

## Accidents Are Reduced in State

For the first time in five years, pedestrian accidents in 1941 did not head the list in types of traffic accidents causing the greatest number of deaths in Oregon.

Pedestrian accidents were reduced 18.8 per cent from the toll of 1940. There were 108 persons killed in this type of accident last year, which was 27 per cent of the total fatalities reported in 1941.

### Comparison Given

In 1940, pedestrian fatalities constituted 37 per cent of all deaths, in 1939 they caused 34 per cent, in 1938, 30 per cent and in 1937, 34 per cent. Last year, non-collision accidents caused the greatest proportion of all deaths, 30 per cent, while collisions involving two or more cars caused 29.5 per cent of all deaths.

Of the 108 persons killed in pedestrian accidents last year, 55 died in city accidents and 53 in rural crashes, Snell's figures revealed.

### Dangerous Hours

More than half the pedestrian deaths, 53 per cent, resulted from accidents which occurred during the hours 5 to 9 p. m. About the same percentage of the pedestrian victims were struck while engaged in some unsafe walking practice as jaywalking, crossing intersections diagonally, stepping out into the street from between parked cars, or walking on the right side of the highway instead of on the left, facing approaching traffic.

Sixty-six per cent of the pedestrian fatalities involved persons 50 years of age or older. The month of December, with 22 pedestrian deaths, saw the greatest number of these fatalities of any one month during the year.

### SOUND WAVES USED

Sound waves inaudible to the human ear are being used to homogenize milk and ice cream. They also kill bacteria in food.

## Protect Crops, Agent Says

One of the important items in the production of food for Victory, is to protect the crops from rodents; especially the gray digger. "Where gray diggers have been allowed to increase, they are quite destructive to potatoes, gardens, and grain crops," states Geo. A. Nelson, county agent.

Now is the best time to destroy gray diggers, when they are just coming out and food is not so plentiful. "Gray diggers can be destroyed by various methods; either by shooting or trapping, or by poisoning," States Mr. Nelson. Poison grain for destroying the gray diggers has been mixed in quantities this year, and is available at the County Agent's office and at places in practically all communities in the county.

All those who are anxious to protect their crops from the destruction of gray diggers are urged to start control methods at once in order to destroy as many as possible before they begin doing damage to the gardens and other crops.

## Mrs. America Meets the War

### EDITOR'S NOTE:

War touches every home and every citizen. This column, based on official government information and prepared by the Office for Emergency Management, shows how the war will affect Mrs. America and her home.

Many women, particularly on the Pacific Coast, will be relieved to know that the government is now preparing to provide gas masks for all civilians who are likely to need them. The money has already been appropriated by Congress—\$100,000,000. Part of this money is being used for gas masks, the rest for

auxiliary fire-fighting equipment, cause the masks are not made accretchers, cots, and other civilian according to approved specifications. Warning: Don't under any You can be assured that masks will circumstances buy masks from private be furnished to everyone, for adequate retailers; such sales are appropriate protection must not depend inhibited by government order, be upon willingness or ability to buy.

## Save Anti-Freeze, Motorists Urged

Motorists in Oregon were urged recently by A. N. Weir, service manager of the Oregon State Motor Association, to store their anti-freeze this spring to guard against possible shortage next winter. The Motor Association has been advised by the OPA that ethylene glycol—the "permanent" anti-freeze—and alcohol mixtures which make up the others, are among the chemicals needed for war industries, explosives, and in the radiators of tanks and airplanes.

"The anti-freeze should be drained from the radiator and put into air-tight bottles or cans, and stored in a cool corner off the floor," Mr. Weir said. When cold weather comes back, you will have protected yourself against a shortage of these chemicals, thereby assisting the war effort. Remember to test the mixture before using it again."

### MUCH GAS USED

A four-engine bomber flying at 250 miles an hour consumes 350 gallons of gas every hour.
