Ship Eggs Without Breaking
A new type of flat for shipping

eggs has been devised which has given excellent results in preventing breakage. This is known as the cup flat. Two of the flats placed back to back with the cups facing out are used in the bottom of each side of the case and either one or two flats are used on top as padding. Ordinarily no excelsior pads are used with this pack, although the two methods of packing may be combined. The fillers fit down between the cups and are prevented by them from sliding or shifting over the flats.

HIGHWAY CONDITIONS

Pacific highway. Detour still in effect between New Era and Oregon City in Oregon for northbound traffic. Southbound traffic uses the paved highway. Detour good gravel road. About five miles.

Starting at once, it is suggested, in routing motorists over the Pacific highway, they will find stretches of road between Sims and Castella where there are four steam shovels at work, quite rough but offering no serious difficulty. At danger points, flagmen are situated and if motorists comply with their instructions they will only have short delays. Just north of Castella, the roughest piece of construction is found due to the fact that at this point it is necessary to route motorists over the construction.

When a blast is set off numerous large rocks are thrown into the road and, due to the thickness of the dust, they must be extremely careful or they will strike their crankcase on the rocks.

Beginning August 20, and continuing in effect for approximately

two months, the Pacific highway will be closed between nine in the evening and seven in the morning. The closed section will be six miles in length and will extend from the town of Castella in the north to the Old Southern hotel at Sims in the south.

It should be clearly understood that it will be impossible for any vehicle to go through during these hours.

Tillamook district. Some loose gravel between Barvev and Brighton on the Roosevelt highway. No difficulty, however. Construction between Wheeler and Mohler. No delay to motorists.

Tillamook to Netarts and Oceanside. Good gravel to Netarts. Good dirt Netarts to Oceanside.

Tillamook to Newport. Pavement and excellent macadam.

Eugene district, Junction City to Florence. Good gravel surfaced road to Mapleton. Mapleton to Florence, fair, dry weather road.

McKenzie highway. Good oiled macadam from Springfield to Walterville. Walterville to Nimrod somewhat choppy and rough. Nimrod to and beyond the pass, good macadam road.

Willamette valley highway. Eugene to Goshen, paved. Goshen to Lowell, good gravel, oiled. Lowell to Oakridge and McCready Springs, narrow mountain road, steep and rough.

Women's Savings Accounts

Each year we notice an increase in the number of women who have savings accounts here. Those who have learned from experience the many advantages of saving, have told their friends about it, and their friends come here with their savings.
