COMPTROLLER COMMENDS INSTITUTE OF BANKING

WASHINGTON, D. C.—The American Institute of Banking, said to be the most successful project of its kind in the field of applied adult education, has performed a valuable function in training bank clerks for "sound public service as well as personal success," J. F. T. O'Connor, Comptroller of the Currency of the United States, said here in a recent radio address. The institute is a section of the American Bankers Association.

"While imparting useful knowledge, it has improved the morals of banking personnel and has stimulated in its members an intelligent interest in national and international monetary problems," Mr. O'Connor said. "Its courses cover a wide field in banking. Among the subjects, one finds Bank Organization and Operation, Commercial Law, Negotiable Instruments Law, and Economics, in the Pre-Standard Division; followed by such subjects as Money and Banking, Credit Management, Financial Statement Analysis and Bank Management, in the Standard Division.

"Each and every subject is one which is necessary to a knowledge of banking. However, the institute does not stop here, but encourages graduate study in Corporation Finance, Trust Service, Farm Credit Administration and Business Forecasting. Again it emphasizes in special courses the importance of the less technical but highly beneficial study of Constructive Customer Relations, Banking Fundamentals and Public Speaking. No comment is necessary on these courses: their value is at once apparent."

Portland and Veldon Parker, who came up from California to spend a vacation with his parents, Mr. and Mrs. Al Parker.
