Home for Week-End—

Miss Pauline Rollins, who is working in Portland, spent the week-end with her mother, Mrs. Chet Taylor, at Wilark.

Federal Agencies Have Jobs Open

Complex problems connected with the war have created in Federal agencies a heavy demand for economists, statisticians and transportation specialists. O. T. Bateman, local secretary for the United States civil service commission announced. Accounting assistants are also required.

Very much needed are economists and statisticians to assist federal agencies conduct studies and analyses relative to commodities, industries, prices, markets, international economics and many other fields. Men and women with at least five years of appropriate college study or experience are sought, Mr. Bateman said.

Transportation specialists are needed to prevent traffic bottlenecks and expedite the flow of passenger and freight traffic throughout the United States as well as around the globe. Persons with at least three years of appropriate experience in railroad, highway, water, or air transportation will be recruited.

Salaries Mentioned

Yearly salaries for these positions range from \$2,600 to \$6,500 plus overtime compensation. (Granted for the recently lengthened federal work week, overtime compensation amounts to approximately 21 per cent of that part of the basic salary not in excess of \$2,900 provided the increment does not make the total compensation more than \$5,000 a year.)

No written test and no maximum age limit is specified for these positions, Mr. Bateman emphasized. Persons are selected on the basis of experience.

To recruit accounting and auditing assistants urgently needed by such federal agencies in Washington, D. C., as the treasury and war departments and the general accounting office, the U. S. civil service commission will give an examination at Portland Mr. Bateman also reported. Applicants must be filed with the commission's Washington office by February 23.

Women Wanted

Assistant's positions pay \$2,000 a year plus overtime compensation amounting to approximately 21 per cent. Persons with two years of appropriate education or experience in the field of accounting are eligible to take the test. Women particularly are urged to apply.

Complete information and forms for applying for all of these positions may be obtained from Mr. Bateman at the Vernonia post office. Applications are not desired from war workers unless they may use higher skill in the positions applied for. For war manpower commission restrictions on federal appointments see form 3989 posted in first and second class post offices.

Universal Garden Fertilizer Out
 A universal victory garden fertilizer for use in all states in order to further the victory garden program for the realization of essential food requirements has been announced jointly by the United States department of agriculture and the WPB.
 "The millions of victory gardens planted in 1942 caused a new demand for plant food," the announcement said "and since victory gardens made such a valuable contribution to food requirements and to the family food budget in 1942, it is essential that people be encouraged to plant them even more extensively in 1943. We must do this despite the fact that owing to war needs our supplies of chemical nitrogen are somewhat curtailed in comparison to those available in 1942."
Fertilizer Said Important
 "The United States department of agriculture and the WPB concur in the importance of providing fertilizer so that victory gardens may attain highest possible productivity from their gardens."
 The organic fertilizer materials, such as cottonseed meal, soybean meal, peanut meal, castor pumice, etc., have long been popular with home gardeners. The new victory garden fertilizer combines the known value and safety factors of organic nitrogen, the benefits of which extend well over the growing season, with a small amount of chemical nitrogen which provides vegetable plantings with a quick

THE OLD JUDGE SAYS...

"Judge, I didn't realize till the other night when I ran across an article in the paper what a whale of a lot of industrial alcohol the government needs for the war."
 "I should say it does, Chet. I understand the beverage distillers around the country are producing about 240,000,000 gallons of industrial alcohol this year for ammunition, tires, and other things. I'd say it's mighty fortunate these distilleries are available to do the job. Otherwise, if we still had prohibition, the government would have had to spend millions of dollars and use up a lot of critical materials to build plants...to say nothing of all the time it would take. It might have been just another case of 'too little, too late'."
