Now -- Something New!

Outstandingly different! — Superiority that insures snow-white washings!

AND WITH POSITIVELY LESS WEAR AND TEAR ON GARMENTS . . .

Zenith "Selecta-Speed"

WITH CONTROLLED WATER ACTION — SLOW — MEDIUM — FAST —

SLOW SPEED—for Dainty Lingerie, Hosiery and Delicate Fabrics such as Curtains and Sheer Silks—that require gentle washing action.

MEDIUM SPEED—for Service-Weight Silk, Rayons and Woolens such as Men's Hosiery, Underwear and Fine Blankets—That require greater water action.

FAST SPEED—for Heavy Cottons, Linens and Work Clothes that require vigorous dirt-expelling water action. \$79.95

Change of Speeds is Easily Obtained by Simply Shifting the Speed Lever. The Current Need Not Be Shut Off.

Each speed is automatically accomplished at the same time you increase or decrease the speed of the washing action. The entire mechanism is adjusted in one simple shift of the speed lever.

ALSO 3 DIFFERENT WRINGER SPEEDS! When feeding pieces into the wringer, the larger items require more time for straightening . . . and consequently a lower wringer speed is desirable.

AUTOMATIC PRESSURE CONTROL—With ZENITH KNEE-ACTION WRINGER The rolls adjust themselves according to the thickness or thinness of the garment.
