**How to Plan Your 1932 Advertising Budget**

Advertising costs are a legitimate and necessary item in a successful merchant's sales expenditures. Merchants who can see the value of placing their goods before the buying public through the columns of the local newspaper are the most progressive and aggressive business men in the city. It is not yet too late to plan your advertising expenditures for 1932. Lay out a definite program and adhere to it conscientiously during the coming months, and next year at this time you will have benefited more than you can now imagine or believe. The table at the right is for your guidance. Use it.

Advertising experts tell us that in times of slow sales to add between 15 and 20 per cent to the advertising budget. Live merchants will note that this is being done throughout the entire country at the present time.
