

Campaign for Early Diagnosis of Tuberculosis

Forty years ago this spring joke-smiths were making the world laugh at an amazing news item from Wurzburg, Germany. A professor of physics at the university there had announced the discovery of a ray which permitted him to see through solid objects. When asked what it was he said he didn't know—it was invisible. He had proved it was not light, yet it would take a photograph. He frankly called it an "X" (unknown) ray. The local scientific society voted that the new ray should be called after its discoverer. So today it is called either the X-ray or the Roentgen ray, after William Konrad Roentgen. The National Tuberculosis association, which is conducting throughout April an "Early Diagnosis Campaign," has for its slogan, "Flight Tuberculosis

With Modern Weapons," and call attention to the fact that the X-ray and tuberculosis test are the weapons it means. The illustration shows the necessary apparatus and a portrait of the immortal Roentgen.

The National Tuberculosis association's early diagnosis campaign is receiving the aid and support of health officials, physicians and surgeons in all parts of the country. Persons who have reason to suspect that they have contracted the disease are urgently advised to submit themselves to the tests, which may be given in innumerable cities and towns in all the states, both in private laboratories and in those maintained by municipalities. Cure of tuberculosis is now comparatively sure if treatment is begun in its early stages, so no time should be lost in determining its presence.

Germany's New Zeppelin on a Test Flight

From an airplane flying above it, this excellent snap of the LZ-129 was made, as the great zeppelin that was built for passenger service over the Atlantic, from Frankfurt-am-Main to Lakehurst, N. J., was maneuvered over Lake Constance on its first test flight.

Minnesota Town Is Run by Women

Here are the women who run the little town of Taopi, Minn., discussing municipal business. They are, left to right: Mrs. J. H. Gosha, mayor; Mrs. Edna Johnson, treasurer; Mrs. M. S. Monson, trustee, and Mrs. J. B. Eastvold, justice of the peace.

Co-Eds Firmer Than Men in Holding to Studies

Lewisburg, Pa.—Women are steeper than men, according to conclusions drawn by the "Bucknellian," student newspaper at the Bucknell university.

The paper conducted a survey of the number of students who changed courses after the opening of the term and found that 225 men switched classes, while only 129 coeds changed their programs. It was concluded that women in general may change their minds more frequently than men, but coeds exhibited more steady convictions.

Shark Skin Is Strong

The skin of the shark often has ten times as much tensile strength as oxhide; the skin of the South American capybara produces a leather much softer than chamois, and the hair of the Siberian bear is unequalled in resiliency and strength.

Guaranteed!

The government is behind every deposit you have—up to \$5,000. That is the finest guarantee in the world—as certain as the very existence of our government! Make your deposits with confidence—they are guaranteed, by Federal Deposit Insurance.
