

Here's The Snowball In Hades!

Hot flame seems powerless to affect this 300 degree below zero "snowball". In fact, glistening white frost will collect on it even when it is suspended in fire. These two pretty young visitors at the Frigid-aire exhibit in the General Motors building at the New York World's Fair, where the "snow in flame" performance is staged, expressed amazement at scientific proof that a "snowball" can be so cold.

Crop Output for 1940 Considered Ample, Stated in Report

Crop production in the United States this year promises to be fairly in line with probable requirements, in general, with a gross output only slightly under 1939, reports the O. S. C. extension service in its current review of the agricultural situation. Some decline occurred in the farm price level during recent weeks in the country as a whole, but the Oregon general farm price level was maintained, according to data in the report.

Hay Crop Large
The principal variation in crop prospects from last year which is of particular significance to the farmers in Oregon is forage supplies. The hay crop of the country is expected to be very large—probably the largest production since 1927. Despite an increase of about 2 per cent in hay-consuming livestock, principally cattle and sheep, the hay crop will be large enough for liberal feeding in most areas with considerable carry-over next year.

The report contains detailed information regarding prospective production and farm prices on a large number of farm commodities, including wheat, feed grains, hay, seed crops, potatoes, truck crops, hops,

Sheeley Taken to County Jail—

Lester Sheeley, former city attorney, was arrested here Saturday and taken to the county jail at St. Helens for violation of a Clatskanie justice court sentence to remain out of the county.

For the first four months 1940, gasoline consumption totaled 71,742,643 gallons compared to 66,439,093 gallons for the corresponding period last year.
