

DEAN SHIRRELL HITS STUDENT AUTO

Nearly Always a Temptation to Waste Time, and Often Actually a Detriment to Morals, He Asserts

That an automobile "is to most students a temptation to waste time, and in some cases it is a detriment to morals," is the statement made by Elmer L. Shirrell, dean of men of the university, in a letter sent out to hundreds of parents of university students advising against the students bringing cars with them to Eugene this fall. Dean Shirrell took this step following an attempt to learn from deans of men of a large number of American universities what steps toward the control of student-owned automobiles have been taken in their particular institutions.

"We do not intend at the present time to make regulations on the subject of student automobiles as other universities have," states Dean Shirrell. "We should much prefer to have this problem solved by the co-operation of the parents of the students of the university. We believe that your own interest in the perpetuation of democracy in student life at the University of Oregon will lead you to agree with us that the automobile should not accompany your son to the university.

Dean Elmer L. Shirrell

Luxuries Not Needed

"Real scholarship at the University of Oregon demands a good proportion of the student's time and the normal recreation of college life will consume the rest of it. The moderate allowance needed by each university man should not include expenditures for such luxuries as the maintenance of an automobile."

Dean Shirrell declared that the university administration recognizes that the automobile "is a valuable and necessary feature of our modern life," but that "we cannot admit that it is a necessary part of student life. There are rare cases in which an automobile is a necessity to a student and we are glad to make exception in those cases."

In a letter to mothers of girl students, Miss Haze, Frutman, acting dean of women, states that "an automobile operated by a girl student is a distinct liability."

A number of American universities have made hide-bound regulations against operation of automobiles by students during the school year, while others, especially those located in or near large cities, have found it impossible due to the fact that a large portion of the student body goes to the university campus by automobiles from home, Dean Shirrell found in his survey of the student car situation.

The University of Illinois bans use of automobiles by students during the school term unless a

permit is granted by the administration upon a written request from the student's parents. The University of Michigan has at present five police officers, engaged exclusively in enforcing a similar regulation. The University of Indiana has also such a regulation.

Car Users Poor Students

At Princeton university, according to Christian Guass, dean of the college, it was found that the record of the group who had cars was considerably below the general college average. A strict regulation against use of cars was enforced, and the resulting record was, the dean declares to Dean Shirrell, "so very much better there, was really no comparison."

Among institutions which wrote that they have no regulations against use of cars, except for parking rules and the like, were the University of Minnesota, Stanford University, University of California at Los Angeles, the University of California, University of Colorado, University of Iowa, University of Southern California, University of Wisconsin, Southern Methodist university, and Ohio State university. At the latter school students conduct their own traffic court.

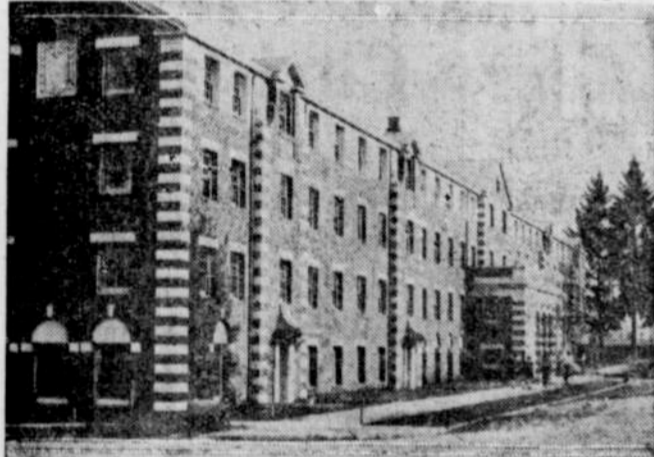

The University of Oregon has taken steps recently to limit parking on the campus, and Dean Shirrell indicated that it intends to take no more drastic steps at present.

U. of O. Freshman Co-ed Officers Happy

These co-eds at the University of Oregon, Bernice Wodward, left, and Pat Boyd, are happy because they have been chosen by the freshman class as vice-president and secretary. Students at the university have their own government, and thus develop initiative and a sense of responsibility.

New Dormitory at University of Oregon Popular

The new men's dormitory at the University of Oregon which will be a campus home for 275 students during the coming year. It has just been finished, and is completely furnished in an attractive style. It is divided into six units with a separate dining room and living room for each. Students from every part of the state are already residing in it, and all are enthusiastic over the many conveniences and attractive features.

International Courses Interest U. O. Students

UNIVERSITY OF OREGON, Eugene—Courses dealing with the different phases of international relations are proving to be popular with University of Oregon students this year. The popularity of these courses, many of which are new this year, is laid to the recognition of a growing need for a better understanding of international relations, particularly between the United States and the Orient.

First year courses in the social science group give the entering student a knowledge of the backgrounds of present day conditions through a study of "Modern Europe," "Man and His Environment," and similar courses. Advanced students are delving into such courses as: "History of China," "Japan and the Pacific," "South America," "International Trade," "International Economic Relations," "Geography of Europe," "Geography of the Pacific," "American Foreign Relations," "Recent Russia," "International Law," and "International Organizations and Politics."

Courses in foreign trade are being emphasized by the school of business

administration. William A. Fowler, who has had considerable experience in the foreign field, is in charge of the courses. Other Oregon faculty members who have done special work in the international field are: Dr. Warren D. Smith, of the geology department, an authority on the Orient; Dr. Walter Barnes, on the history of recent Russia in particular and modern Europe in general; Dr. Waldo Schumacher, new head of the social science curricula group and a student of international politics; and George Vern Blue, of the history department, just returned from several years of research in Europe.

Camera Reporting Now Offered at University

UNIVERSITY OF OREGON, Eugene—Photography in newspaper work is receiving special recognition this year at the University of Oregon school of journalism in the establishment of a new course entitled "Camera Reporting." George H. Godfrey, director of the bureau of public relations, is instructor in the course, which involves practical use of cameras and training in recognizing opportunities for good newspaper pictures.

Real Estate Man Pays Fine Six Years Late

San Francisco.—Diogenes undoubtedly would be pleased with D. H. Riker of Los Angeles, a real estate operator.

Six years ago Riker was fined \$1,000 in Federal court here on a charge of sending fraudulent sales literature through the mails. He took a pauper's oath and so escaped the fine. But he told the court he would pay it some day.

Today John Preston, associate justice of the State Supreme court, turned over to the Federal court a check for \$1,000 from Riker. Preston was Riker's attorney when he was fined.

WILD COLT SAVES DROWNING BABY

Fishes Child Out of Water Tank Just in Time.

Hays, Kan.—A wild, unweaned colt, shunning every member of the Reiners Donn family except the two-year-old baby boy, staged a dramatic and unusual life-saving feat recently by fishing the child out of the water tank into which he fell and holding the baby's head out of water.

How long the colt stood with teeth firmly gripping the neckband of the baby's dress before the situation was discovered was not ascertained.

The baby was unconscious when finally found by the frantic mother and father, but quick resuscitation was possible.

The colt strangely displayed an unwonted affection for the baby son of the family for some time. Slaying away from Mr. Donn himself, the colt permitted no one to come near him. Yet the animal would walk up to the baby and nuzzle it while the infant clapped its hands in glee.

A few days ago the older brother was told to watch the baby. The threshing machine lured the watchman away from his charge. Some time later the baby was missed. A young woman neighbor to the Donn's family joined in the search. And it was she who found the colt at the water tank patiently holding the child out of the water by the neckband of the tiny dress.

Mr. Donn believes the child's screams as it struck the water attracted the colt and that the animal fumbled around in the water until a firm hold was obtained on the child's clothing.

Boy With Glass Pistol Confesses 40 Thefts

New York.—The capture of Terrence Roberts, the boy burglar who has been terrorizing residents of Sheepshead Bay and Vanderveer Park, has relieved police of those precincts.

Recently Terrence entered the home of Mrs. Margaret Killorin and was upstairs when she came in from the yard. The boy struggled with Mrs. Killorin, who is seventy years old, and to frighten her away pushed a glass pistol against her. A fireman, Floyd Strachan, heard the screaming and ran after the boy, catching him after a few blocks chase.

At the Sheepshead Bay station the boy admitted to Detectives John J.

McDonald and Albert Dalley, police say, that he had burglarized 42 homes, and took them around to many of them.

He told Magistrate Hirschfield in the Coney Island court that he wanted money to spend like the other boys. He said he was sorry for what he had done and asked the newspaper men to warn other boys that burglary did not pay. He had been living at a Turkish bath for some time, and police there found a number of watches and other alleged loot.

Find Cannibals Ate Tax Collecting Squad

The Hague.—Startling reports come from Java to the effect that Pangasinan cannibals in the interior of Dutch New Guinea ate an entire Dutch Indian police force sent to collect taxes. The police arrived at Pangasinan, where they intended to assess the population the following morning. During the night a surprise attack took place. They were immediately butchered and the bodies were divided among several tribes, who ate them during the feasts. Expeditions sent by the Dutch Indian government found that the natives had fled to the wilderness.

\$3,000 for a Tooth

New York.—Two years ago Mrs. Sarah Cohen broke a tooth while eating a slice of bread. Recently she was awarded a judgment of \$3,000 against the baker when the court learned he had allowed a rusty nail to drop in the dough.

Musical Convict

Lincoln, Neb.—A Nebraska convict serving a life sentence is now a director of the penitentiary orchestra, as well as composer of several songs. He has also patented a reed clipper for use in making wind instruments.

Convicts Study Law

Moscow.—More than 50 convicts in Soviet prisons are studying law through a correspondence course of the Moscow state university.

Chief of Police Loses Whiskers as Home Burns

Lynn, Mass.—The chief of police of Lynn Field has lost most of his whiskers. The flowing white beard of eighty-three-year-old Alfred Tedford, which for years has been one of the town's sights for visitors to admire, won't flow any more. A thief sneaked explosives in the chief's kitchen stove and tried to blow him up.

The explosion wrecked the front of the kitchen stove, stunned the housekeeper, and set the home on fire. Chief Tedford, who was in a tree picking apples, rushed into the kitchen and carried out his housekeeper, Mary Hunter, and then returned to extinguish the flames. His beard was badly singed, but otherwise he was uninjured.

The explosion wrecked the front of the kitchen stove, stunned the housekeeper, and set the home on fire. Chief Tedford, who was in a tree picking apples, rushed into the kitchen and carried out his housekeeper, Mary Hunter, and then returned to extinguish the flames. His beard was badly singed, but otherwise he was uninjured.

Saves Ammunition by Trapping Ducks in Garage

Milwaukee.—S. J. Hagle, member of the Milwaukee police force, bagged three big Mallard ducks without firing a shot. Hagle left his garage door open in the wee hours when he came off his beat. Shortly afterward he returned and found three ducks flapping about in the rafters of the building.

Carbonate Prevents Green Weevil
Copper carbonate does not injure the germination of wheat seed and

does prevent grain weevil, according to the Oregon experiment station. Copper carbonate, properly handled, is without doubt the best seed treatment known for Oregon, although some growers have experienced some discomfort due to breathing the dust, either in treating or in connection with sowing. Copper carbonate is especially recommended for treating seed wheat.

Control Lice on Poultry
Nicotine sulfate commonly known as black leaf 40, which can be obtained from the poultry feed dealer is a simple and effective means of controlling lice on poultry. It is applied along the roosts with an oil can in the evening.

Even a very light pat on the back can make the chest stick out.

The new Ford has a very simple and effective lubrication system

THE lubrication system for the engine of the new Ford is as simple in principle as water running down-hill.

As a matter of fact, the lubrication system for the new Ford is so simple in design and so carefully made that it requires practically no service attention.

A gear pump in the bottom of the oil pan raises the oil to the valve chamber reservoir. From here it flows on to the main crankshaft bearings and the front camshaft bearing. Overflow oil drops into the oil pan tray and runs into troughs through which the connecting rods pass.

There is just one thing for you to do, but it is a very important thing... watch the oil! Change the oil every 500 miles and be sure the indicator rod never registers below low (L).

As the ends of these rods strike the oil they scoop up a supply for the connecting rod bearing. At the same time they set up a fine spray that lubricates the pistons and other moving parts.

If the oil level is allowed to fall below low, the supply becomes insufficient to oil all parts as they should be oiled.

From the tray the oil runs into the bottom of the pan, and is again drawn up through a fine mesh screen and pumped to the valve chamber.

To insure best performance it is also advisable to have the chassis of your car lubricated every 500 miles. This has been made easy in the new Ford through the use of the high pressure grease gun system.

This system is so effective that the five-quart contents of the oil pan pass through the pump twice in every mile when you are traveling only 30 miles an hour. Yet there is only one movable part—the oil pump.

Proper oiling and greasing mean so much to the life of your car that they should not be neglected or carelessly done.

See your Ford dealer regularly. He is especially well-fitted to lubricate the new Ford and he will do a good, thorough job at a fair price.

FORD MOTOR COMPANY

Perfected Product of America's Most Modern Automobile Plant

In the New All-American Six. In this faster... finer... smarter... more beautiful car. Here you'll see the perfected product of America's most modern automobile plant... a plant where the most drastic standards are rigidly enforced. Where scores of operations are held within one ten-thousandth of an inch. And the result? A car with performance ability far in advance of anything in its field... sterling quality in every detail... this New All-American Six. Come in to see it and drive it... a car the like of which you've never seen before.

Prices \$1145 to \$1375, at factory. Lowboy Hydraulic Shock Absorbers and spring covers included in list prices. Bumpers and rear fender guards extra. Check Oakland delivered prices—they include lowest handling charges. General Motors Time Payment Plan available at minimum rate.

NOTICE OF SCHOOL MEETING

Notice is hereby given to the legal voters of School District No. 47 of Columbia County, State of Oregon, that a School Meeting of said district will be held at Washington School, on the 22nd day of December, 1928, at 2:00 o'clock in the afternoon for the purpose of discussing the budget hereinafter set out with the levying board, and to vote on the proposition of levying a special district tax.

The total amount of money needed by the said school district during the fiscal year beginning on June 30, 1929, and ending June 30, 1930, is estimated in the following budget and includes the amount to be received from the county school fund, state school fund, elementary school fund, special district tax, and all other moneys of the district:

ESTIMATED EXPENDITURES			
PERSONAL SERVICE:	No.	Salary per year	
1 Superintendent	1	\$ 1,800.00	\$ 1,800.00
2 Teachers	21	23,000.00	23,000.00
4 Janitors	3	2,775.00	2,775.00
5 Clerk	1	180.00	180.00
7 Other services		150.00	150.00
Total			\$27,905.00
MATERIAL AND SUPPLIES:			
1 Furniture (desks, stoves, curtains, etc.)		300.00	
2 Supplies (chalk, erasers, etc.)		600.00	
3 Library books		100.00	
4 Flags		10.00	
5 Playground equipment		400.00	
6 Janitor's supplies		500.00	
7 Fuel		500.00	
8 Light		200.00	
9 Water		300.00	
10 Postage, stationery and printing		100.00	
Total			\$ 3,010.00
MAINTENANCE AND REPAIRS:			
INDEBTEDNESS:			\$ 1,500.00
1 Bonded, and interest thereon.		6,280.00	
Total			\$ 6,280.00
TRANSPORTATION OF PUPILS:			
INSURANCE:			\$ 6,000.00
MISCELLANEOUS:			\$ 600.00
2 Board of pupils		1,500.00	
Total			\$ 1,500.00
EMERGENCY:			
Total			\$ 2,000.00
Total estimated amount of money for all purposes during the year			\$48,895.00
ESTIMATED RECEIPTS			
From county school fund during the coming school year		8,513.33	
From state school fund during the coming school year		1,527.22	
From elementary school fund during the coming school year		4,091.63	
Total estimated receipts not including proposed tax			\$14,132.18
RECAPITULATION			
Total estimated expenses for the year		\$48,895.00	
Total estimated receipts not including proposed tax		\$14,132.18	
Balance, amount to be raised by district tax			\$34,762.82
Total bonded indebtedness		\$36,000.00	
Total amount of all indebtedness		\$36,000.00	
Dated this 20th day of November, 1928.			
ATTEST: Alice Gooding, Dist. Clerk, Ben S. Owens, Board of directors.
