

NOTICE OF CALL OF BONDS

Notice is hereby given to the holders of the following bonds of the City of Vernonia, Columbia County Oregon:

Bond No. 2 of Improvement district No. 3, dated May 1 1926, said bond being in denomination of \$500.; Bond No. 1 of Improvement district No. 12, dated May 1, 1926, said bond being in denomination of \$119.65; Bonds No. 1 and 2 of General Obligation Bonds dated May 1, 1926, said bonds being in denomination of \$500.00 each. All of the above bonds being redeemable at the option of said city on Nov. 1 1927. That pursuant to said option, said bonds will be redeemed within 30 days from the date of this notice, to-wit: On the First day of November 1927, upon presentation to the fiscal agency of Oregon in New York City, to-wit: The National Park Bank.

In case the holders of said bonds fail to present same at the time and place mentioned herein for the redemption thereof, then the interest thereon shall cease and the agency aforesaid will thereafter pay only the amount of such bond and the interest accrued thereon up to the said first day of November 1927.

Dated at Vernonia, Oregon, on this 1st day of October, 1927.

J. C. Lindley, Treas.
City of Vernonia, Ore.

WHEN BETTER AUTOMOBILES ARE BUILT . . . BUICK WILL BUILD THEM

You Need Never Change Your Oil if You Own a Buick

Last year Buick said: "Change your oil only four times a year." Buick tests at that time had shown that oil changes would never be necessary, with the Oil Filter to remove impurities, and with the Crankcase Ventilator, Thermostatic Circulation Control and Automatic Heat Control to prevent oil dilution.

Now, more than a year has passed, and Buick owners in every section of the world—under every climatic condition—have also proved that you never need change your oil if you own a Buick—replenishment and inspection of the Buick Oil Filter only are required.

THOMAS GARAGE

Oregon experiment station entomologist. One quart pound of soap is used to one gallon of water. It is best to wash the solution from the plants about two hours after application.

Successful educational work in beekeeping consists of more than talks and demonstrations, says H. A. Scullen of the state college. It includes reading bulletins, journals and books. The greatest benefits come not directly to the student but to his less intelligent neighbor whose ignorance and carelessness make him an unsafe fellow peerman in marketing and disease control.

Sweet cream rather than sour is now generally used for Oregon buttermaking, reports the dairy specialists of the experiment station, whereas a few years ago nearly all butter was churned from sour cream. This change call for delivery of sweet cream by the dairies, an easy task if the right directions are followed. "Once you get the habit of delivering sweet cream you will find it as easy as the old sour cream habit," says the report.

Police Notes

David Jackson, colored, was arrested Saturday night and charged with possession of liquor. He plead guilty before Judge Reasoner Monday and was fined \$75, which he paid.

Lee Wood was found guilty of being intoxicated on a public highway by a jury in Justice of the Peace Hill's court Thursday and was fined \$50.

Several complaints have reached me regarding small boys entering houses, both occupied and unoccupied, and in some cases articles have been taken. There are also several instances where the street lights are broken by shooting air guns and throwing stones at the lights. Parents are responsible for the action of minor children, and it is the duty of every citizen to cooperate and see that this practice is stopped. Arrests will follow if this practice is continued.

W. J. Kelly, City Marshal.

S. O. Tate, Frank Hillsberry and M. Simmons were arrested Saturday night by Marshal Kelly, and charged with possession of liquor. Hillsberry was released on \$25 bail, with his trial set for Saturday. Tate and Simmons were fined \$75 and \$10 respectively by Judge Reasoner on their pleas of guilty Tuesday night.

EVANGELICAL CHURCH

Sunday school meets at 9:45 a.m. Mr. A. C. Kuans sup. The pastor will give a short talk on Holland at the opening of S. S. Sermon subject for 11 a.m. "My Brother's Keeper." Young People's meeting 7 p.m. Mr. Ester Garner gtnder. At 8 p.m. the theme will be, "What Does Personal Acceptance of Jesus Emplify?"

Friday evening 8 p.m. the young people will have their monthly business and social meeting in the social hall of the church. All young people are welcome.

Order your Christmas cards early at the Eagle.

DAIRY FACTS

NO COW THRIVES ON IMAGINATION

Summer losses in milk production are probably the heaviest of the year, and that is so mainly because cows are asked to live too much on their imagination.

"Merely to assume that the cattle will secure enough feed on pasture is not sound," say dairy extension specialists at the Ohio State university. "If the cattle do not seem contented and smilised on coming from pasture, supplemental feeds should be supplied.

"Grain alone at this time is not sufficient, as the cows actually need more roughage.

"Summer silage is one of the best ways to supply this lack of roughage. It gives about the same results as mowed green crops. Besides, it is cheaper and requires less labor, an important item in the summer months.

"If silage is not available it may be possible to mow some grass crop for a time, if no special provision has been made for sowing crops. If neither is available, it is well to use hay to supplement the pasture. Unless the hay is of good quality (well-made legume hay), the cows will eat little of it.

"On many farms where there is not sufficient pasture to satisfy the cows, it may be well to keep the cattle up during part of the day and feed the supplemental feeds at this time. Many successful dairymen follow this practice. This of course keeps the cattle out of the excessive heat and flies of midday, and helps greatly to maintain uniform production."

Profitable to Maintain Fall High Production

In the fall there is always a temptation to slight the milk cows until after the corn shucking is over. As a result the cows slump in their milk flow. This means a smaller milk flow during the winter months. It is more profitable to maintain a high production by avoiding this fall slump in production.

There are two common reasons for a slump at this time of the year. Fall pastures are often not good and corn shucking is so important that the cows are neglected. Sweet clover pasture will often afford fall feed that will stimulate production rather than cause a slump. If no pasture is available it is advisable to open up the silo in order to afford a succulent feed.

If neither silage nor fall pasture is available then the only choice remaining is to increase the amount of concentrated feeds and to provide other roughage. It is not usually advisable to pasture heavy producing milk cows on the cornstalks as they do not furnish the materials needed for high production. Young animals, dry cows, horses and beef animals will make much better use of this class of feed

Legume Hays Important in Feeding Dairy Cows

Legume hays are important in feeding dairy cows on account of the protein, calcium and vitamins which they contain. Most other farm roughages are lacking in all of these essentials. Most of these essentials, except calcium, can be supplied in other types of feed.

There will probably be a shortage of legume hays this year unless the deficiency is made up by increased planting of soy beans. If the weather is not suitable for making soy beans into hay they may be put into the silo in connection with corn and increase the value of the silage.

Dairying without legumes is an uphill battle. Legumes that are grown on the farm will help to keep down the cost of production. A dairymen who fails to plan for a supply of legumes is overlooking an opportunity for profit.

Dairy Notes

The best milk is that which is kept clean, cool, and covered.

Feed yearling heifers two pounds of grain per day while on pasture this summer.

Dairymen who by breeding and feeding make one cow do what two did before are benefactors to the public as well as to themselves.

The general butterfat average of 117 dairies in Omaha, Neb., in March, 1927, according to the report of the city health commissioner, was 3.5 per cent. The legal standard is 3.2 per cent.

An extra month or two of cheap and dependable pasture might save a few dollars a year in the feed bill.

A separator doesn't need to be a whale of a lot out of fix to lose \$50 to \$100 worth of butterfat yearly on just a small herd of four or five or six cows.

Several days before calving, the cow should be placed in a clean stall, which has been disinfected with dip and disinfectant (diluted 1 to 50), and then comfortably bedded.

me of the oil used for lubricating watches, clocks and other delicate instruments is obtained from the head of the porpoise. The best grades of neat's-foot oil are also used similarly.

As checks upon big floods, forestry and its allied forms of natural storage take secondary place. Immediate relief must be sought through the skill of the engineer. But behind and supplementing the leaves or other structures that must be built we get back to the land. And we should not fail to restore, as far as it may be done, the natural storage and protection from erosion that may be derived from fire-free forests and other practical correctives in our everyday use of land.

NOTICE OF BUDGET MEETING

Notice is hereby given that the budget committee of the city of Vernonia, Columbia county, Oregon, a municipal corporation, has filed in the office of the levying board, to-wit: The city council of said city, its detailed estimate of the total amount of receipts, and also the total amount of money proposed to be raised by taxation and expended by said municipal corporation for all purposes for the fiscal year of 1928, which estimates are as follows:

GENERAL FUND		WATER OPERATING FUND	
Administration Expense		Superintendent's salary	\$1,500.00
Repairs and furniture, city hall	\$ 200.00	Water collection	480.00
City dump	250.00	Supplies, maintenance and extra help	2,160.00
Fuel and city hall expense	210.00	Total	\$4,080.00
Accounting	100.00	WATER BOND FUND	
Recorder's office		Sinking fund	\$1,350.00
Salary	1,200.00	Investors Syndicate sinking fund	2,220.00
Supplies	200.00	Interest	3,500.00
Treasurer's office		Total	\$7,070.00
Salary	240.00	SEWER BOND FUND	
Supplies	15.00	Sinking fund	\$1,700.00
Legal expense		Interest	2,400.00
City attorney's salary	600.00	Total	\$4,100.00
Police department		GENERAL BOND FUND	
Salary marshal	1,800.00	Sinking fund	\$600.00
Supplies and jail expense	300.00	Interest	300.00
Fire department	600.00	Total	\$900.00
Health department	125.00	Grand total	\$27,265.00
Street department		Estimated Receipts	
Maintenance and street lighting	1,000.00	From fines and licenses	\$ 2,500.00
Elections	75.00	From water system	11,000.00
Legal publications	50.00	Total	\$13,500.00
Emergency fund	700.00	Balance to be raised by direct tax	\$13,765.00
Payment of outstanding warrants and int.	2,500.00		
Library fund			
Librarian salary	240.00		
Transportation of state books	10.00		
For new books	200.00		
City park fund	500.00		
Total	\$11,115.00		

And notice is hereby given that the said city council of said city, sitting as a levy board, will hold a meeting in the city hall in the city of Vernonia, Columbia county, Oregon, on Monday evening, October 21, 1927, at the hour of 8 o'clock P.M. at which time and place all persons, who shall be subject to such tax levy, when the same shall be made, may appear and be heard in favor of or against said tax levy, or any part thereof.

Dated this October 3, 1927.
