Sam & Bob Enlarge Store Space

New Shelving and Racks
Make for More Con-
venience, Said

The Sam & Bob grocery and market was materially enlarged the past week with the addition of 12 more feet of shelving along the east wall of their store, which also saw the removal of the store room partition to a point in distance equal to the length of the new shelving.

While the store room space will be cut, the store owners said, the addition front room space will make for more customer convenience and give chance for more display of merchandise.

Several other changes are anticipated but will be spread over a period of time to keep store convenience at a maximum, they said.
