## PARTY IS GIVEN AT R. S. LINDSAY HOME

NATAL (Special) A surprise party was given for R. S. Lindsay Saturday evening, June 6, when a number of friends called to help him celebrate his birthday. Those present were Mr. and Mrs. Victor Berg, Mr. and Mrs. Noble Dunlap, Mr. and Mrs. Jake Neurer, Mr. and Mrs. Louis Carmichael, Mr. and Mrs. Jim Moran, Mrs. Mary Peterson and Clarence Lindsay.

The evening was spent in play-

ing cards and dancing. Refreshments were served at midnight.

## WOLF CREEK CLEARING PROGRESSES

(Forest Grove News-Times) SUNSET—Clearing in the Wolf Creek highway has progressed to a point known as the old Simpson place. Trucks are able to drive almost as far but because of rain, have been unable to take the men farther than Sunset camp.

The new office building near the local camp is almost completed and the temporary office, now too small for the larger number of workers, was moved to the scene of operations for other purposes. A report states that more men are to be added here.

## GRAZING BOARD FORMED FOR COLUMBIA COUNTY

(Forest Log) Representatives of the three largest land owners in Columbia county, the court, representing the county; Willard Evenson of Benson Timber company, Clat-

skanie, and H. M. Krebs of the Clark-Wilson Lumber company, met recently in the courthouse at St. Helens and formed a grazing board to handle grazing problems here in the future.

Judge J. B. Wilkerson was elected chairman and County Agent Geo. A. Nelson secretary. Other members of the board are County Commissioners Tilden Graham and William Pringle.

Also present at the meeting were Harry Lindgren, Oregon State College animal husbandry department; Kenneth Miller, agricultural agent of the S. P. & S. railroad; and Harold Cohen, sheep owner.

Discussion was had on the various phases of grazing in the county which was inaugurated this year on a large scale. Mr. Lindgren reported on the results of the use of the land and that losses were about equal to those on other ranges, or 3 percent. About 25,000 sheep grazed on the logged-off land in the county during the past summer. The sheep are now being shipped to market and to winter ranges

in eastern Oregon and Washington.

Agent Nelson reported that the sheepmen were well satisfied with the grazing and most of them are expected back next season and possibly additional bands.

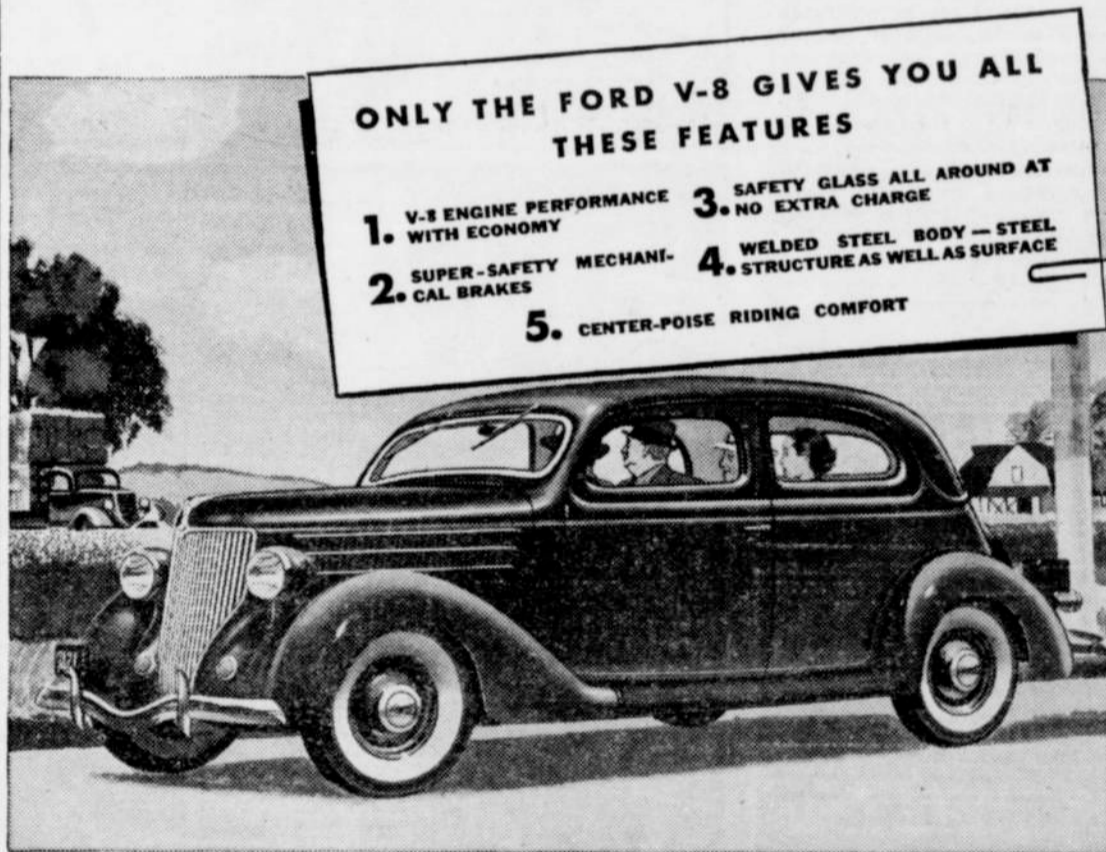

A motion was passed to draw up uniform contracts for sheep and cattle and Mr. Nelson was appointed a committee of one to arrange to secure grazing contract forms from the United States forestry service.

Income from the grazing next year will be larger, the rate for a ewe and lamb for 1936 being fixed at 3½ cents per month, an increase of one cent a month over the trail rate in effect this year. This will be graduated up annually until 5 cents for a ewe and lamb per month is paid. Rates for 1936 yearling sheep will be four-fifths of the ewe and lamb rate and for cattle it will be four times that of sheep or 14 cents per head per month.

Miss Donna Clapper is spending the week with her sister, Mrs. Leona Calhoun.

# FORD V-8 ECONOMY MEANS HIGH "Dollar Mileage"

(MORE MILES PER DOLLAR)

**N**O MATTER how you classify your expenditures for car up-keep — it's your total expenditure that counts. How much "dollar mileage" is your car giving you?

Dollars do go farther in the Ford V-8. Modern improved carburetion gives you unusual gasoline mileage with brilliant V-8 performance. Most owners of today's Ford change oil only every 2000 miles and add none between changes.

And after the first few thousand miles you begin to understand what Ford V-8 "dollar mileage" really means.

It gives you more miles per dollar because it gives you all-round economy — low first cost, low up-keep cost, low depreciation and long life — as well as low gasoline and oil consumption. All these are big items if you aim to buy the most economical car.

FORD MOTOR COMPANY

# Ford V-8

A GOOD CAR AT A LOW PRICE

\$25 A MONTH, after usual down-payment, buys any model 1936 Ford V-8 car — from any Ford dealer — anywhere in the U. S. Ask your Ford dealer about the new Universal Credit Company ½ % per month Finance Plans.

## What Is Pasteurization?

Pasteurization of milk is a scientific and accurately controlled process by which milk is held for 30 minutes at temperatures ranging from 142 to 145 degrees Fahrenheit, (this is not boiling) and thereafter immediately cooled and kept in refrigeration until delivered.

This process destroys dangerous disease bacteria, but fortunately does not destroy all of the helpful organisms such as the lactic acid bacteria present in milk.

It does not change the nutritive food value, the vitamins or mineral content of milk, or its flavor.
