

THANKS IN RESOLUTIONS

At a regular meeting of John Bucher Post, No. 70, G. A. R., held June 20, 1925, being the first regular meeting of said post after Memorial Day, the following resolution was unanimously adopted:

Resolved, that the thanks of this post is due and are hereby extended first: to the W. R. C., for their untiring efforts to make Memorial Sunday and Memorial day, days of pleasure and patriotic inspiration. second, to the S. of V's for this services so freely given in purchasing flags and decorating the graves of deceased comrades. third, to the American Legion, led by Commander Carlin, in conducting the parade and otherwise rendering invaluable assistance in the exercises. fourth, to the teachers of the public schools for their patriotic work in preparing and supervising the children in the parade, especial mention of which is made to the beautiful flag salute, fifth, to the two old comrades who, in spite of their more than 80 years made the journey from Portland to Vernonia and delivered two of most inspiring addresses ever heard on a similar occasion in Vernonia. Last but not the least, to the patriotic citizens of Vernonia and surrounding country for their attendance and patriotic co-operation in all of these exercises, making this the best memorial service ever held in Vernonia.

Resolved further: that a copy of these resolutions be sent to the Vernonia Eagle for publication.

CARD OF THANKS

I take this means of sincerely thanking the many Vernonia neighbors and friends for their kind acts and words of sympathy extended at the bereaved time, from the passing away of a wife and mother. My hearty thanks to all.—C. H. Brown. Mrs. Leslie Grimm.

APPRECIATION

I, Sara A. Spencer, wish to thank Mr. Crapper and others in assisting me in selling votes to win the queen and also those whom so liberally cast their votes to win. I assume their money will be spent for a good cause.

FARM POINTERS

The stand of clover obtained on the experiment station fields has been improved 50 per cent by the use of lime on poor land. Through a drouth, lime especially helps the young clover and grass to survive successfully.

Rotations with legume is necessary to keep up the nitrogen and humus supply of soils for general farming, says the experiment station. Where legumes fail, due to soil acidity, the use of lime becomes essential to the establishment of a permanent system of soil management. Ground limestone added to the acid soils of the station lands near Corvallis react with the soil acids and overcome the sourness of the soils.

Corn silage, free from mold and made from fairly mature corn, is unexcelled in Oregon as a cheap winter ration for horses, says the experiment station.

A stunted yearling generally means a stunted mature horse, reports the experiment station. A growthy yearling does not require the feed and care afterward that a stunted one does.

Cottonseed meal sharpens the appetites of fattening animals, causing them to eat more and make greater gains.

Anthrax disease of goose berries is indicated by the presence of many small dark spots on the leaves that often cause the leaves to drop. Bordeaux applied in 4-4-50 strength thoroughly to both surfaces of the leaves is the remedy found effective by the Oregon experiment station. Directions for making and using the spray may be had on application to the agricultural college at Corvallis.

Red sorrel thrives in Oregon on acid soil—clover won't, the experiment station finds. The heavier and sourer the soil becomes, the better the crop of sorrel, and the more evident the need of lime.

Martin L. Davey

Congressman Martin L. Davey of Ohio has offered a \$4,000 scholarship in any Ohio college or university to the Ohio high school boy or girl who writes the best essay of 500 words on forest conservation. The essay contest was announced by the Ohio Federation of Women's Clubs and that organization, with a membership of 300,000 women, will have charge of it. It will be open to all students in the state and will end January 1, 1926.

Taking of Photograph Once Tedious Process

In the first attempts to make a photograph in the early part of the eighteenth century, the subject to be photographed sat between the source of light and a sheet of sensitized paper fastened on a board. His shadow blocked off a certain proportion of the light rays, and as a result his profile in silhouette was left on the paper. This image, however, faded in a few minutes.

Even as late as 50 years ago, taking a single picture was often a day's work, and required such skill and expert knowledge and such elaborate, costly, and cumbersome equipment that the few who had mastered the art were glad to capitalize their knowledge by utilizing it professionally.

The earliest sunlight picture of a human face is supposed to be a daguerrotype of Miss Dorothy Draper, and was taken by her brother, Professor Draper, in 1840. The subject had to sit motionless in bright sunlight for almost six minutes.

To Withstand Cold

The tiny needles of evergreens have a different appearance in winter and are darker and more shriveled. The chlorophyll granules have withdrawn from the surface as far as possible, and the water content is greatly reduced, says Nature Magazine of Washington. In this condition the alternate freezing and thawing of winter days seem to do no harm, and the leaves are ready in the spring to resume their work of starch making. But even evergreen needles do not live long. They die and drop as new ones come, and the average tree has its needles replaced in from three to five years. So gradual is this process, however, that the tree always appears to be well clothed.

Model Lover a Bricklayer

Common brick has always played an important part in the building industries throughout the world. Volumes have been written on the history and uses to which bricks have been put, but not on their romance, says the New York Herald-Tribune.

In the Italian city of Bologna there remain two towers of brick, sole survivors of approximately 180 similar ones said to have been erected between the Tenth and Thirteenth centuries. Legends say it was the custom to knights to win their ladies fair by erecting brick towers, taller than the one constructed by rivals.

No Change in Status

A man ran away with the wife of a neighbor. The local clergyman called upon the deserted husband to attempt to console him, but the man seemed singularly cheerful considering the nature of his loss.

"It's too bad; too bad!" said the clergyman. "I understand that the man who persuaded your wife to elope with him was your best friend."

The husband smiled. "Yes," he said, "he was—and he is!"

Subscribe for the Vernonia Eagle

Yes, says an exchange, the average editor lives a quiet life mid peace and plenty.

Had it ever occurred to you—

That the more he labors to uplift his community, the more are his motives questioned?

That if he takes a hand in local politics he is accused of being crooked?

That if he does not, he is accused of being a coward?

That if he advocates public improvements, he is condemned and his motives are under suspicion?

That if he stands for law and order, he is charged with trucking to preachers?

That if he takes a stand for prohibition, he is denounced as a fanatic?

That if he advocates light wines and beer, he is branded as a drunk on sot?

That if he roasts the mail order house, he is told to mind his own business, that the people have a right to buy where they please?

That if he prints mail order advertisements, the merchants land on him with both feet.

That if he tries to discuss fairly the merits of public utility corpora-

tions, he is accused of being owned by them?

That the life of the average editor is made exceedingly pleasant?

That if the people would only realize the truth, they would boost the editors.

That they are the greatest community leaders we have?

That the growth of your city means your success?

That you need him as much as he needs you?

That without him your community would soon be numbered among the dear departed?
