A Few Garden Hints

Do not be discouraged if your garden is making no progress this weather—everything is at a standstill. There is still time to plant fast growing vegetables if they are properly cultivated during the warm weather.

This is perfect weather for mildew, aphid and black spots on your roses. Spray for all these

troubles. Back Leaf 40 for aphid and dusting sulphur and arsenate of lead for mildew and black spot. Green worms which sometimes infest the rose bushes can be controlled by the dusting powder.

When you transplant your annuals pinch back the tops to insure a sturdy plant later.

Do your weeding on sunny days, then the weeds will have no chance to root again if left in the flower bed.

Transplant during cloudy or rainy weather—then there will be no loss.
