Eggs and poultry-Egg markets are wavering between the influence of decreasing receipts and good demand on the one hand and heavy storage holding accumulated during the earlier months which are inclined to move out on price bulges. Poultry markets are low with large receipts and storage holding heavy.

NOTICE IS HEREBY GIVEN to the legal voters of Union High School District No. 1 of Columbia county, State of Oregon, that a school meeting of said district will be held at school building, on the 20th day of August, 1927, at 2 o'clock in the afternoon for the purpose of discussing the budget hereinafter set out with the levying board, and to vote on the proposition of levying a special district tax.

The total amount of money needed by the said school district during the fiscal year beginning on June 27, 1927, and ending June 30, 1928, is estimated in the following budget and includes the amounts to be received from the county school fund, state school fund, elementary school furd, special district tax, and all other moneys of the district: Hay-The prospect of a record hay crop has caused prices to ease off somewhat generally although receipts have been running rather light which has been a strengthening factor on the cash markets. Western alfalfa markets are easier than a few weeks ago with trading restricted in the Yakima valley and prices declining in the Sacra mento valley. The tame hay crop s expected to be larger in Oregon Washington and Idaho than last year but not so large in California. The California shortage is mostly in alfalfa and grain hay. Wild hay crops are heavy the country over and pastures excellent. The United States tame hay crop is estimated at 101,000,000 tons compared to 86,000,000 last year and 98,000,000 the previous record made in 1924. The Pacific northwest crop is estimated at 7,-101,000 tons against 6,587,000 tons last year. The California crop 4,325,000 tons this year and 4,984,-000 tons last year.
