Eight Teams Are to Enter Tournament In Astoria 7th-9th

Eight teams are to be entered in the annual district basketball tournament to be held at Astoria March 7, 8 and 9.

Astoria and Seaside will represent Clatsop county. Vernonia, St. Helens, Clatskanie, Scappoose and Rainier are entered from Columbia county.

The Vernonia Loggers will be paired against the husky Astoria Fishermen in the first game of the tournament. Astoria won both the district and state championships last year and are heavy favorites to repeat again this season. The Fishermen have the tallest center in the league, Kokka, who stands 6 ft. 4 in. in his stocking feet. The remainder of their hoopsters average 6 ft. 1 in. in height. They also have a star player, Sarpola, who is their forward mainstay and an all-state man.

The Loggers average about 5 ft. 9 in. in height. Holcomb and Henderson will start at the forward positions; Condit at center; Meeker and King at the guard posts.

Thus Vernonia has a very slim chance to overthrow the Fishermen, but our boys will be in there fighting every moment, and may come home in second or third position.

MEMORIES

Students find that when six-weeks tests come around that their memories are rather dull and rusty.

It is great to learn things in school but it is greater if you can remember or recall at a minutes notice things that you have learned.

It is a great help to be able to have the answers right on the tip of your tongues—even the most important things—for in the long run that is all that counts.

In regard to "memories" the following article is taken from "The Club," Hastings, Nebraska.

"We have different kinds of memories; those of the past and those of the present. These two can usually be divided into good and bad memories. The kind of memory taken up in this discourse is that power which most students possess that enables them to find their caps where they left them the night before or to remember a lesson over night or to even remember the address of some fair damsel.

Apparently many students forget many insignificant assignments over night, and next day find them most significant. Many students think they have a sub-normal memory because they can remember anything only about five minutes. These students are generally bluffers. They are always trying to bluff the teachers, and the chances are they will try to bluff their way through life."

BLEARY EYED MOTORIST

Virtually in the class of the drunken or napping driver is the motorist who permits his windshield wiper to wear out, thus allowing a dirty or rain-smearred windshield to obscure his vision, sponsors of the "Let's Quit Killing" campaign have pointed out. Rubber blades on all wipers eventually wear out and should be changed before they become defective.
