Gathering Data—

All farmers of Oregon who have raised wheat on their farms within the last 10 years are being asked to

report acreages and yields to their county committees in preparation for making individual farm wheat acreage allotments for 1938. Blanks have been or are being sent from the county offices for this purpose, according to members of the state committee. While the records in the county offices already contain considerable data of this nature for those who took part in the wheat program of 1933 to 1936, a much larger number of growers will be able to benefit from the present provision for a 12 cents bushel payment on wheat allotments, it is explained.

"PERK UP" WITH
PURSANG

and forget that dull, "half sick" feeling!

How do you feel these days? Are you blue, discouraged and "run down"? That dragged-out feeling may be due to a deficiency of iron in your blood. Indoor living, worry and overwork often conspire to bring on this condition. And lack of iron in the blood can make a man or woman imagine almost everything is wrong, when really the trouble can be quickly remedied.

If you are "below par" try McKesson's Pursang. It contains organic iron and copper compounds which increase hemoglobin—the substance that makes red blood red. Pursang helps to restore the balance between white and red corpuscles. And at the same time it aids appetite and improves digestion.
