

Mrs. America Meets the War

The war will dip right into your salad bowl by means of a WPB order reducing slightly the amount of fats and oils which can be used in the manufacture of salad dressing, mayonnaise and similar products. The order, intended to build up a reserve supply of fats and oils, also limits the types available for use in paints, varnish, lacquer, linoleum and oil cloth. There is no restriction on the use of fats and oils in finished food products where oil is not the principal ingredient as for example, in bakery goods. Neither butter, cocoa butter, mineral

oil or vitamin bearing oils affected. A working wife does not necessarily hasten her husband's induction into the service, according to the Selective Service and War Manpower Commission. And so married women should be able to take their position in industry and war production without affecting their husband's liability for draft. Actually, the induction of husbands may be deferred by married women in industry, since their employment can release workers either unmarried or without dependents, for military service.

There will be lots of straggly socks in 1943 unless Mrs. America begins conserving the available supply of bobby pins and hairpins. A

WPB order further reducing the manufacture of hairpins and bobby pins means that in 1943 there will be only 25 per cent of 1941 production. According to estimates, that means slightly less than one package of pins for every woman in the country in 1943. In 1941, 40,000,000 women bought 140,000,000 cards and packages of bobby pins and hairpins. So guard your present supply to make it go as far as possible.

Baby's canned foods are not to be restricted by the WPB order which controls distribution of many canned fruits, vegetables, and fruit and vegetable juices. However, adult members of your family won't feel the effects of this order too heavily. Although the armed forces and lend-lease requirements will take about a third of the total 1942-43 pack of canned fruits and vegetables, this year's increased production brings the total amount available for civilians to about the same as the average during the period of 1936-40. And don't forget you still have fresh fruits and vegetables to draw on. Some of the canned vegetables affected by the order are asparagus, green and wax beans, carrots, peas, corn, tomatoes (whole or parts) and mixed vegetables.

Mrs. America's junior probably won't be able to understand just why the WPB order placing castor oil under complete allocation control isn't more inclusive. There is no restriction on the consumption of castor oil for medicinal purposes.

One of these days when you're planning to have canned fruit cocktail or fruit salad, you're likely to find it a little higher. And the reason will be due primarily to the increased cost of pineapple and marachino cherries. The OPA will allow the canner to add the difference between his highest cost for pineapple and marachino cherries during the first 60 days after beginning of the 1941 pack and the present maximum cost of these items.

You can begin to write "Merry Christmas" to Navy men for Yuletide cards and parcels should be mailed between October 1 and November 1. Navy and postal officials advise you to mark packages as "Christmas parcel" to insure special handling. Location of the ship or naval unit of the addressee should not be indicated on the envelope. Only two post office addresses may

be used: c/o the postmaster in either New York or San Francisco, depending upon which is nearer the addressee. Books will be accepted for this mailing at the rate of three cents per pound.

Even the installation of a gas or electric range in wartime is not a simple task for the housewife. No utility has been permitted to make extension for the new consumer unless the house was wired or piped and ready for service prior to July 1, 1942, or in the case of a new house where the foundation was completed prior to that date. Now, however, if you move into a house not wired or piped prior to July 1, and if it is not equipped with a stove of any kind, you can get either gas or electric connection.

No more than 15 pounds of copper may be used in connection with an electric range, and likewise there are restrictions on it if it is a gas range installation.

And here are some more frills and furbelows to be trimmed. No more free samples of cosmetics. The WPB order regarding toiletries and cosmetics prohibits the distribution of samples because of the waste of materials.

You can help alleviate the congestion of railroad and bus lines over the week-end if you and the family will shift your travel to the first part of the week. The Office of Defense Transportation says that some progress has been made in relieving the clogging of transportation facilities by week-end travel.

Natal Grange Has Booster Meeting

NATAL—Mr. and Mrs. Jessie George of Mist were callers at the Ralph George home Sunday.

Don Pringle and wife were out from Portland Sunday visiting relatives.

Visitors at the John Titus home over the week-end to help celebrate Mrs. Titus' birthday were Mr. and Mrs. Jock Robinson and Mr. and Mrs. J. P. Borden of Portland.

Oregon-American LUMBER CORPORATION Vernonia, Oregon

America's automotive service men are playing an important part in the nation's war effort. It is their job to "save the wheels that serve America."

The Automotive Mechanic of Yesterday Is the VICTORY SERVICE MAN of Today

Help him to help you
"SAVE THE WHEELS THAT SERVE AMERICA"

by getting a skilled service check-up regularly

Take the word of millions:

MORE PEOPLE GO TO CHEVROLET DEALERS FOR SERVICE

than to any other dealer organization

Just how important the automotive mechanic's work is to the nation will be clear to all who consider the following facts*:

• Automobiles and trucks form the sole practicable means of transportation for war workers and war materials in many communities throughout America.

• In some sections, 78% to 100% of the workers drive by automobile to vital war plants.

• 2,314 U. S. cities, with a population of 12,524,000, depend on private cars for transportation;

The automotive mechanic—the trained Chevrolet Victory Service Man—is the lifeguard of America's millions of cars and trucks. Help him to help you and America by getting a skilled service check-up at regular intervals.

*All statements based on reports compiled by the Michigan State Highway Department and the Statistical Department of A. M. A.

54,000 communities depend entirely on motor vehicles.

• Six out of every ten farms use one car or more; 67% of farm car mileage is necessity driving.

• More than 65.2% of all war plants reporting in Michigan (a typical war production state) depend on trucks to haul their incoming and outgoing freight.

• Trucks haul nearly 100% of the milk supply of most large cities—and 58% of all livestock marketed in the U. S.

• Trucks are the sole transportation system serving our 54,000 communities not reached by railroads.
