

WORK... "FUN AGAIN"

With Constipation Cleared Up

THE end of every day found her tired out, nervous, often with headaches. But now, thanks to Nature's Remedy, work is fun again—she feels like going to a movie or dance any night. Millions have switched to this natural all-vegetable laxative. Contains no mineral or phenol derivatives. Instead a balanced combination of laxative elements, provided by nature, that work naturally, pleasantly. Try an NK tonight. When you see how much better you feel you'll know why a vegetable corrective is best. Only 25c. at all druggists.

WOMAN'S AILMENTS

Mrs. L. E. Dixon of 2819 Chestnut St., Everett, Wash., said: "I was weak and sickly when I was developing into womanhood. I lost weight, became irritable, had headaches and terrible cramps. I realized my system was becoming weaker each time and that a tonic was necessary. I tried Dr. Pierce's Favorite Prescription and it was not long until I was eating better and feeling better."

New size, tablets 50c., liquid \$1.00 & \$1.35

WHO ARE YOU?

The Romance of Your Name

By RUBY HASKINS ELLIS

A Greene?

It is commonly supposed that the name of Greene is of Saxon or Scandinavian origin, but it is found that there was a patrician family of this name after the Roman conquest of England, which suggests that it is of Latin derivation.

In the early part of the Thirteenth century, about twelve years before the granting of the Magna Charta, during the reign of King John, there lived in England one Alexander de Boketon. It was his

Greene

great grandson who took unto himself the name of Greene, and spelled it Grene. He was created a knight and was a member of parliament from Northampton county.

Sir Henry Greene, a descendant of this family, became lord chief justice of England.

In America, the first Greenes settled in New England, and Maj. John Greene was deputy governor of the colony of Rhode Island.

Prominent personages of this family in later times were Joseph Warren Greene and William Benton Greene of Rhode Island. The latter was an eminent clergyman and professor of ethics at Princeton Theological seminary.

New Colors and Materials for Women's Spring Shoes

New colors, contours and materials are making the spring shoe styles as exciting as the costumes they complement. Manish pumps, strap sandals, ghillies and peasant type shoes with heels of all heights are only a few of the modes that will be represented in fashion's march. Graceful variations of the Cuban, continental and boulevard heel, in both built-up and covered models, will direct new attention to the back view of shoes.

Einstein Theory Challenged by Canadian Physicist

New Formula Stirs World of Science

NEW YORK.—A keen-minded, elderly Canadian mathematician from Montreal, lacking what is commonly regarded as accepted academic affiliation, wrote abstract mathematical formulae on the blackboard in the lecture room of Columbia University's Michael Pupin Laboratory of Physics, and presented evidence that seriously challenges some of the basic concepts of Twentieth century physics. The challenging report was presented before the American Physical society meeting.

Reading like a roll call of famous scientists were the names drawn into the discussion of the mathematical symbols, for behind the cryptic chalk marks on the blackboard were implications which seem to challenge, clarify and yet support in a most paradoxical fashion the work of such men as Einstein, Michelson, Morley, Miller, Lorentz and Fitzgerald.

Michelson Results Questioned. Except to a physicist those names may mean but little, yet they represent the men who by experiment and theory were instrumental in creating Einstein's special theory.

The symbols on the blackboard aroused the discussion because they raise once again the question of the validity of the theories on which the classic Michelson-Morley experiment to determine the ether drift was based. When one recalls that the Michelson-Morley experiment served as one of the "springboards" from which Einstein created the theory of relativity the importance becomes clear.

Is Relativity a Myth? Is Einstein's relativity wrong or is it strengthened? Has the Michelson-Morley experiment and its many repetitions been a mere scientific mirage? Was the ingenious hypothesis of Lorentz and Fitzgerald to explain the negative results of Michelson and Morley's experiment mere needless speculation? These are some of the questions which scientists are trying to puzzle out.

Who is this man who, with his equations, may potentially clear up a forty-year-old scientific problem? He is William B. Cartmel, from the University of Montreal.

For years Mr. Cartmel has been working to find out what possible reason there might be for the great discrepancy between the negative results of Michelson and Morley in their ether drift experiment and the definite positive results obtained by Prof. Dayton C. Miller over a period of many years.

Possibilities of New Theory. Professor Miller's results stand alone, like a high mountain in a flat plateau country, among the results of the original experiment and the many repetitions since then. If Miller's results are right, then Einstein's relativity theory is wrong.

Mr. Cartmel claims that his mathematical interpretations account very well for the results of Professor Miller and account at the same time for all the other results obtained from the original Michelson-Morley experiment right down to the present. That is his claim, and today scientists are puzzling over his equations, and the basic postulates which underlie them.

"Peg Leg" Convict Robs Blind Woman; Asks for Cell Again

Alex (Old Peg) Rhoda, fifty-nine, wooden legged ex-convict, has spent 29 of the last 40 years in penitentiaries. Recently in Chicago he robbed a blind woman. Witnesses chased him. One of them cried out that he was the lowest of thieves. Old Peg halted. Shamefacedly he surrendered. He gave police a revolver he carried in a secret compartment of his wooden leg, then asked to be sent back to prison.

No Need to Suffer "Morning Sickness"

"Morning sickness"—is caused by an acid condition. To avoid it, acid must be offset by alkalis—such as magnesia.

Why Physicians Recommend Milnesia Wafers

These mint-flavored, candy-like wafers are pure milk of magnesia in solid form—the most pleasant way to take it. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly, then swallowed, they correct acidity in the mouth and throughout the digestive system and insure quick, complete elimination of the waste matters that cause gas, headaches, bloated feelings and a dozen other discomforts.

Milnesia Wafers come in bottles of 20 and 48, at 35c and 60c respectively, and in convenient tins for your handbag containing 12 at 20c. Each wafer is approximately one adult dose of milk of magnesia. All good drug stores sell and recommend them.

Start using these delicious, effective anti-acid, gently laxative wafers today

Professional samples sent free to registered physicians or dentists if request is made on professional letterhead. Select Products, Inc., 4402 23rd St., Long Island City, N. Y.

HOW FAR CAN YOU GO...

The "FIRST QUART"

Tells the Story

Out of the experience of thousands of motorists has been developed a simple method of comparing oil performance... the "First Quart" Test. It is just a matter of noting how many miles you go after a drain-and-refill before you have to add a quart. If you are obliged to add oil too frequently, try the "First Quart" Test with Quaker State. See if you don't go farther before you have to add that tell-tale first quart. And, the oil that stands up best between refills is giving your motor the safest lubrication. Quaker State Oil Refining Company, Oil City, Pa.
