"Inside" Information

To rid a house of cockroaches dust commercial sodium fluorid thoroughly over shelves, tables, floors, and runways or hiding-places of the roaches.

Shoes of correct shape are broad and round at the toe and straight along the inner edge. Soles are at least moderately thick, heels nearly as broad as the heel-seat of the shoe, and not high. The heel of an army nurse's shoe is 1 1/2 inches high.

After twenty two years of enforcement of the Federal "pure food law" the Food, Drug and Insecticide Administration, U. S. department of agriculture says that, in general, the conditions in the canned food industry warrant high confidence on the part of the consumer.

Children may wear cotton fabrics the year round provided the underwear is adjusted to the season. Heavy cottons such as jeans, madras, and pique are suitable for cold weather. In some climates washable wool materials may be preferred, but they require special care in laundering. Wool clothing should be designed to avoid unnecessary thickness of material at any point.

Make bluing water just before it is to be used. If allowed to stand it is likely to streak the clothes. Test the shade by dipping a handkerchief or small garment and hiding to the light, or hold a little of the water in the hollow of the hand. Heavy fabrics require more bluing than light ones. Stir all bluing occasionally while in use. Blue only a few pieces together and do not let them soak in the bluing water.

Very good ice cream can be made without stirring if a fairly rich mixture is used and the ingredients are carefully combined. These desserts may be packed in ice and salt or frozen in a mechanical refrigerator. Heavy cream is the base, but as it is expensive and too rich to be palatable, it should be diluted by the addition of evaporated milk and thin cream, or by rich milk thickened with gelatin, eggs or flour. The U. S. department of agriculture has a new leaflet giving recipes and directions.

An apple chutney is always enjoyed and is easy to make. It has 14 ingredients: 3 lemons, 3 quarts chopped apples, 1 quart brown sugar, 1 quart cider vinegar, 1 quart dates, stoned and chopped, 1 pint tarragon vinegar, 2 pounds sultana raisins, 1 tablespoon ground ginger, 1 teaspoon paprika, 1 teaspoon salt, 2 chili peppers 1 onion chopped, garlic to taste, and 2 small cloves. Chop the apples with the lemon, as the acid will help to keep the apples from turning dark. Remove the seeds from the chili peppers. Mix all the ingredients. Boil gently, until the apples are soft, and stir the mixture occasionally with a fork. Bottle while hot, and seal.

Grants Pass—Plans completed for erection of bridge across Rogue river.

McDonalds And Crawford Tree Large Bear

Lode and Hugh McDonald and W. E. Crawford treed and killed a 150 pound bear with their dogs Sunday, on the upper Kist creek.

The McDonald brothers and Crawford have killed several bears this year.

The fur of the bear killed Sunday was in good condition.

U. S. Department of Agriculture

Although cottonseed meal is often used as a direct fertilizer in sections where it is cheap, it is probably more profitable to feed it to stock and apply the manure to the land. Very little of the fertilizing value is lost through feeding.

A good disinfectant used occasionally in the poultry house not only destroys the germs of contagious diseases, but also many external parasites and some parasitic worm eggs. One of the best disinfectants for this purpose is cresol, one half pint in 8 quarts of soft water. A 5 per cent solution of carbolic acid also is good.

When cows are off pasture and are being given dry feed, it is well to consider the problems connected with summer feeding. It is advisable to plan now the system to use low next summer. If plenty of good pasture is not available, plans should be made to improve it and also to provide other excellent feed to take its place or to supplement it.

Millions of dollars lost annually because of sour and off-flavored milk might be saved through good management, sanitation, and refrigeration, the U. S. department of agriculture believes.

Clean, healthy, carefully fed, re-cows, small-top milking pails, sterilized dairy utensils, and prompt cooling and cold storage will do much toward preventing sour and badly flavored milk and other dairy products.

The beef bull should be well fed at all seasons, but especially just previous to the breeding season. A good ration for an 1,800-pound bull is 20 pounds of silage, 20 pounds of legume hay, and 6 pounds of grain. If non-legume hay is fed, the grain ration should include about 2 pounds of cottonseed or peanut meal. Large quantities of silage should not be fed to a bull in heavy service.

One tuberculous fowl may cause the disease to spread through the whole flock if control measures are not applied. Avian tuberculosis, which is particularly prevalent in the North Central states, can be detected by a post-mortem or by the tuberculin test given by a veterinarian. All diseased birds should be killed and burned. The remainder of fowls over one year old should be marketed. The chicken house should be cleaned and disinfected and also moved to clean ground if practicable. Lots and runways should be plowed up and seeded to a grain crop.

Portland—Plans underway for erection of annex to Emanuel hospital at 600 Commercial St.

Burns—36-passenger bus started operations between this city and Edward Hines plants.

Burns—Construction underway on seven five-room apartment buildings.

For 5 years Dr. Luzader, eyesight specialist, has been making monthly visits to Vernonia. His next visit will be December 2 and 3, office at Kullander's. Have your eyes examined.

TOYTOWN CIRCUS

At Hoffman's

Boys and girls, this is especially for you. We have a lot of secrets that we just can't keep to ourselves any longer, and we want to tell you all about them. . . . Would you like to see an elephant that you could cut in half with a saw? What would you think if you saw a leopard with spots that could be washed off? Would you be surprised to meet a lion that couldn't roar? Have you ever heard of clowns that aren't able to eat? . . . Well, starting next Monday, you can see those very things at the Toytown Circus in our toy department. It's a make-believe circus, you understand, but it is even funnier and more exciting than a real one. You are all invited. You don't need tickets, and you may bring your parents. They will have a good time, too.
