Here is the new scientific instrument—the Light Meter—that enables us to measure lighting just as accurately as a thermometer measures temperature.

MEASURED LIGHT

Let us measure the light your children will use this school term. Find out in advance if there is light enough of the right kind. You may be using the wrong kind of lamp. With the new I.E.S. lamp you are not guessing. Your children need the proper tools to work with just the same as the mechanic or carpenter.
