Gang, we greet you!

Nice weather we had—last Friday Old Jap Play was up to date, playing as nice an April Fool trick as ever one could ask for.

John Carroll pulled a most little joke on about a hundred of us Saturday. He hauled out a lot of powder, drilled a few holes in a hill—

(the sheriff had him in tow) and dozens and dozens of incredulous and unsuspecting persons. We got there at 11 A. M. Twelve o'clock rolled around and nothing doing. One came, then two and three and still nothing doing.

Delph Timmerstet followed in a new car. Out at Clatsop's Bay shore Saturday there is a fine beach, the water is clean and sparkling, the sand is soft and white.

The sign post didn't go on, but stubbornly held its position although it was slightly bent and twisted in the association. Delph dug up the sign post and found it was the sign post.

EGG PRESERVING TIME

This is the season of the year that the price of eggs is low. This is the time to "put up" your supply of eggs for next winter.

SODIUM SILICATE (Water Glass)

This is the only real egg preservative and is a clear water white liquid which does not impart a taste to the eggs.

Pints ..... 15c Quarts ..... 25c Gallons ..... 75c

One of our 25 bottles is sufficient to preserve 14 dozen eggs.
