 pounds. This is 18 pounds of milk and 2.02 pounds of corresponding months to the previous year. Expressed in figures this means that the 1974 cows tested gave an increased yield over the previous year of 2087 pounds of butter-fat, which at the prevailing price 21 cents, is worth \$1235.87.

The highest average for the month was 46.8 pounds of fat made by the Holstein herd owned by Frank Wilkinson of the Clatsop County Association. The Jersey herd of J. R. McCracken of the Rogue River Association was a close second, with a yield of 46.5 pounds of fat.

The Holstein cow "Babe" owned by Frank Wilkinson of Clatsop county made the highest butter-fat record, 79.4 pounds, while the greatest milk record, 2086 was made by "Belle", a Holstein cow owned by Nelson Bros. of the Tillamook Association.

The Rogue River Association was first in production with an average yield per cow of 634 lbs. of milk and 32.84 pounds of butter fat. In this association 64 cows gave more than 40 pounds of fat during the month.

Cooks are on the job and a few men are at Coal creek getting machinery and equipment to resume logging within the next two weeks. The camp supplies logs for the Wheeler mill and has been closed 16 months. When operating to full capacity 100 men are employed.
