Your Servants Do You Use Them?

Are you taking advantage of the many electrical servants available?

Do you realize the number of ways that electricity can lighten the burden of household duties?

Developments during the last forty years in the electrical industry have revolutionized homes, industries, transportation and communication.

Of the 28 million homes in the United States, almost 20 million now have the advantages of light and power. The facilities of the power companies and the many appliances now on the market enable all of these homes to employ electrical servants at reasonable cost.

These servants do not have to be humored. You do not have to give them "a day off." They work for you with the same efficiency all day, every day. Are you enjoying their service?

Come Join Our Circus

A Big 9 Ring Circus going on now in the Miller Stores. Here is what it is all about: A few fellows by the name of Millers down in Portland, some of them are farmers, at least they are in the Turkey business for the month of June, guess they think some of us store managers and clerks need fattening up, anyway they have offered a Turkey Dinner to the store that makes the largest per cent gain during the month of June. Of course we Vernonia Vultures are going after the Turkey, so no monkey business around here from now on during June. We are going to talk plain Turkey Prices from now on. We have put a bulletin board in our window showing the standings of the stores each day. Just keep your eye on Vernonia Vultures.
