

Here's an easily made winter jam: Soak 1 pound of drifted apricots overnight in 1 pint of water. In the morning, chop them and add 1 cup of sugar. Drain the slices of pineapple from two No. 3 cans, cut them into very small pieces, and cook with 2-2/3 cups of sugar

for 20 minutes. Add the apricots and cook for 2, minutes. Watch while cooking as the mixture scorches easily. Seal while hot in sterilized jars.
During 1926, forest service built 53 miles road and 176 miles trail in Whitman forest.

Effort to Unite Nation's Tourist Activities Begun

Travel experts from everywhere are making every effort to distribute this year's billion dollar tourist melon among vacation and scenic centers of the United States instead of growing the "money melon" for European consumption!

To make this possible the American Travel Development association will meet in Chicago, March 21, 23 to launch a movement calling upon congress to create a \$5,000,000 advertising and publicity fund for "selling America to Americans, according to present plans.

The travel experts, as officers of the association, believe that congress should be as much concerned in Americans making use of their own national parks, forests and other playgrounds as that august body is in the welfare of travel abroad through the United States shipping board.

The meeting will be the first concerted effort to unite the nation's tourist activities in the recognition of only one competitor in the travel business, namely, Europe. The American Travel Development association is composed of organizations not operating for profit but interested in encouraging travel in America, and any community which raises an advertising fund for tourist trade is eligible to representation in the association.

Leaders in the campaign are Harry N. Burhans, president of the American Travel Development association and secretary of the Denver Tourist bureau; Charles F. Hatfield, secretary of the association and general manager of the St. Louis convention, Publicity and Tourist bureau, and H. J. Gray, treasurer of the association and secretary of the Michigan Tourist and Resort association.

No increase will be demanded for national forest grazing fees, this year.

The SAVAGE WASHER & DRYER

Not another in the world like it

The Savage Washer & Dryer is the only electric washer in the world in which you can maintain just the proper amount, purity, and temperature of the water in the tank.

It is the only one that fills and empties through its own hose (regular equipment).

It is the only one that washes, blues, rinses and dries an entire load (7 double sheets) in 18 minutes—or less.

It is the only one that rinses and dries in one simple operation—without wringing or breaking buttons.

It is the only one with the wonderful innovation "Spin-Rinse, Spin-Dry" which keeps your hands out of the water, makes pails and "set" tubs unnecessary.

Without any obligation have us give you the FREE HOME TEST of the famous "Savage" Washer innovation:—

The Savage empties by means of its own ejector pump—at the touch of a toe!

The Savage fills direct from the faucet through its own hose

Says School Athletics Should be Supported

University of Oregon, Eugene, Ore. Feb. 14—Competitive athletics between colleges should be fostered; there should be no commercialism or professionalism, and all athletics should be under strict faculty control, declared Captain John J. McEwan, head football coach, in an interview today.

"I pity the book-loving student who spends four years in a university without any physical development," McEwan said. "The men on our athletic teams are not the ones who need physical development.

"Athletics should be developed because they create an interest in the sport, they foster institutional rivalry, they are inspirational, they advertise the college, they arouse college spirit, which may be narrow-mindedness but so is patriotism, love for one's mother, and love for a wife."

McEwan is at present interested in watching the development of the athletic problem at Reed college, which he characterized as "a fine little college without intercollegiate athletics."

Find Tree Stump in Process of Petrification

Bethany, Mo.—Workmen with a railroad construction crew from St. Joseph, working on the Burlington railroad right of way near this city, unearthed a red oak stump in the process of petrification. The stump, which measured about two and one-half feet through, is believed to have been buried in the fill for almost fifty years, or ever since the railroad was built. Its removal required four days. It showed no signs of decay and was so tough it could not be split with an ax.

Flowers—Fresh from your own garden

A FLOWER garden is the cheapest and easiest-to-make yard decoration you can provide and it is also one of the most enjoyable. Garden annuals will grow in any fairly good soil if in a location where there is sunshine the greater part of the day.

By a little planning of varieties you can have blooms from early summer to late in the fall—and be sure to choose some for cutting, such as cosmos, calendulas, zinnias, sweet peas, nasturtiums, pinks, petunias, asters, etc.

Plant seeds which have a good reputation for producing flowers in profusion and true to type. Northrup, King & Co's Seeds have been giving satisfaction since 1884 and no better seeds are sold at any price.
