

### Eye Strain Impairs Health and Vision

From page 2  
toward assuring a serene old age, brightened by the ability to see both near and distant objects clearly, while neglect of the eyes and the use of glasses which have outlived their usefulness, tend toward eye diseases and dim vision in later life.

However, make no mistake about this: Far better use no glasses at all than imperfect lenses or glasses which do not properly correct the vision. There are millions of lens combinations and only the trained practitioner can decide just which lenses are best for your eyes.

In every city will be found numerous proficient optometrists and oculists whom you may safely trust with your most precious possession, your eyes. Do not hesitate to consult such a one at intervals not exceeding two years and be assured that if, in selecting the person who is to examine your eyes, you are guided by a desire for high grade service, rather than seductive low prices, no glasses will be prescribed unless the examiner feels that he would do you an injury by permitting you to go without them.

There may have been a time, back in the old days of so-called free examinations, when glasses were prescribed whether or not they are needed; but today, all ethical practitioners charge a fee for examination, sufficient to pay them for the time expended and every ethical proficient practitioner is glad to be able truthfully to tell all patient that glasses are unnecessary.

Take care of your eyes and your eyes will take care of you. (This article, clipped from the Cleveland Press, is furnished through the courtesy of Dr. W. A. Luzader of Portland eyesight specialist, who makes regular visits to Vernonia.)

### Weather Delays Trout Planting

The hatchery department of the state game commission is anxiously awaiting a break in the weather so that trout plantings may be made in many Oregon streams. The heavy snow will hold up the work of planting more than two weeks, but anglers need have no fears as the trout in hatchery ponds are well fed and increase more rapidly in size than they would in streams.

### Many Trout Liberated

During the past fiscal year a total of 20,345,278 trout were liberated in the streams of Oregon by the hatchery department of the Oregon state game commission. This number included rainbows, steelhead, Eastern Brook, cutthroats, silversides and graylings. Practically all of these fish were six inches or more in length. The largest number, 3,

857,310 went to Klamath county, but each county had streams that were planted. The smallest number, 21,320 went to Multnomah county.

### Wild Turkey Popular

The wild turkey bids fair to become a popular game bird in Oregon, according to Harold Clifford, state game warden. A considerable number of these birds are being raised at the game farms in Eugene, Corvallis, and Pendleton. Turkeys have been liberated in Polk, Clackamas, Umatilla, Wallowa, Wasco, and Curry counties. Twelve were released in Clackamas county early last spring and by fall this number had increased to more than 50. Sportsmen in all sections where liberations have been made are co-operating with the game commission to prevent il-

legal killing of the turkeys.

### Licenses Support Hatcheries

Approximately \$400,000 is received annually by the Oregon state game commission from hunters, anglers and trappers. This money goes to support the 29 hatcheries and egg taking stations, the three game farms and the law enforcement and the executive departments of the commission. The commission is entirely self supporting and receives no money from legislative appropriations.

### Cold Snap Breaking Up

The weather last night was milder than for the past three weeks, with indications that the extended cold snap is about at an end. With plenty of snow in the timber, however, those who are most interested in the water

supply feel sure there will be ample moisture in the ground for the coming summer, insuring good pasture for cattle.

**Give your CHICKS the right start!**

Every extra chick you raise means dollars in your pocket. Our customers raise more of the chicks they buy because we furnish them in a Live-and-Grow Starting Brooder. Start your chicks right and you will raise more of them. Let us give you our proposition to raise your chicks in a Live-and-Grow Starting Brooder. Write, or come to our hatchery and see how different chicks are when started right. Remember! Every extra chick means money to you. Write for illustrated catalog, or visit us. We can supply

**CORRECTION** In Mellinger Hardware ad. Feb. 7, Hercules Balloon tires were guaranteed for 1000 miles. It should have read, 10,000 miles.--Vernonia Eagle.

## Two Year Battery The Lincoln \$6.59

- 6-volt, 11 plate, shipping wt 48 lb.
- 6-volt 13 plate ..... \$8.95
- Lincoln Jr., 6-volt 13 plate, \$6.89
- Ford and Chevrolet Special
- 6-volt, 11 plate, 1 yr. guarantee ..... \$6.29

Still LOWER prices on Tires, Tubes, Batteries

16,000-mile Tires Guaranteed  
2-year Batteries Guaranteed  
3-year Tubes Guaranteed

- 10,000 Miles Guaranteed
- HERCULES BALLOON TIRES
- 29x4.40 ..... \$5.15
- 30x4.50 ..... \$5.80

Buy NOW at winter prices and SAVE

- Hercules High Pressure Cord
- 30x3 ..... \$4.35
- 30x3 1/2 ..... \$4.59

Prices Good Only Until February 28, 1929

- 6,000 Miles Guaranteed
- LITTLE GIANT BALLOON
- 29x4.40 ..... \$4.98
- Little Giant High Pressure Cord
- 30x3 1/2 ..... \$4.69

## Help our Merchants to help YOU

EVERYBODY will agree that a man succeeds and prospers only when he spends LESS money than he receives in a given period of time.

Let's apply this great economic test to the situation in this town: Our business men have invested—and continue to invest—their money in stocks of goods brought here to your very door to meet your daily needs.

Through the pages of this paper they advise you of their ability to serve this community. All of us know that they deserve our patronage. And remember, the more you trade with them the more funds they can invest in larger stocks and new lines.

# Fuel System of the NEW FORD Has Been Designed for reliability and long service

The practical value of Ford simplicity of design is especially apparent in the fuel system.

ands of miles of good service. All adjustments are fixed except the needle valve and idler, there is practically nothing to get out of order.

The gasoline tank is built integral with the cowl and is unusually sturdy because it is made of heavy sheet steel,terne plated to prevent rust or corrosion. An additional factor of strength is the fact that it is composed of only two pieces, instead of three or four, and is electrically welded—not soldered.

The choke rod on the dash acts as a primer and also as a regulator of your gasoline mixture. The new hot spot manifold insures complete vaporization of the gasoline before it enters the combustion chamber of the engine.

Because of the location of the tank, the entire flow of gasoline is an even, natural flow—flowing the natural law of gravity. This is the simplest and most direct way of supplying gasoline to the carburetor without variations in pressure. The gasoline feed pipe of the new Ford IS ONLY 18 INCHES LONG and is easily accessible all the way.

As a matter of fact, the fuel system of the new Ford is so simple in design and so carefully made that it requires very little service attention.

The gasoline passes from the tank to the carburetor through a filter or sediment bulb mounted on the steel dash which separates the gasoline tank for the engine.

The filter or sediment bulb should be cleaned at regular intervals and the carburetor screen removed and washed in gasoline. Occasionally the drain plug at the bottom of the carburetor should be removed and the carburetor drained for a few seconds.

The carburetor is specially designed and has been built to deliver many thousands

of gallons of gasoline. Have your Ford dealer look after these little details for you when you have the car oiled and greased. A periodic checking-up costs little, but it has a great deal to do with long life and continuous good performance.
