### THIS MONKEY BUSINESS

I maintain that we haven't "evolved"—and we still ARE monkeys. Ever since the time EVE fed ADAM the apple, women have been making monkeys of men. Darwin had the dope, but his research was not scientific enough. Instead of trying to prove his theory by studying the lives and habits of monkeys he should have studied the lives and habits of chorus girls. One night of research work among the bright lights of Broadway, would offer more convincing proof of the fact, that men are monkeys, than years of research among the jungles of America—and it's a darn sight more pleasant.—Carthage Nairator.

### SO DO WE ALL.

The following advertisement was seen recently in a magazine.

Perfection of Movement

Waitress—"Boiled tongue, fried liver, stewed kidneys?"  
Doc Hughes—"Never mind your symptoms; let's have something to eat!"

"Glaring headlights don't bother me when driving at night," boasts Bill Dougherty, "I've got a dirty windshield."

### WHAT HAPPENED THEN?

Husband—"This tomato soup tastes just like that my mother used to make."

Wife—"I'm glad to hear it. You have never said before that anything of mine was as good as your mothers She was a fine cook, I suppose?"

H.—"Yes. There was only one thing she couldn't make properly."

W.—"What was that?"  
H.—"Tomato soup."

### A SECOND HAND.

A woman from the country dropped into a Vernonia emporium and inquired:

"Is this the second-hand store?"

"Yessum," said John.  
"Well," said the lady, "I want one for my watch."

### A SEARCHING EXAMINATION.

The minister was loud in his praise of the fat and juicy bird his colored host served for dinner, and

finally he asked: "Where did you get such a fine goose as that?"  
"Pahson," replied the host, "when you preaches a good sermon ah don't ax you whar you got it. Ah hopes you'll have de same consideration for me."

The cord from the fabric mills is first delivered to a separate plant where it is treated in a solution of gum, which insulates every fiber of every cord. This protects against internal friction and heat, giving the sidewalls greater flexibility and additional strength.
