**REMOVING TONSILS AND ADENOIDS**  
with the knife used to be the only method in general use. Today hundreds of thousands of people know that adenoids and diseased tonsils are the result of a cause. They know too that by removing that cause the adenoids and diseased condition of the tonsils disappear in a natural way—and the result is a lasting one. **Chiropractic for Adenoids and Tonsils** is the safe and sane way. The Chiropractor, by palpation, finds the subluxated vertebrae impinging the nerves that supply the vital force to the diseased parts. By a movement of the bare hands only he adjusts these vertebrae, releases the pressure, and nature is given a chance to send to the affected parts their full quota of vital force or mental impulses. Health results.

See your chiropractor. Have him explain fully how Chiropractic makes it possible for nature to restore perfect health to diseased parts of the body. Consultation and spinal analysis free.
