County Nurse to Hold Free Clinic

Free Examinations of Children
Friday and Saturday

To Be in Brown Building

Free Matinee Movie in Majestic
Theatre For Women on Friday
at 3:30 P. M.

Miss Nina H. Little of St. Helens, county Red Cross nurse has announced that there will be a free clinic for children under school age conducted in the Brown building Friday and Saturday, July 8 and 9, from 9 to 11 a. m. and 1 to 4 p. m. each day. The children will be given a physical examination by local physicians and while it is the desire to reach the children who are to enter school this fall, all ages will be admitted. Special invitations have been sent to the mothers of the pre-school age group, according to Miss Little, but as it is impossible to obtain all names, everyone will be welcome. Miss Little will conduct the clinic, assisted by local women.

Free Matinee For Women

Through the courtesy of J. H. Bush, a free matinee for women will be given Friday, July 8, at 3:30 p. m. in the Majestic theatre. Special films have been obtained from the extension division of the Oregon Agricultural college on "Old and New Ways of Treating Diphtheria and Value of Annual Physical Examination." Another film on maternity entitled "Well Born" from the childrens bureau of Washington, D. C., will be shown.

Miss Little states that she hopes many will take advantage of seeing these educational pictures. This matinee is given in connection with the childrens free clinic.

Union Pacific Gives Northwest's Attractions

In a recently issued folder published by the Union Pacific system, the scenic beauties and industrial opportunities of the Pacific northwest are attractively set forth. The folder, entitled "Outings in the Pacific Northwest," has been distributed widely throughout the east. It describes Portland and the Columbia River highway, Mount Hood, Mount Rainier, Mount St. Helens, Mount Jefferson and Mount Adams. Some attention is given to the history of the Oregon and Washington country. The wonderful scenic drives such as the Mount Hood Loop and Columbia River highway are given ample attention; the Wallowa lake wonderland and the skyline trail to Crater lake are also described.

The beach resorts of the northwest, North beach, Clatsop beach, Tillamook and Newport beaches and all others are not neglected in the new folder; nor are the cities of Seattle, Tacoma, Astoria, Olympia, Spokane, Vancouver and Victoria. Rainier national park is illustrated with some remarkably fine new photographs.

Bennett-Lindsay

Another Vernonia romance blossomed into wedding bells Saturday when Miss Lucile A. Bennett, 18, became the bride of Clarence Lindsay, 21, in Portland. The bride wore a tan silk wedding dress and carried a bouquet of yellow rosebuds.

Mr. Lindsay is a graduate of the Benson Polytechnic institute of Portland and is now employed in his father's mill in Vernonia.

Mrs. Lindsay is a daughter of Mr. and Mrs. T. Bennett and Mr. Lindsay a son of Mr. and Mrs. Wm. Lindsay. They returned to Vernonia after a short honeymoon spent in Portland, and are now living in a small house on State street.

Mrs. Lindsay is a graduate of Astoria high school. For the past several months she has been secretary of the Vernonia Credit association and a stenographer in the office of the chamber of commerce. She plans to continue her present duties.

Lester Collins was a Portland visitor last week.

Mrs. D. B. Reasoner Dies Suddenly in Hillsboro

The many Vernonia friends of Mrs. D. B. Reasoner, were grieved Tuesday morning to learn of her sudden death in Hillsboro at the home of her daughter, Mrs. F. L. Beach, where Mr. and Mrs. Reasoner were visiting at 7:30 p. m. July 4. Heart trouble was given as the cause of death.

A number of local folk plan to attend the funeral which will be held at the Limber undertaking parlors in Hillsboro this afternoon at 2 p. m. Interment will be in the Presbyterian cemetery near Scotch church at Tualatin Plains. Julia Janeway was born March 31, 1862, at Kellogg, Iowa. She was the daughter of Mr. and Mrs. Benjamin Janeway. She became the bride of D. B. Reasoner March 6, 1881. For the past several years Mr. and Mrs. Reasoner have lived in Vernonia where Mr. Reasoner is city recorder. Previous to that they resided in Hillsboro, where they still have many friends.

Beside her husband, one son and two daughters survive: Ray Reasoner of Gold Hill, Oregon; Mrs. F. L. Beach of North Plains, Oregon, and Mrs. Ina Bowman of Hillsboro.

Electric brooders have been found satisfactory if operated properly. It costs usually more than oil for brooding but eliminates most of the labor and fire hazard. Results of the use of electricity for increased egg production and for breeding have been published by the state college experiment station poultry department.

Mrs. M. Lane called on Mrs. M. C. Dent Tuesday of last week.

Visitors See New Crops At Experiment Station

(By Geo. A. Nelson)
The annual Columbia county excursion to the John Jacob Astor experiment station at Astoria, was conducted June 25 with about 30 people from the county. The caravan arrived at the station at about 10:30 a. m., where they were shown around by Albert Engebretsen, director of the station. Mr. Engebretsen explained to the visiting farmers that the station is carrying on work adapted to the coast section of the state, which includes part of Columbia county.

The first visit was made to the variety plots of vetch and oats, which included common vetch, Hungarian vetch, woolley podded vetch, Tangier peas, and Hungarian peas. The common and Hungarian vetches are the outstanding varieties of vetches, while the Hungarian peas, which are a new variety that have proved quite successful at the station. Austrian peas produce well and stand considerable freezing weather and make a very good yield of soiling crop or hay. The next trials that were shown were the rate of planting, which was of oats and vetch. The amount of oats and vetch that have proved the best combination was of 50 pounds of oats and 60 pounds of vetch per acre, and 60 pounds of oats and 60 pounds of vetch per acre.

Other plots visited were those showing the comparison of fall plantings and spring plantings and it showed that the fall plantings gave much better yields than the spring plantings. We then visited the fertility plots which has been carried on since 1919 in 4 year rotation showing oats, vetches, clovers and root crops.

Variety combinations of fertilizer used were barnyard manure, lime, superphosphate, nitrate of soda and sulfur. There were three check plots in which no fertilizers were used. The total returns from the check plots in 4 years were shown by Mr. Engebretsen to be from about fifty to fifty-four dollars. Combinations of lime, manure and potash gave returns of around 140 to 154 dollars per acre over the cost of the fertilizer during the 4 year period.

The pasture visited was where a number of grasses and clovers were being tried out in mixture as a pasture crop, which included Ladino clover, which was imported from the Po valley in Italy, and two species of Lotus imported from Australia. The ladino clover which has been grown for the last 7 years has proved a valuable pasture grass in that it is early, produces well, continues throughout the season and is very palatable to stock. The Ladino clover was originally seed-

Boys and Girls Club Summer School in Corvallis Proves Popular

Betty Bennett of Vernonia Won a Gold Star in Swimming; Good Instructions Given Boys and Girls.

(By Elizabeth Murray)
Saturday evening June 25, the Columbia county delegation returned from the two weeks trip to the boys and girls club summer school held in Corvallis. They all report a fine time. Those attending were Elizabeth Powers and Mary Jane Hazen from Scappoose, Mary Ellen Turley of Warren, Clotilda Pierce and Irene Wilburn of Fern Hill, Betty Bennett, Joy Bush and Margaret McDonald from Vernonia, Merle Lloyd and Duncan McPherson, John Welch, Robert Russell, and Charles Stewart from Deer Island; also Miss Alice Eaton of Vernonia and Miss Elizabeth Murray, county school superintendent, attended. This is the largest representation that Columbia county ever has had. We hope to have more communities represented next year. There were about 600 club members and chaperons in attendance.

Wednesday and Thursday nights were given over to stunts put on by the various counties, which were judged originality, state presence of actors and sequence of events with club work as a basis. Prizes were awarded as follows. First Lane county; second Columbia county; third, Jackson county, with Marion, Tillamook and Multnomah receiving honorable mention.

In athletics all the boys were members of the champion teams. Betty Bennett won a gold star in swimming, performing 15 different water feats and won third place treading water.

After the boys and girls arrived at Corvallis, the boys registered at the Cauthorn Hall and girls at Waldo Hall. They were then divided in groups of 25 according to their ages and whether they preferred sewing or cooking as a major project. A leader was placed in charge of each group who checked the attendance at each of the classes, so it was always an easy matter to ascertain their whereabouts, anytime during the day.

Classes were conducted by the regular O. A. C. instructors and representatives of standard companies. The daily program carried out during the two weeks as follows: 6:45 Rising bell, 7:15 breakfast, 8:45 to 11:50 regular classwork, 11:50 dinner, 1:30 general assembly (singing, speeches, stunts, etc.) 3:00 5:00 (swimming, tennis, volleyball, floor work, dancing, etc.) 6:00 supper, 7:30 movie, dance, or party, 10:00 lights out, everybody asleep.

O. A. C. extension service spared no time or expense for the enjoyment of those present and judging from the response of the children it was well worth the untiring effort of those in charge.

ed in a mixture with other grasses, but it has continued to establish itself over the plot on which it was first seeded. The Lotus is a late pasture crop, but does not give any great promise so far.

Other important forage crops that are being tried out are the root crops, of which they have about 48 different varieties planted. The crop which has so far proved itself best adapted at the station for yields and production of milk are the turnips of which the Pomeran white globe and the imperial green globe have proved the best varieties.

The handling of a dairy herd so as to maintain herd production was discussed by Mr. Engebretsen and he explained that the system of soiling crops raised on the station was a big help in maintaining the production of the cows during the summer months. Cows that had only pasture, would decline in production in dry months from 35 to 50 percent, while those fed soiling crops only lost about half this amount.

We were also shown the concrete manure pit, which is used at the station for conserving the manure so as to prevent losses from leeching so that it would have a greater amount of fertility returns, which is a big factor in maintaining profitable production.

The basket dinner was enjoyed by all during the noon hour.

All Stars Win Baseball Game Independence Day At Jewell 18 to 4

The Score Was Tied 4 to 4 at the End of the Sixth Inning; All Stars Scored 12 During Seventh.

The Vernonia All Stars defeated the Jewell team by a score of 18 to 4 on the Jewell diamond July 4. The Vernonia sluggers seemed to have their batting eye as every man connected with from one to four hits. Kotula led the attack with a double and three singles. The game was a snappy affair the first innings, the score being 4 to 4, but in the seventh Jewell blew up with a bang and when the smoke cleared Vernonia had crossed the plate 12 times. Then for good measure Vernonia added two more scores in the ninth. After the fourth inning McGregor tightened up and, aided by airtight support, held the Jewell batters helpless.

Vernonia will play St. Helens on the local field Sunday. From all reports St. Helens is determined to avenge the 8 to 4 lacing which Vernonia handed them recently. This promises to be one of the best games of the season and all the local fans are asked to come out and help Vernonia win.

Summary: Three base hits, McGregor; two base hits, Kotula, Nance, Scales; Sacrifices, Nance, McGregor; double plays, Scales; base on balls, off McGregor, 2, off Larson 3; struck out by McGregor 6, by Larson 3; hit by pitcher, by McGregor, Tweedle; by Larson, Gordon; by Scales, Welch; stolen bases, Gordon, Kotula, McGregor, Scales; wild pitch McGregor; passed balls, Graven 2. Umpires, C. Nance, Cardiff, Teederman.

Teddy Leavitt Returns

Rev. Teddy Leavitt, will fill the pulpit of the Christian church Sunday, July 10, to continue in the pastorate for the next year. A double reception will be held in the social rooms of the church to-night in honor of Rev. O. L. Curtis, the retiring pastor, and Rev. Leavitt, at 7:00 p. m.

Chamber of Commerce Meets Today

The Chamber of Commerce will meet in the Horseshoe cafe at noon today, according to President R. M. Aldrich. Discussion will be continued on the cemetery question, and it is expected that the subject of aid to the Vernonia fire department will be discussed.

Miss Drusilla Franz of Portland is visiting Miss Virgie Ucie.

Home Made Fly Spray

Dairymen are often interested in a formula for a good home-made fly spray and the following is recommended as an effective one for keeping the flies away from the stock.

- 1 Gallon "Kreso dip."
- 3 gallons light zorelene,
- 1 gallon gasoline,
- 1 pound carbon bisulphide,
- 3 ounces horse mint or any other aromatic compound similar.

Fly Poison

Good fly poison can be mixed according to the following formula: 1 ounce sodium arsenate, 3 quarts corn syrup (Karo) 5 gallons water. Do not use as a spray, as it is very poisonous. Very poisonous; place in shallow pans out of reach of stock as well as dogs and cats.

Tennis Club Membership is Still Open

With the probable prospect of having good weather for the next three months, a group of local tennis enthusiasts met Friday afternoon for the purpose of organizing a tennis club. J. N. Bush was elected president, and Mrs. Fred Brewer secretary-treasurer.

It is proposed to improve the courts at the high school, and for this purpose it was decided to levy enough dues to pay for the improvements. Local interest in tennis has been raised somewhat lately by the announcement of residents on the O.-A. hill that they expect to organize a club there and construct courts. It is likely that tournaments will be arranged later in the summer.

The membership of the club has been kept open for a time. Those wishing to join are asked to communicate with Mrs. Brewer. The courts will be open to the public except during certain afternoon hours, when club members will have preference in playing.

New Plan of High School Credit for Music Study

Music teachers wishing their pupils to receive high school credit are required to make an application for certification for the coming year according to Elizabeth Murray, county school superintendent, under a revised plan recently issued.

The new plan requires that applications be filed with C. A. Howard, superintendent of public instruction, at Salem, Oregon, on or before July 15. Blanks for this purpose are furnished by the state department of education at Salem.

This plan of certification does not invalidate certificates now in force which were issued to private music teachers from the state superintendent under a previous arrangement.

Vernonia Post Office Business Increases

The volume of business in Vernonia is on the increase according to Emil F. Messing, local postmaster, who, upon making out his annual and monthly reports for the post office department, states that the local office has done a greatly increased volume of business for the fiscal year ending June 30, 1927, than during the previous year. He states many persons view the local post office as a good criterion of Vernonia business conditions.

In June, 1927, the money orders issued amounted to \$11,293.69, as compared to \$10,069.13 for June, 1926. The payments totaled \$1380.22 as compared to \$828.18.

For the fiscal year ending June 30, 1927, total money order receipts were \$156,771.31, as compared with \$132,795.16 for the fiscal year ending June 30, 1926. Payments totaled \$13,737.72 as compared to \$14,257.21.

The Eastern Star Social club will hold a picnic at Shesley's grove July 13. All members and visiting sisters are invited to attend. The group will meet at Mac's Pharmacy at 10 a. m., where there will be cars to take all to the picnic.

All members are requested to bring something for the lunch.

Mr. and Mrs. Wm. O. Hall of Boise, Idaho, spent a few days last week visiting his father and mother, Mr. and Mrs. Wilburn Hall. Mr. Hall is state service officer of the American Legion in Idaho.

572 Cows Tested in June

On account of the flood condition on Sauvie Island, only 572 cows were tested in June, according to the report of L. J. Bartholomy, the tester. Their average production was 824 pounds of milk and 33.6 pounds of fat. 134 cows produced over 40 pounds of fat during the month.

For herds of less than 10 cows, Jack Anliker of Goble, was first with an average production of 1141 pounds of milk and 46.2 pounds of fat for 6 registered Holsteins. Fritz Anliker, of Goble, was second with an average production of 1159 pounds of milk and 46.1 pounds of fat for 5 registered Holsteins. A. R. Melis, of Mist, was third with an average production of 1140 pounds of milk and 39.9 pounds of fat for 5 registered and

Milk Ordinance Not Yet Passed

Dairymen Present Find Little Fault With New Requirements

Given First Reading Only

Council Lays Ordinance on Table To Give Dairymen Time to Suggest Improvements

What was expected to have a clash between the city council and local dairymen over the proposed new milk ordinance requiring that retailers and wholesalers of milk in the city be subject to inspection of their barns and milk houses and naming certain tests for the milk, resolved itself into a question of what measures should be taken to protect those dairymen who are selling milk that passes the state requirements from competition against those who are not.

State Inspector Here

State Dairy and Food Inspector J. D. Mickle of Portland was present at the meeting and was instrumental in pointing out the merit of having such an ordinance in every community. He explained that the state department has insufficient inspection force to cover the state more than twice a year, and that his work can be done by the local health officer. Samples of milk would be taken from time to time and sent to the inspector's office for analysis.

"The dairymen should welcome such an ordinance," said Mr. Mickle. "It gives the dairymen some protection against the inroads on their business made by the one-cow dairy, which can never hope to meet the state requirements of cleanliness and is responsible for spreading much disease." Mr. Mickle cited a number of large dairies which have been built up from modest beginnings, but they sold a large volume of milk because of their reputations and this was therefore observing strict cleanliness.

The dairymen asked the council to lay the ordinance on the table until the next meeting, July 18, so they might meet together meanwhile to discuss its provisions and suggest beneficial changes.

The usual grist of monthly bills were passed upon with but little discussion. The council approved the appointment of H. G. Phelps as deputy marshal by the city marshal. In honor of Mrs. D. B. Reasoner, whose funeral will be held today in Hillsboro, the city hall will be closed all afternoon today.

grade Holsteins.

For the herds from 10 to 20 cows, Paul Welter, of Goble, was first with an average production of 1122 pounds of milk and 41.8 pounds of fat for 16 grade Holsteins. J. F. Johnson, of Birkenfeld, was second with an average production of 753 pounds of milk and 37.5 pounds of fat for 11 registered Jerseys. Loren Johnson, of Scappoose, was third with an average production of 1074 pounds of milk and 37.3 pounds of fat for 17 registered and grade Holsteins.

For herds of more than 20 cows Beeson Brothers, of Clatskanie, were first with an average production of 1046 pounds of milk and 46.2 pounds of fat for 28 grade Guernseys and Jerseys. Borlin & Trachsel, of Deer Island, were second with an average production of 934 pounds of milk and 39.1 pounds of fat for 55 grade Holsteins and grade Guernseys. Hammer Brothers, of Deer land, were third with an average production of 1125 pounds of milk and 38.4 pounds of fat for 27 registered Holsteins.

The high pure cow for the month of June was Korndyke Milly, a 5 year old registered Holstein, owned by the Hammer Brothers, of Deer Island. Her record was 1404 pounds of milk and 63.2 pounds of fat.

Nigger, an 8 year old grade Holstein, was high grade cow for the month of June. Her record was 1377 pounds of milk and 73.0 pounds of fat. Her owner is Loren Johnson of Scappoose.
