OUR COUNTY THERE

Low Snider's herd of pure bred Holstein cows was honor pure herd in the state, for October, according to reports of the cow testing association records for the state, as reported by the dairy department of the Oregon Agricultural College. The average production of Mr. Snider's herd was 934 pounds of milk and 37.1 pounds of butter fat.

The honor pure bred cow for the state association was Evangeline, owned by Louis Weber of Tillamook county with a production of 1584 pounds of milk containing 80.75 pounds of butter fat. The honor grade cow was Daisy, owned by Dave Fitzpatrick, of Tillamook, producing 1172 pounds of milk containing 85.97 pounds of butter fat.

Mr. Snider's record is remarkable in that it is not a cow or two that is making high production but the entire herd was above the average, which is a fact that counts most in dairy production.

Schools

Last Friday the V. H. S. football team went to Scappoose by stage and took at 41 to 0 defeat on their gridiron. Scappoose has the heaviest team we have met and consequently handed us the worst score of the season.

Our boys were helpless under the onslaught of the Scappoose 180 lbs. backfield men who are all old hands at football. Their quarterback, who has had much more experience than the average high school player, ran his team with a series of irresistible line plunges for touchdown after touchdown.

After the game our coach, Mr. Austin, expressed relief that "his boys" were still in whole pieces with only minor bruises. The fellows will all have to start putting on weight to overcome the 30 pounds per man handicap as we expect to whip Scappoose next year. There was some discussion as to the advisability of meeting such a team this year but it has proved a valuable experience. Practice was resumed Monday as we meet Clatskanie at Clatskanie on Thanksgiving Day. The Clatskanie team is the nearest one to ours for lightness so if our boys play the same brand of football they used in the 0-0 Knappa game the contest is "cinched".

The first car load of pyrotol, the government stumping powder, for Columbia county containing 23,000 pounds was delivered at St. Helens on Monday of this week, which is being distributed by Geo. A. Nelson County Agent. This powder will be distributed to about 75 farmers in the county, who had placed their orders for the same. These farmers are located in practically every community in the county.

Mr. Nelson also states that orders are being taken for a second car load, but so far have not received enough to make up the full car of 20,000 pounds but he expects enough orders will probably be received by the first week in December, to complete the second car load order for the county.

AMERICAN IDEALS GIFT TO NEAR EAST

"I have always been interested in Near East Relief," stated a prominent social worker of Portland a few days ago, "but, until the last few months the whole thing seemed so hopeless it seemed to be just one dreary round of massacre and sorrow over and over again.

"I am sending a larger check this year for now that the children are out of Turkey and there is no more danger of massacre it seems to me we have the big chance for which we have been looking for these many years. It seems too good to be true that the massacres are ended but such is the case."

"Another thing that encourages me is the great constructive program which the relief agency is carrying out and where methods of education, hygiene and industry have replaced relief methods. This I understand is true of the larger part of the Near East program although much relief work is still necessary in the pitiful camps in Greece and Syria where thousands of children are still homeless and many will die this winter unless help is given."

"The going to the Near East of men like Dr. Paul Monroe of the Teachers College of New York and a nationally known authority on education, and Dr. R. R. Reeder, equally well known who with Dr. James I. Vance formerly moderator of the Presbyterian Church and the carrying out of their suggestions for the training of these children may mean much for the future welfare of that stricken country."

"I give money now to the Near East Relief just as I give it to a college or any other character forming organization in this country expecting my reward in knowing that boys and girls are being trained for successful lives in their own countries. One hundred thousand children going out through the Near East to carry American ideals of life and culture will be one of the greatest contributions that any people could possibly make to a war stricken land."

Mrs. S. C. Smith at the Moonlight apartments dined with her husband in Portland on Sunday of last week.

CHINA SHIPS MILLIONS OF EGGS TO U.S. EVEN WITH GREAT INCREASES IN OUR OWN EGG PRODUCTION AND A TARIFF WALL. IMPORTATIONS ARE HEAVY.

Chinese hens are laying millions of dozens of eggs to be beaten into American cakes and candies, in spite of the increased height of the tariff wall. Enough Chinese eggs are coming into the United States annually to furnish approximately one dozen for every family. But the Chinese hen does not compete with the American hen in supplying the eggs for the breakfast table. Of the 23,710,000 dozen coming in last year practically all were in the dried or frozen form, according to the Sears-Roebuck Agricultural Foundation.

The American hen cannot be accused of loafing on the job. In addition to furnishing all the eggs needed for American use, she produces a huge surplus for export. Last year this surplus amounted to 30,000,000 dozen—8,200,000 dozen more than were imported. The American exports were largely eggs in the shell, which sell at higher prices than the frozen and dried eggs from China.

In 1914, just a decade ago, there were 19,000,000 dozen Chinese eggs imported. By 1918 the imports totaled 52,400,000 dozen, and in 1920 the number had climbed to 71,400,000 dozen. In 1922, the year the tariff went into effect, only 25,827,000 dozen were imported. Last year the number was still further reduced, with only 23,710,000 dozen coming in.

Present prices are not especially attractive to imports. The demand is for strictly high quality eggs, the production of which for the home markets the American hen monopolizes.
