

WORD BRINGS NEWS OF DEATH OF BABY; NEW CAFE OPENS

TIMBER—(Special to The Eagle)—Word was received here Monday of the death of the four and one-half month old baby daughter of Mr. and Mrs. Delbert Foote of Arlington. Mrs. Foote will be remembered as Miss Gladys Shiffer.

The snow storm last Thursday was a false alarm, closing the camps only until Monday morning. Alvin Cornett returned home Tuesday morning from Grants Pass where he had been employed. Mr. Cornett was reported ill and spent several days in the hospital there.

New Timber Cafe opened its doors to the public January 21st under the management of Fred Fitzsimmons.

Timber Town team was defeated Monday night by Hillsboro Town team 37 to 31 on the gym floor here. Timber was also defeated at Hillsboro Wednesday night 50 to 37.

Mr. and Mrs. Phillip Castle and Mrs. David Castle attended the wedding of Ralph Cutright to Fredia Lardy last Saturday at Roy. Following the wedding was a reception attended by a large group of friends and relatives.

A. T. Kilburg spent the weekend at his home here. Mr. Kilburg is Southern Pacific log scaler at Booth, Oregon.

Mrs. Beatrice Squire of McMinnville is spending two weeks at the home of her son and family, Mr. and Mrs. Robert Hensley.

Mrs. Mae Tallman spent from Wednesday until Friday in Portland with Marie Tolson.

Claude Gilmore of Seattle, Washington, spent Saturday night and Sunday with his mother, Mrs. Laura Gilmore, and his daughters, Claudette and Shirley Mae.

Miss Gladys LeChapelle left last Thursday for Grants Pass where she will visit two weeks with Mr. and Mrs. Al Mauck.

Mrs. David Castle had as her guests last Friday her two sisters, Mrs. Ernest Paulson and daughter, Mary Ann, of Pe Ell, Washington, and Mr. and Mrs. T. S. Davis and three children, Ted, Donald and Bettie of Seattle, Washington.

Mr. and Mrs. Ray Elliott and Richard of Hillsboro were Sunday dinner guests of Mr. and Mrs. D. A. Castle.

Game Surveys Made by Foresters

Estimates Made for Number of Years; Recent Surveys More Accurate

The United States forest service has been making game estimates for a number of years, states assistant regional forester L. H. Douglas, Portland, Oregon.

"Game management", says Douglas, "is a kind of animal husbandry. A deer, like a cow, needs a certain amount of summer and winter forage. Over-population and under-population usually is shown by forage conditions as well as by numbers." The first surveys were based wholly upon the judgement of local forest officers. They were, however, the only game population estimates that were made, and aroused much interest. Recent surveys, made by more intensive methods, show that the earlier estimates tended to be too low.

Game Surveys are made by several methods adapted to the season and the type of country. If two feet or more of snow are on the ground, deer concentrate in small areas and do not move around much. The enumerator can come close and make a fairly accurate count. Strips may be run to cover average conditions and the game counted. The density of the strip is applied to the whole area. In the spot method, representative spots receive a 100 percent count by grid-ironing them or by driving the game past the enumerators. The figures are applied to the whole unit. A less accurate method is to divide the unit into watersheds or sections, and in each division get the information from trappers, residents, records kept during the season, and other sources. Airplanes are used to count game in open country and to locate concentration areas.

Where serious over-population exists, a detailed survey is made, which includes all factors such as condition of forage plants, summer and winter range, disease, parasites, sex ratios, shedding and growth of antlers, and breeding seasons.

Game Surveys are made by several methods adapted to the season and the type of country. If two feet or more of snow are on the ground, deer concentrate in small areas and do not move around much. Grade A Dairy License Reduced

Dairymen Required to Pay Approximately Half for Licenses

Annual licenses for Grade A dairies have been reduced to a minimum of \$5 for up to 10 cows and 50 cents for each additional cow, reports the state department of agriculture. The order reducing the fee is retroactive to January 1, 1940.

The new regulation means dairymen will pay only about half as much for their licenses this year as in the past.

Each herd will require a separate license, with a herd to be considered cows in one location only. A group of cows divided and milked in more than one location must be licensed as separate herds for each location.

The fee applies also to shippers of Grade A pasteurized milk. Plants that handle Grade A milk, either raw or pasteurized, are subject to a \$10 annual plant license.

Training Center To Begin February 7

Anyone Interested Invited to Contact Wallace McCrae, Principal

Principal McCrae received word Monday that the National Youth Administration is beginning a part-time Resident Work-Training Center in Newberg, Oregon, to start February 7, 1940 and to continue through June 30, 1940.

Twenty four young women, unemployed, between the ages of 18 through 24, will live in the Center under the supervision and direction of a trained Home Economics supervisor. The work will have to do with all phases of home-making and up-keep of the home including clothes construction, budgeting, meal planning. The work of the Center will be done by the youth workers who will earn sufficient money through the N. Y. A. sewing project to pay for living expenses, medical care and incidental items.

After paying these expenses, each girl will have a minimum of \$8.00 a month for personal expenses and for traveling. Each youth will live in the Center one-half of each month.

Any young woman qualifying in age and unemployed who is interested in this project is invited to see Wallace McCrae, high school principal.

At M. A. Oakes' Home—Miss Mildred Oakes, sister of M. A. Oakes, returned Sunday from her home at Salem to spend the coming month at her brother's home caring for Mrs. Oakes who has been ill for some time.

Many Eggs Taken from Brood Trout

Game Commission Plans Stocking of Lake for Cutthroat Development

Approximately 1,219,345 eggs have been taken to date by the state game department from less than 20,000 adult native searun cutthroat trout held at the Alsea trout hatchery. This supply of brood trout, the only one of its kind in Oregon, has been developed through careful selection and was recently reported by Dr. Fred J. Foster, regional director of the U. S. Bureau of Fisheries, to be the largest and finest stock of adult native cutthroat trout in existence.

The Commission plans to rear cutthroat brood trout at the Alsea hatchery for the purpose of stocking Eel lake in Douglas and Coos counties, which is being acquired for development as a cutthroat brood lake and from which it is hoped that it will eventually be possible to secure enough eggs to supply the needs of the coast.

Loggers Lose Game to Banks Wednesday

Clatskanie to Be Next Encounter for Quintet on Friday Night

In the basketball game played in the high school gym here Wednesday evening the Vernonia Loggers first team lost to Banks by a two-point margin in overtime play. The second team won its game with the Banks second five.

First team games scores were Vernonia 28, Banks 30; second team scores were Vernonia 27, Banks 17. Andy Killian was high-point man for the evening with 13 counters to his credit.

On Friday, February 2, the Loggers journey to Clatskanie. This is the first time this season the Tigers and Loggers have met. On Tuesday, February 9, a rubber game between Birkenfeld and Vernonia will be played on the local

floor. This promises to be an exciting game. The first game between the two teams was played on the Vernonia floor with Vernonia coming out on top; then Birkenfeld defeated Vernonia on the Birkenfeld floor.

Grade School Wins—The Washington grade school basketball quintet won its Wednesday game here with John Gumm school of St. Helens 19 to 18. The winning score was gained in overtime play.
