**COMFORTABLE PLACE FOR CHILD IN AUTO**  
But Little Material Needed for Making Hammock.  
Hammock Takes Up Room Usually Occupied by Third Person Riding in Rear Seat and is Easily Attached or Detached.  
His screen-door springs, a heavy loop, and a yard of heavy cotton twine, the materials necessary to make a baby's hammock, for the rear seat of a car, are the only things which give useful service and comfort. The hammock takes the place of the third person in the rear seat as shown. It can be quickly attached or detached, and is easily folded up when not in use. The loop for the seat belt is in the middle of the hammock. The hammock is 20 inches wide by 30 inches long.

The baby is thoroughly comfortable in the hammock.

cloth sewed to them. Attached to each half loop are three screen-door springs, and the spring is held in the hammock in a steady position, when the baby is in it. The springs are sewed to a ring in each end, and the ring slip over the seat supports. When baby is not in the hammock, it can be folded up and placed in the trunk of the car. The hammock will hold a baby weighing up to 25 pounds.

WHEN THE TASK OF SHAVING  
is a luxury, by using it in a modernly equipped, sanitary bathroom. You can have such a room at an expense which will be far outweighed by the added pleasure, comfort and good health it will give you. Let us figure it out for you.

**CLEAR VISION IS GIVEN**  
To obtain a clear view ahead through the glare of the wind shield in rainy and stormy weather is vitally important to the safety of the motor car and its occupants. Many motorists are slow to keep the glass clear in wet weather. Full latitude for the windshield wipers and give each motorist a clear and unobstructed view of the road ahead. If the wiper is wrapped in a cloth and moved along in the same position it will be sure to keep the glass clear.

**PUT CAR THEFTS AT \$100,000,000**

**Interstate Commission Works Out Clearance Test to Cut Down Losses of Autos.**  
**OWNERS ARE ASKED TO HELP**  
Organization Conducts an Active Campaign Throughout the Country With Headquarters Located in the City of Chicago.  
Coincident with the announcement that the Interstate Motor Theft Commission would be continued as a permanent organization with headquarters in Chicago, it was said that reports of thefts of automobiles throughout the country indicated that cars valued at \$100,000,000, were stolen every year. It also was asserted that these automobile thefts showed a loss of \$300,000 for every twenty-four hours.  
The Interstate Motor Theft Commission was formed in 1917 for a national inquiry into automobile frauds and thefts and for the distribution of the market for stolen cars. The commission is composed of about 100 persons in different parts of the country, including Deputy Police Commissioner Joseph A. Faurot, E. M. Allen, member of the Insurance Committee of the United States Chamber of Commerce; J. A. Hall, educational director of the Associated Advertising Clubs of the World; Guyton Borganum, the secretary and president of the International Sporting Club, and Ivan Deard, National Boy Scout commissioner.

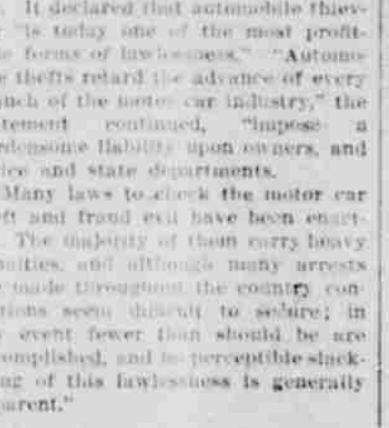

The Daily is thoroughly comfortable in the hammock.

**National Clearance Test.**  
"A national clearance test to be applied to all cars registered in the United States has been carefully worked out that not only will result in the detection and recovery of a great majority of the unregistered cars stolen in the past, and that are still in operation, but will prevent to a very large degree, the future sale, use or registration of stolen cars in any state, regardless of changes in numbers and appearance," says a statement of the commission.  
"The plans of the commission are considered the most constructive and business like that have been advanced since the advent of the automobile itself to adequately protect America's \$100,000,000,000 motor car wealth against commercialized theft and fraud. Since its inception this body has achieved almost unqualified moral support and cooperation from many sources, among them police, detective, state, treasury and business authorities, civic organizations, motor car associations, clubs, manufacturers, distributors, dealers and owners."  
**Owners' Aid is Asked.**  
The statement added that owners of cars were especially being urged to aid the commission in eliminating automobile thefts throughout the country. It declared that automobile thefting is today one of the most profitable forms of lawlessness. "Automobile thefts retard the advance of every branch of the motor car industry," the statement continued, "impose a burdensome liability upon owners, and police and state departments."  
"Many laws to check the motor car theft and fraud evil have been enacted. The majority of them carry heavy penalties, and although many arrests are made throughout the country convictions seem difficult to secure; in any event fewer than should be accomplished, and the perceptible check on this lawlessness is generally apparent."

**TO MAKE RAIN VISOR FOR ANY AUTOMOBILE**  
Tin Device Prevents Fogging of Driver's Vision.  
Elements Kept From Striking Glass and is Great Help in Stormy Weather—When Enamelled Suitably it is Not Conspicuous.  
When it rains against the windshield the view of the road is uncertain and chances of accident are increased. Windshield cleaners are good, but they keep one working. This visor has been devised to prevent the elements from striking the glass at all and is a great help to drivers in stormy weather. As most automobiles keep their tops up during winter, it can be fastened permanently in place, for that season at least.  
Cut out a piece of sheet tin the desired length and so it can be bent about as shown in the perspective of the windshield edge of the visor, and should be punched with several holes so that it can be tacked to the inside of the front bow of the top.  
Make it just low enough so that it will ward off the snow or rain, but not too low to prevent the driver from watching the road. Be sure the side shields come as close as possible to the glass without touching, as they will help to keep dirt from sucking in the snow or rain at the sides.  
When enameled a suitable color to match the car, it will not be unbecomingly or conspicuous in the least. —Popular Science Monthly.

**WILLYS-KNIGHT**  
The Willys-Knight Motor Improves With Use  
**STAR GARAGE**

NEVER before has the amazing Knight sleeve-valve motor been available in so fine a car at so low a price. Europe uses the Knight motor in her most famous and expensive cars. Now Willys engineering, Willys quantity production, put it in the reach of all in a car equally famous, but far less costly.

**The Motor**  
The Willys-Knight motor is the latest development of the Knight sliding sleeve-valve principle. It gives more power, out of less gas than any other motor of its size and weight. It is free from valve trouble, free from carbon troubles, smooth, quiet, flexible. Scientific tests and drive experience show that it grows more powerful with use. And its life-limit has never yet been ascertained.

**The Car**  
The Willys-Knight Car is especially designed to match the motor in long life and distinction. Gracious, refined, dignified, its sturdy steel chassis beats off jolts and jars and holds the body permanently free from rattles and squeaks. Vigorous springs translate the roll of the road into undulating ease. It is fleet, comfortable, responsive—and a sound investment.

**Preventive Medicine**  
The tendency of medical science is toward preventative measures. It is easier and better to prevent than to cure. Pneumonia, one of the most dangerous diseases that medical men have to contend with, often follows a cold or attack of the grip. The cold prepares the system for the reception and development of the pneumonia germ. The longer the cold hangs on the greater the danger. Take Chamberlain's Cough Remedy as soon as the first indication of a cold appears so as to get rid of it with the least possible delay. It is folly to risk an attack of pneumonia when this remedy may be obtained for a trifle.

**S. P. OFFERS RATES FOR MEMORIAL DAY**  
Special Memorial Day excursion rates of one and one-half fare for the round trip between all points on the Southern Pacific Lines where the one way fare is \$25 or less have just been announced by Chas. S. Fee, Passenger Traffic Manager.  
Tickets will be on sale at all regular ticket agencies from May 27 to 30 inclusive with return limit June 1.  
As Memorial Day comes on Tuesday this year the railroad traffic officials expect a large number of people will avail themselves of these week-end excursion rates.

**WON SIX, LOST FOUR**  
The Bay City basketball team has ended the season. Out of ten games played the team won six and lost four.  
**Indigestion and Constipation**  
"Prior to using Chamberlain's Tablets, I suffered dreadfully from indigestion. Nothing I ate agreed with me and I lost flesh and ran down in health. Chamberlain's Tablets strengthened my digestion and cured me of constipation." writes Mrs. George Stroup, Solvay, N. Y.

**Pennsylvania VACUUM CUP CORD TIRES**

"Know them by the Jet Black Tread!"

WHEN you buy these remarkably long-lasting casings, you simply pay a reasonable price for unusual quality—the guaranteed non-skid effectiveness of the Vacuum Cup tread on wet, slippery pavements costs you nothing.  
You get everything you can get in a tire—wear-resistance, trouble freedom, attractiveness, riding ease, and thorough satisfaction.  
We would be pleased to have you come in and inspect them.

**AUTO OWNERS NOTICE THE REMARKABLE MILACE MADE ON PENNSYLVANIA VACUUM TIRES—**

- F. W. Christensen, Tillamook Cheese Inspector, over 10,000 miles on a Fabric.
- Blaine Hays 11,000 miles on a Maxwell car.
- J. M. Maddox, Rockaway stage line Pennsylvania Cord has worn out two other cords with good prospects of out wearing the third.

Come in and examine this wonderful tire. It costs less than any other Standard make.
