## OLD TIMES COME BACK AS PUBLISHERS GET JOHNSON PIE

There was a time, so the old newspapermen say, when the country editor's very existence depended upon the kind graces of his subscribers. The old editors cared little for money, working more for the love of their profession. Old times were nearly reenacted this week at the publishers' Vernonia home when a wild blackberry pie, baked to a queen's taste, plus small, tender string beans, came as gifts for the dinner table. Mr. and Mrs. Fred Johnson get credit for the juicy, tasty pie and Mr. and Mrs. A. L. Kullander were the donors of the beans. To both goes a hearty "We sure appreciate the kindness . . . and the fine food."

### Gets New Specimens

Two new specimens of birds recently found in the locality are now on display at the Museum Barber shop. The birds are a young blue heron and a blue-tipped sparrow hawk. The latter is said to be especially rare in this vicinity. Harold Davis did the taxidermy work for N. Soden, shop owner.

A biological display at the 1939 Golden Gate International Exposition will show just how and why salmon spawn in fresh water and fresh water eels spawn in salt water.

Wonders of the ocean depths will be dramatically shown at part of the University of California's exhibit at the 1939 Golden Gate International Exposition.

Conducted by the Young People, and featuring reports from delegates to Summer Conference at Turner, Oregon. The meeting will be interesting and helpful; these reports are given by request.

Is your lighting keeping up with your seeing, or are you trying to see a speedy subject with a Horse and Buggy Lamp.

A Horse and Buggy Lamp was alright when we had Horse and Buggy Days, but those days are gone. Now in this day of speed we have to see things quicker and clearer, and to do this we have to have more light.

Don't save pennies on light that may mean dollars in hospitals.
