

**New England Atmosphere
With 1926 Improvements**

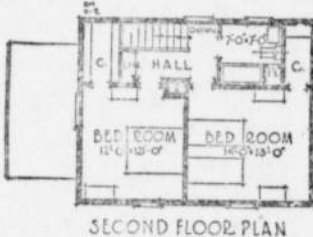

ANY one who has ever motored through the quiet sleepy towns of New England has fallen in love with the small houses that abound in that section of the country—neat, white, unpretentious and with a touch of reserve about them. Just such a house is the one pictured here. It is equally adaptable for town or country, and by merely shifting the living and entrance porches around can be built on a wide or narrow lot without spoiling its architectural character.

The house is sturdily built and has an exterior of wood siding except for the unusual stucco panels that start at the level of the second floor windows. The roof is of stained shingles, preferably moss green, in keeping with the window shutters. A house of this compact style is very easy to heat, especially when the specifications call for insulation throughout with celotex, which prevents heat leakage, and keeps the house cool in the summer.

The living and dining rooms are here combined into one large room flooded with light by windows on three sides. The two bedrooms on the second floor each have double exposure and an extra large closet in which a window may be placed.

each grain swells and becomes separate.

Milk Stains.

In removing milk stains use cold or lukewarm water first, sponging carefully if the garment cannot be laundered. This removes the protein, which hot water coagulates and sets. Afterwards follow with hot water and soap on washable materials, or with chloroform, gasoline, carbon tetrachloride or some other grease solvent if laundering would injure the fabric.

Tarnish.

Tarnish on silver can be removed by the electrolytic method. Various commercial devices for this can be bought for use at home, or it can be done in the following way: Fill an enameled or agate-wear kettle partly full of water in which has been dissolved one teaspoon of either washing soda or baking soda and one teaspoon of salt to each quart of water, heat this solution to the boiling point, put in strips of aluminum or bright zinc, add the tarnished silver and boil it. The silver must be covered completely by the water and each piece must be in contact with the aluminum or zinc, either directly or through other silver. When the tarnish has disappeared, the silver should be removed from the kettle, washed and dried with a clean, soft cloth.

THE LEGION "BULL"

Important.

Now that our officers for the year have been installed, new rules and regulations naturally come about, along with Commander McGraw, etc.

Read admittance rules carefully. They are thusly: Leave home in good time to be there early and when within 10 feet of the Legion hall door approach it cautiously and give four raps with the toe of the shoe. The sergeant-at-arms will bellow "Deo sa yaga." (That means, "Who goes there.") You will answer, "La Siba soba de yo." If in return he sticks his head out of the door and yells "Hodde domme heatro" before you can kick him in the shins you will jump off the porch, run back up the steps as fast as you can and then be admitted. Above all be quick. After getting in you are safe.

Once upon a time there was a Scotchman found very much exhausted in front of a weight pulling machine. When he was at last revived and asked how he put himself into such an exhausted condition he could but point to a sign above the machine which read, "Pull hard enough and you get your penny back."

A newspaper item the other day read that a senator in a speech to be put in the Congressional Record, stated that \$70,000,000 appropriated to the veterans bureau to carry out their work, was recently returned to the treasury, while thousands of disabled veterans were dependent upon their relatives and others because they have become discouraged and sickened at the long procedure in fighting their claims. According to the attitudes of the employees of the bureau it might be a good idea to raise their pay with some of that money. It seems as though they all get a chance to talk to a fellow as they pass the buck to one another so you can make the rounds. It gives them prestige too.

The post is sponsoring a picture to be shown at the Majestic theatre Tuesday. "The Unknown Soldier," January 11. Adjutant Schwab will let us know all about it soon. His special press dispatches will circle the entire country.

Adjutant's son going down town with his mother and spying pop bottle in window: "Mama, I want that bottle."

Adjutant's wife: "Hush, just like your father, always wanted a bottle."

One of our comrades after returning from Portland the other day made this remark: "It used to be courtesy to let a girl get on a street car first. Now it's a treat."

We have been asked so many times for an x-ray picture of the mind of our distinguished Comrade Carkin. Comrade Carkin carries so many degrees after his name that there is not an envelope made that will give enough space for them. The x-ray is printed below.

Pasteurizing.

Milk and cream for ordinary use or milk for babies may be successfully pasteurized at home. The process is not difficult and requires only simple equipment. Farmer's Bulletin 1359 entitled "Milk and Its Uses in the Home" gives a full description of the method and equipment.

Plain Work

Do you plan your day's work, allotting a certain amount of time to each task? Try it, always aiming to shorten the time spent on routine activities so to gain more

for pleasant occupations.

Best Rice.

Boil rice in a large quantity of water until tender, then pour it into a colander or sieve to drain. Cover with a clean cloth and put it in a warm oven or over a vessel of hot water. As it steams

**We Must
Work Together**

EVERY thoughtful citizen of this community is interested in its development and progress. There's no question about that! We all want our children to enjoy better homes, better schools, better parks—more agreeable surroundings and greater comforts.

We all want our town to keep step with its neighbors, to take the lead in civic affairs. So there is only one sound plan for us to follow:

We must work together to increase the wealth of this community by doing everything we can to encourage local business.

When you and your family patronize our advertisers—the stores and banks of our town—and keep your money in circulation right here at home, there is no power on earth that can prevent our progress.
