**PAINT UP**  
**Paint Color Is as important as light.**  
 We have just received a line of new flat colors that do not show glare when lighted. Dark colors and high glare is as bad as not enough light. Light shades are recommended for the home. Ask for the percentage of light efficiency shown by different colors of paint. We can help you.  
**Hoffman Hardware Co.**

**The Forest Grove NATIONAL BANK**

**HAS HE ENOUGH LIGHT?**

**SIGHT IS PRICELESS—LIGHT IS CHEAP**

**SPRING TIME is Paint Time, and you should pay particular attention to the colors you use inside. Remember you only get what light it left after walls and ceiling have absorbed all they will.**

The reflection values of colors are as follows:

- White 84 per cent,
- Cream 70.4 per cent,
- Brown 23.6 per cent,
- Dark Red 14.4 per cent,
- Aluminum gray 41.9 per cent

It can easily be seen that anything less than white does not reflect light very well.

We are not selling paint but would like for you to get all the light you pay for.

You may have a number of lamps, but still do not have much light. Look carefully at the colors in your home, maybe you are wasting light.

**Let us help you with your lighting problems. Remember Light Plus Sight Is Seeing.**
