LET US HELP YOU LIGHT-CONDITION YOUR HOME

This light meter I hold in my hand will tell you how much light you have

A light meter survey will quickly show whether you have enough light to read in bed comfortably. Our Home Advisor can tell you the minimum size lamp bulbs you need in each lamp you use for reading.

If your dining room table is also used for studying, you need a 150-watt bulb or a fixture with 3-lite bulb. She'll show you how to work more comfortably in a light-conditioned kitchen. Perhaps a Silvered Bowl bulb will do it.
