

THE CACTUS FLAT CATAMOUNT

LAURENCE LOCKNEY, Editor

VOLUME 1

NUMBER 27

CATAMOUNT URGES BACK
TO LAND MOVEMENT

With so many of the youth of our fair country pulling up, so to speak stakes, and leaving the old homestead to seek jobs in the wicked cities, it is time that some one take pen in hand and write a scathing editorial which will effectively put a stop to the whole business, and the Catamount editor has decided to girt up his lions and attack this fount of iniquity at its source.

The cities of the country are sapping the vitality of the nation by luring the sturdy farm boys into their vicious midsts. The glare of the white lights are forever urging the young men of good farming ability to leave their several native heaths, where the birds sing and the corn waves, and to take a job driving an ice truck in the cold and cruel city, teeming with myriads of, so to speak, people.

This will never do. The big cities are swelling almost to the bursting point and the rich farming districts are being left to shift for themselves. The brain and the brawn, the sinew and the thw the muscle of the nation is being crushed in the seething jam of the metropolis, while the old plow is left cold and silent in the furrow and the weeds are threatening to take the turnip patch.

The farm needs men. The farm needs all it can get of that sturdy and stalwart band of young men who are willing to forego the soda fountain and the picture show, while they sweat copious gobs of honest perspiration in the wake of a pair of perverse Missouri mules in an effort to bring the production of their crop up to bumper magnitude, and it wants the kind of young men who are willing to sell that crop for less than cost and go to work the next spring on another crop.

CHICAGO PATRIOTS WILL
READ BETTER BOOKS

Wild Bill Mullens writes from Chicago that a five foot shelf of 100 per cent American books will be placed in the public library in that city, but that suitable material is hard to find, as a great many of the books printed today contain words that had their origin in England.

HOLLYWOOD DECLares BAN
ON POPULARITY OF MURDERS

Sycamore Slim writes from the little frontier village of Los Angeles that the citizens of Hollywood are making an effort to change the name of that suburb in a last minute attempt to stop murder and other forms of amusement.

So much charming and whole-

some publicity has been given the little picture place that the citizens are ready to go the limit to keep out of the papers.

Local and Long Distance News
The landscape of Cactus Flat took on more of an artistic aspect this week when Hamp Jiggs raked the gravel at his filling station.

Constable Twist Newton was foiled this week in an attempt to arrest the flight of time.

Hercules Spindleshanks went up to snowline today to freeze a lopper of ice cream.

Archimedes Puck recently lost the thread of a story he was writing for the newspapers, and has offered a liberal reward for its return.

The Rev. Ananias Etherblazer preached another hair-rising sermon last Sunday on "Fundamentalism vs Short Skirts."

Rattlesnake Ike, pioneer bootlegger, has been appointed deputy sheriff, with full authority to protect his establishment from raids.

Advices from Mexico state that one candidate is still left in the race for president, on account of the poor marksmanship of his enemies.

Miss Tootie Tatum made a trip to the drug store in the county seat Monday after another box of that school complexion.

Alf Stude, who recently returned from the city, where he is reputed to have been hitting the high spots is seeking reinstatement in the bosom of his family.

Artie Watson, the boy tenor of Cactus Flat climbed up on a chair today and reached high C.

Scotty Macpherson went over to the tailor shop in the county seat today to have his pants halfsoled.

Centipede Clark, who went to the hospital today with three ribs broken still insists that the right of way was his.

Ham Sutherland of the Devil's Den country, has been making some large talk against Rattlesnake Ike. He will leave a wife and three children.

Another shower fell this week, which would have been welcome last June.

Herb Miller is over in the county seat on a change of venue.

"If consistency were a jewel," said Old Quib Skills today, it would mean one more article to be sold on the installment plan.

Flapjack Flynn of Slapjack Canyon went over to the county seat today to get bids on a haircut.

Lawyer Lilikell tried another case this week, but he said it wasn't as good as the case he emptied last week.

BREAKDOWNS BREAKING
INTO PUBLIC FAVOR

There will be another one of the old time dances over at Mesal Bill's shack Saturday night, at which time the light fantastic will be tripped by all present besides which some of the heavier numbers will be enthusiastically struttin.

The old time dances seem to be gaining in favor once more, and it is with a feeling of pride that the editor of the Catamount and Henry Ford acknowledge the responsibility, full and complete, for having restored them to their proper place in the annals of history, which is being made as we go to press.

It was us and Henry who spent wakeful days and sleepless nights trying to bring the old dances back to the hearts of the people, for neither us nor Henry could cut the mustard in the new dances, and we had to popularize something to which we could shake a rheumatic hoof as well as the best of them.

Henry hired an orchestra to brush up on the old breakdowns as his part of the program, which orchestra broadcasted quite fervently over the radio, while we wrote a couple of editorials calling attention to the orchestra, and beggin the people of the country to break away from the frantic clutch of the modern dance and to adopt the old time dances as their favorite dish, where poise and equilibrium would have more of an opportunity to become paramount.

Old Quib Skills says the only way to see the silver lining is to get on the inside.

DEVIL'S DEN CITIZEN HAS
AFFECTIONATE COW TO SELL
FOR SALE—One good black and white spotted milking cow, which cow is capable of giving two gallons of milk per each and every day in the hands of a person who has got sense enough to handle her and who doesn't believe in being kind to dumb or any other kind of animals. This cow is the one that has been breaking down all the fences in the Devil's Den country and the neighbors have threatened to shoot her if I don't get rid of her my pronto, or toot sweet, as one of the ex-soldiers has said on occasion. This is a good opportunity to get a good gentle cow at a bargain if you don't mind using a club on her to keep her from hooking the stuffing out of you. Will sell cheap for cash or will trade for one of the New Fords if it ever comes out. DORT BLOPPINS, two miles east of Hank Wilkins alkali farm, near the gusher that didn't pan out, or leave word and cash with the postmaster at Devil's Den.

Old Quib Skills says the only way to see the silver lining is to get on the inside.

Give Dairy Cows Plenty
Water for Best Results

Dairy cows should be watered at least twice a day and best results are obtained when cows can have water at will. The higher the production the greater the benefit to be derived from frequent watering. A heavy producing cow requires from 75 to 150 pounds of water daily.

When it is not available, many successful dairymen have arranged some type of tank heater to remove the chill from the water, and they find that their cows drink more and produce more heavily.

for the future has in view." Said Incor for Kierman, "the complete control of the situation; that is, there should be some organization, state, county or municipality, engaged continuously in checking up on herds to see that they are free from the disease. It should not be necessary to maintain a large force of veterinarians, at great expense to the taxpayers, to travel from county to county, as has been done during the last ten years, but in every county there should be a sufficient number of practicing accredited veterinarians, and the territory should be divided so that each veterinarian would be able to tuberculosis test all herds in his district each year."

Pendleton had only two fire alarms and \$80 fire loss during October.

Malheur County is building six new schoolhouses this season.

Astoria-Pacific Light & Power builds electric line into Clatsop valley.

A cannery is proposed for the 1928 season at La Grande.

The provision of green feed in laying houses in Oregon is important as some of the birds in the flock will not go outside for it.

Everybody
knows

about the Superior Smoothness
of a Six, the Finer Quality of
a Fisher Body. That's why
a price of

\$745

makes the Pontiac Six
such an unusual "Buy"

The widespread appeal of the Pontiac Six is based on its extra smoothness, extra snap and the longer life it provides. The world-wide reputation of Fisher bodies is based on known superiorities of Fisher design in styling, comfort and passenger protection. And because the Pontiac Six is the lowest priced six with Body by Fisher, its success has become the talk of the automotive world. Do you actually know what luxuries you can enjoy in today's Pontiac Six? Have you experienced the superior performance, the added comfort, the extra satisfaction assured by the ownership of this great General Motors product? Why not come in for a demonstration today? Why not learn as so many thousands have—that a Fisher body is finer—Pontiac Six is smoother—and a price of \$745 makes it a truly unusual "buy."

New lower prices on all body types (Effective July 15th, 1927):
2-Door Sedan, \$745; Coupe, \$745; Sport Roadster, \$745; Sport Cabriolet, \$795; Landau Sedan, \$845; DeLuxe Landau Sedan, \$925. The New Oakland All-American Six, \$1045 to \$1225. All prices at factory. Delivered prices include minimum handling charges. Easy to pay on the General Motors Time Payment Plan.

Physical Development at
U. O. Told in Magazine

UNIVERSITY OF OREGON — Eugene—Nov.—(Special)—The uses of standard tests and scales by the school administrator is described in an article in the Oregon Educational Journal for November by Dr. Harl R. Douglass, professor of education of the University of Oregon.

Practical purposes for the use of tests by the school administrator are listed by Dr. Douglass as follows:

Stock-taking and the measurement of annual production.

Supervision of the course of study and the teaching staff.

Diagnosis and the improvement of instruction.

The improvement of the classification of pupils into homogeneous groups for the purpose of instruction.

Educational research.

Mr. Douglass takes the position in the article that schools should be considered as productive enterprises, and that an inventory of the school system, arrived at by tests, promotes efficiency.

The technique of testing programs is also outlined in the article, and a number of tests are cited for use of educators.

UNIVERSITY OF OREGON — Eugene—Six seniors of the University of Oregon were pledged to Phi Beta Kappa, honorary scholastic society, at the regular fall meeting of the fraternity. The six selected rank highest in the present senior class. Approximately 10 per cent of the class will be selected in the spring at the final election, it is stated.

Elton Edge, Healdsburg, major in zoology, rated highest with an average of 1.352. Maxine Roon, Portland, was second with a standing of 1.402. Others are Edna Elizabeth English, mathematics, 1.631; Francis Schroeder, botany, 1.710; Chris H. Boesen, law, 1.783, all of Eugene.

Phi Beta Kappa, which was founded in 1776 is rated as the foremost honor society in higher institutions. Only students with the highest scholastic standing and outstanding achievements in other lines are considered for membership. Reed college has the only other Phi Beta Kappa chapter in Oregon.

Fear expressed by many people in the beginning that the campaign would turn the public taste against milk consumption has proved to be unfounded, according to Doctor Mohler. On the other hand, he said, the annual consumption of milk in the United States has increased more than 49 quarts per capita since 1918. During 1926 the public consumed fifty-six billion pounds of milk and cream, an increase of two billion pounds over the quantity consumed in 1925.

Skepticism as to the outcome of the campaign has given way to a feeling of assured success. Today the subject of tuberculosis eradication is popular and there are few individuals connected with the dairy industry who have not expressed publicly or privately, their belief in the success of the campaign.

Although we have reached the point where we can look forward to the time when this disease will no longer be the cause of serious losses, Doctor Mohler said that it is necessary to maintain constant surveillance over the disease to keep it under control. Somewhat the same idea was expressed by Dr. J. A. Kierman, in charge of federal eradication work, when he said that "notwithstanding the fact that more than 5
